The Manager is authorised in Luxembourg, regulated by the CSSF and is a member of the Orbis Group."

Date of Production 06 September 2023

What is this product?

"**Type** This Key Information Document refers to the Class of the Fund which is a compartment of the Company, a UCITS-compliant fund company incorporated in Luxembourg. The Fund is legally segregated from the other funds of the Company. This means, for example, that the liabilities arising in one fund cannot be offset by the assets of other funds. **Term** The Fund has been established for an unlimited period of time. The Fund or the Class may be closed by resolution of the Board of Directors of the Company, subject to the conditions set out in its articles of incorporation and prospectus (the **Prospectus**), among other means. **Objective** The Fund invests in equities, fixed income instruments and commodity-linked instruments and seeks to apply a cautious balance between investment returns and risk of loss with a diversified global portfolio. Orbis targets the Fund to hold: • 10-60% in global equities; • 30-90% in fixed income instruments issued by governments, corporate bodies or other entities, such as bonds, loans, money market instruments, cash and cash equivalents, including up to 10% in distressed securities; and • 0-20% in commodity-linked instruments. Equities are selected using extensive proprietary investment research undertaken by Orbis focusing on equities which offer superior fundamental value. Orbis determines superior fundamental value by comparing the share price with an assessment of the equity's intrinsic value. Orbis intends to maintain the Fund's exposure to stockmarkets net of hedging to between 0% and 40% of the Net Asset Value of the Fund. The aggregate hedging of the Fund's stockmarket and bond market exposure is also intended to be maintained between 0% and 40% of the Net Asset Value of the Fund. The investment manager of the Fund may cause the Fund to be under or over these asset allocation and hedging targets, at times meaningfully so and/or for extended periods of time, where it considers this to be in the best interest of the Fund. The Fund may adjust the currency exposure, generally using forward contracts. The Fund may also hold cash and cash equivalents for certain additional purposes, including exchange of margin related to currency management, as a result of subscriptions and redemptions or for other liquidity purposes. The Fund may purchase or sell exchange-traded derivatives, for example futures and options on broad stock and bond market indices, to manage its overall exposure to stock and bond markets. Subject to certain conditions, the Fund may also buy and sell exchange-traded equity call and put options for investment efficiency purposes. Actively managed, the Fund has no industrial, geographic, or other market sector investment targets. A benchmark is used by the Fund for two purposes: performance comparison (the **Fund Benchmark**) and performance fee calculation (the **Performance Fee Benchmark**). For the Class, the Fund Benchmark and the Performance Fee Benchmark is comprised of 30% MSCI World Index with net dividends reinvested and 70% JP Morgan Global Government Bond Index, each expressed in US$. The Fund does not seek to mirror the investment universe of the Fund Benchmark or the Performance Fee Benchmark. The Fund therefore is not constrained by the composition of these benchmarks and may from time to time deviate meaningfully from them, both quantitatively and qualitatively, in pursuit of superior long-term capital appreciation. Currency exposure is actively managed and can differ greatly from the currency exposures of the Fund Benchmark or the Performance Fee Benchmark which may significantly influence returns. **Intended retail investor** The Class is not intended for retail investors.

Generally, investors in the Fund may include retail investors as defined in the PRIIPs regulation (Regulation (EU) No 1286/2014), subject to eligibility restrictions for each share class as set out in the Prospectus. The Fund is intended for investors who are prepared to accept the risk of loss of capital up to the amount invested, have knowledge of and/or experience in this type of product and are willing and able to hold the investment in the Fund for the recommended holding period. Minimum subscription amounts apply as described in the Prospectus. The Fund is aimed at investors who are seeking a cautious balance between investment returns and risk of loss by investing in a single fund holding a diversified global portfolio of equities, fixed income instruments and commodity-linked instruments. The Fund does not aim to generate a significant level of income and does not target a specific yield and therefore may not be appropriate for investors seeking a regular income stream from the Fund. Investors may request to redeem weekly on Thursday any shares held by the investors in the Class, subject to certain conditions outlined in the Prospectus. On any Dealing Day (as defined in the Prospectus), investors have the right, subject to the restrictions and conditions set out in the Prospectus, to convert all or part of their shares into shares of another share class of the Fund or of the same or another share class of another fund of the Company. While the Fund does not expect to issue dividends, any dividend declared will be automatically reinvested unless specified to be paid in cash. The Fund's Depositary is Citibank Europe plc, Luxembourg Branch. The Prospectus and the annual and semi-annual reports of the Company are available in English, free of charge at www.orbis.com or by emailing clientservice@orbis.com or calling +1 441 296 3000. Additional information, including on other share classes of the Fund, is available on www.orbis.com. The net asset value per share is made public at the office of the Manager and is available at the offices of the Fund's Depositary or by emailing clientservice@orbis.com."

