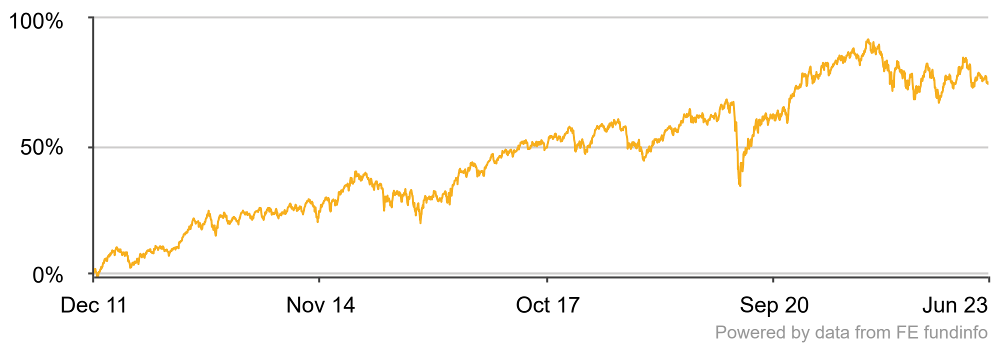
INVESTMENT OBJECTIVE:

May 2023

The portfolio aims to produce its return through a combination of income and capital growth but with a bias towards the latter. It is designed to be more defensive when markets fall but also able to capture a sizable part of any gains in rising markets. This is achieved from a portfolio invested in a diverse range of asset classes, ranging from low to high risk, which include direct equities together with equity fixed interest, absolute return and property based collectives.

CUMULATIVE PAST PERFORMANCE (%)



RD Bespoke Medium Risk Growth

Nov 11 - May 23 Data from FE fundinfo 2023

Past performance is not indicative of future performance. The value of shares and the income from them can fall as well as rise and investors may get back less than the amount invested.

ARC Private Client Indices are provided by Asset Risk Consultants (ARC) and are a set of risk-based indices designed to be used in assessing the performance of any diversified client portfolio. They are based on actual client portfolio data provided by over 140 investment firms, including Rowan Dartington, and are net of all ongoing charges. Please note, all comparisons are an approximation and should be used as a guide only due to differences between investment propositions and philosophies from subscriber firms.

CUMULATIVE (%)

	1m	3m	6m	1yr	3yrs	5yrs
RD Bespoke Medium Risk Growth	-1.75	-3.16	-1.83	-2.11	11.69	10.92

ARC Sterling Steady Growth PCI	-1.00	-0.92	-0.08	-1.79	11.86	13.10

12 MONTH DISCRETE PERFORMANCE PERIODS (%)

	May 22 - May 23	May 21 - May 22	May 20 - May 21	May 19 - May 20	May 18 - May 19
RD Bespoke Medium Risk Growth	-2.11	-1.61	15.96	0.46	-1.15
ARC Sterling Balanced Asset PCI	-2.40	-1.66	11.89	1.35	0.30
ARC Sterling Steady Growth PCI	-1.79	-1.72	15.89	0.46	0.65

Please note:
The chart above shows the performance of the RD Bespoke Medium Risk Growth Model from 30 Nov 2011 when the model launched. Performance is illustrated inclusive of any changes to the model, any underlying fund charges, and Rowan Dartington's management and administration fees.

Data from 1 month through to 5 years is cumulative (%). The cumulative periods are for the period stated, for example 3m, up until the most recent date as shown on the chart. The 12 month discrete performance periods are to the last month end.

The performance numbers contained within this factsheet are based on the current model as at the date this factsheet was produced. For the performance of your own portfolio, you should refer to your personalised quarterly valuation or request a detailed portfolio performance review.

All past performance information is on a bid to bid basis in pounds sterling.

KEY POINTS

- Strategic asset allocation investment process
- Returns via a combination of income & growth
- Multiple asset classes
- High quality securities
- Active management

INVESTMENT OUTLOOK

Global equity markets were broadly flat in sterling terms during April, with strength in the pound dampening what was a generally positive month. Under the surface, there was a notable divergence between developed and emerging markets, with Chinese equities showing particular weakness as investors began to question the strength of the domestic recovery while fears rose over potential military action against Taiwan. The UK and Europe led the way, while strong returns in Japan were reversed by further weakness in the Yen. In the bond markets, volatility started to die down as investors turned their attention away from troubles in the banking sector and back to the issues of inflation, growth, and tight labour markets. The inflation picture is increasingly mixed; in the US, the headline number has come down markedly, however the labour market is still red hot, while in the UK the rate has barely budged from its multi-decade high.

Please note:
Please find the definitions for each 'Risk Group' in our Investment Risk Classification Matrix. The risk gauge is a graphical representation of the portfolio's risk weighting for illustrative purposes only.

[1] The Ongoing Charges Figure (OCF), Transaction and Incidental costs are those relating to investments made and held on the Rowan Dartington platform. If you are investing via an alternative third-party platform, the OCF and other costs may be different and will depend on the types of units (retail or institutional, for example) that can be accessed via that third party platform. Rowan Dartington cannot be held responsible for any changes in the published OCF or other costs when using a third party platform.

[2] Portfolio yield gives an indication of the current level of income which is expected to be distributed over the coming 12 months. This is based on the current holdings within the portfolio, and after the deduction of the investment funds' annual management charges – it is gross of basic rate tax. It excludes the annual Rowan Dartington management charge.

[3] Our Annual Management Charge (AMC) is the maximum management charge that will be applied to this portfolio. If you are unsure as to the charge applicable in your own circumstances, please contact your portfolio manager.

GENERAL RISKS

The past performance is not a reliable guide to future performance. The value of shares and the income from them can fall as well as rise and investors may get back less than they originally invested. The tax treatment of investments depends on each individual's circumstances and is subject to changes in tax legislation. The sterling value of overseas investments, and the income from them, is subject to currency fluctuations. All estimates and prospective figures quoted in this publication are forecast and are not guaranteed.

SPECIFIC RISKS

Equity: This portfolio invests in equities. The value of equities can rise and fall quite sharply at times. Returns are not guaranteed and, whilst equities have tended to outperform over the long term, there have been periods when equities have fallen significantly in value over the short term.

Bond: This portfolio holds bonds issued by companies and governments. There is a chance that some of the companies or governments that issued these bonds will fail to make interest or capital payments, or other investors may believe the security of the government or company has declined, both of which would reduce the value of your investments. The values of bonds are also sensitive to changes in interest rates; for example, an increase in interest rates will usually cause a fall in the value of an investment in bonds.

Emerging Markets: This portfolio holds investments in less developed economies and invests in less mature stock markets, so its value may fluctuate more than a portfolio which invests in developed countries.

Property: This portfolio invests in property (i.e. land and buildings). Property can be difficult to sell in a short period, so you may not be able to sell or switch out of the investment when you want to due to the delay in acting upon the instruction. The value of property can fall as well as rise, particularly if there are more people trying to sell rather than buy, and is generally a matter of a valuers opinion until the property is sold.

IMPORTANT INFORMATION

This publication is provided solely to assist investors to make their own investment decisions, and is for illustrative purposes only. The Model Portfolio may not be suitable for all recipients and does not constitute a personal recommendation to invest, or a solicitation to purchase any investment or product. The opinions expressed within this are those of Rowan Dartington and are subject to change without notice. You should seek advice from your adviser before making any investments.

Rowan Dartington, its associate companies and/or their clients, directors and employees may own or have a position in the securities mentioned herein and may add to or dispose of any such securities.