Evaluation Version

This PDF document was created by an evaluation version of RealObjects PDFreactor 11.6.4 (14944). The evaluation version is fully functional, but includes this information page. It must not be used for production purposes. The information page and all other evaluation notices must not be removed from the PDF file.

NOTE: Conversions in evaluation mode might be slower and the results might have a larger file size than in production mode.

About PDFreactor

RealObjects PDFreactor is a powerful formatting processor for converting HTML and XML documents into PDF. It uses Cascading Style Sheets (CSS) to define page layout and styles. The server-side tool enables a great variety of applications in the fields of ERP, eCommerce and Electronic Publishing.

PDFreactor supports HTML5, CSS3 and JavaScript.

It allows you to dynamically generate PDF documents such as invoices, delivery notes and shipping documents on-the-fly. PDFreactor allows you to easily add server-based PDF generation functionality to your application or service. Since PDFreactor runs on a server, the end-user in general does not need any software other than a PDF viewer.

What are the risks and what could I get in return?

Risk

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level.

Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Lower risk						Higher risk
1	2	**3**	4	5	6	7

The risk indicator assumes that you keep the product for 3 years. The actual risk can be significantly higher if you cash in at an early stage and you may get back less.

"**Be aware of currency risk if your reference currency differs from the currency of the Class. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.** The Fund may be exposed to other risks such as liquidity, credit, counterparty, derivatives and currency/exchange rate risks. For further details on these and other risk factors, please refer to the Prospectus. This product does not include any protection from future market performance so you could lose some or all of your investment."

"**Performance** The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may also affect how much you get back. **What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of a suitable benchmark over the last 10 years. Markets could develop very differently in the future.** The stress scenario shows what you might get back in extreme market circumstances. "

Recommended holding period:		**3 years**	
Example Investment:		**10,000 US$**	
		If you exit after 1 year	**If you exit after 3 years**
Scenarios			
Minimum			
Stress	**What you might get back after costs**	5,170 US$	5,690 US$
	Average return each year	-48.3%	-17.1%
Unfavourable	**What you might get back after costs**	7,870 US$	8,700 US$
	Average return each year	-21.3%	-4.5%
Moderate	**What you might get back after costs**	10,300 US$	11,350 US$
	Average return each year	3.0%	4.3%
Favourable	**What you might get back after costs**	11,530 US$	12,800 US$
	Average return each year	15.3%	8.6%

Unfavourable: This type of scenario occurred for an investment in the Performance Fee Benchmark between August 2021 and July 2023.
Moderate: This type of scenario occurred for an investment in the Performance Fee Benchmark between May 2015 and May 2018.
Favourable: This type of scenario occurred for an investment in the Performance Fee Benchmark between December 2018 and December 2021.

What happens if Orbis Investment Management (Luxembourg) S.A. is unable to pay out?

The assets of the Fund are segregated from the assets of the Manager and held in safekeeping by the Depositary of the Company, independently of the default of the Manager. In the event of the insolvency of the Depositary or one of its delegates, the Fund may suffer a financial loss. However, this risk is mitigated by the fact that these parties are generally required by law to segregate the assets of the Fund. Subject to certain limitations, the Depositary may also be liable for the loss of such assets held in its custody.

What are the costs?

"The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment. **Costs over time** The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed: • In the first year you would get back the amount that you invested (0% annual return). • For the other holding period we have assumed the product performs as shown in the moderate scenario. • US$ 10,000 per year is invested."

	If you exit after 1 year	**If you exit after 3 years**
Total costs	0 US$	0 US$
Annual cost impact (*)	0.0%	0.0%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.3% before costs and 4.3% after costs.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee.	0 US$
Exit costs	We do not charge an exit fee.	0 US$
Ongoing costs taken each year		
Management fees and other administrative or operating costs	[X]% of the value of your investments per year. This is an estimate based on actual costs over the last year.	-
Transaction costs	[X]% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	-
Incidental costs taken under specific conditions		
Performance fees	25% of the outperformance over the Performance Fee Benchmark. The fee is transferred into a fee reserve and is refundable at the same rate in case of relative underperformance when there is value in the fee reserve. Outperformance includes cases of negative absolute performance where the Class drops in value by less than the Performance Fee Benchmark. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	-

How long should I hold it and can I take money out early?

Recommended holding period: 3 years

The recommended holding period is based on the time horizon applied by Orbis when assessing investments. Orbis believes that, over the long-term, investing across asset classes in securities identified by its research process (as described in the Prospectus) can generate higher returns than a combined benchmark of global equities and fixed income instruments, without greater risk of loss. Investors may request to redeem their shares at any time subject to the frequency and conditions set out in the “What is this product?” section above and in the Prospectus. Redeeming before the end of the Recommended Holding Period may have an impact on the risk and performance profile of your investment.

How can I complain?
