Key Information Document

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

{ManagementCompany} (the "**AIFM**") is required to produce and publish this document by the UK version of Regulation (EU) 1286/2014 of the European Parliament and the Council on key information documents for packaged retail and insurance-based investment products (the "**Regulation**"). The AIFM is required to follow the Regulation's prescribed methodology in preparing the document, including for the determination of the Summary Risk Indicator. The AIFM believes that the methodology prescribed by the Regulation for the preparation of the information in this document and, in particular, the performance scenarios, is primarily designed for packaged retail investment products rather than shares in this type of fund and, in the case of this specific product, produces results which, in the AIFM's view, could significantly differ from the fund's results.

Product

Product: Class IA-AUD of Ares European Strategic Income Fund, a sub-fund of Ares European Credit Solutions Fund SICAV

Manufacturer: {ManagementCompany}

Contact details: https://www.aresmgmt.com +352 28 55 72 200

Competent Authority of the Manufacturer: This product is managed by {ManagementCompany}, which is authorised in Ireland and supervised by the Central Bank of Ireland.

Date of Production: 09/07/2024.

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

Shares in Ares European Strategic Income Fund, a sub-fund of Ares European Credit Solutions Fund SICAV, which is an open-ended multi-compartment Luxembourg investment company with variable capital (société d'investissement à capital variable) governed by Part II of the Luxembourg Law of 17 December 2010 relating to undertakings for collective investment, as amended (the "**2010 Law**") and established as a public limited liability company (société anonyme or "**SA**") in accordance with the Law of 10 August 1915 on Commercial Companies. Class IA is an "Accumulating Sub-Class". An investor subscribing for Accumulating Sub-Class shares will, in lieu of receiving cash distributions from the Product in respect of such shares, have any such amounts reinvested in such Class..

Term

The Product has no maturity date and has been established for an indefinite period of time. However, the board of directors and / or the shareholders may in certain circumstances, as set out in the prospectus, liquidate the Product. The Manufacturer does not have the ability to terminate the Product unilaterally. For information on the Product's recommended holding period and redemption policy, please refer to the section titled "How Long Should I hold it and Can I Take Money Out Early?" below.

Objectives

The Product will invest, as the feeder fund, all or substantially all of its assets into one or more sub-funds (collectively "**AESIF Master**") of Ares European Credit Solutions Fund (Master) FCP, a master fund organised as a Luxembourg multi-compartment mutual fund (fonds commun de placement) governed by Part II of the Luxembourg Law of 17 December 2010. AESIF Master will invest through a subsidiary established as a Luxembourg special limited partnership (société en commandite spéciale). AESIF Master seeks to primarily self-originate investments and provide debt capital to European mid-market companies. AESIF Master will target an allocation of approximately 70% to 80% of its total assets in directly originated loans and other illiquid alternative credit investments such as secured and unsecured bonds and secured and unsecured senior and junior loans. To a lesser extent, AESIF Master will also target an allocation of approximately 20% to 30% of its assets in syndicated leveraged loans and high yield bonds and cash and/or cash equivalents (collectively, the "**Liquidity Sleeve**"). AESIF Master expects the Liquidity Sleeve generally will be liquid and may be used for the purposes of generating liquidity while also presenting an opportunity for attractive investment returns. Notwithstanding the preceding sentence, AESIF Master's investment in collateralised debt obligations, collateralised loan obligations, asset-backed securities, mortgage-backed securities and other securitised products are not intended to exceed 10% of its NAV, but may exceed this limit from time to time and on a temporary basis. The proceeds of the investments may be used to refinance, realise or otherwise repay loans or securities owned by other Ares-managed funds.

The Product is an alternative investment fund actively managed by the Manufacturer who serves as the Product's alternative investment fund manager for the purposes of the AIFMD. The Product does not give investors any discretion as to the Product's investments. Certain asset management techniques may be utilised at the Product-level, including leverage or debt for any purpose and derivatives for hedging and non-hedging purposes (derivative agreements entered into for speculative purposes are not expected to be material to the Product business or results of operations). The use of such techniques may impact the performance of the Product positively or negatively depending on the economic circumstances. Further information on the potential risks relating to these are set out in the Product's prospectus. The Product is compliant with Article 8 under the Sustainable Finance Disclosure Regulation (2019/2088) ("**SFDR**"), and as an Article 8 fund it promotes, among other characteristics, environmental or social characteristics, or a combination of those characteristics in the companies in which it invests in, but does not have as its objective "sustainable investments" within the meaning of SFDR.

Intended retail investor

The Product will be offered primarily through distributors or other financial intermediaries, which generally have client net worth thresholds and other requirements. The Product is only suitable for investors who (i) have sufficient experience and theoretical knowledge to assess the risks of investing in the Product; (ii) have a long-term investment horizon; and (iii) can bear the loss of their entire investment. For subscriptions within the first quarter following the date on which the Product accepts its first subscriptions from third-party investors, the minimum subscription of the Product will be the higher of (a) EUR 25,000 (or the equivalent in any currency as may be determined by the board of directors); or (b) the minimum subscription amount required under the local law of the relevant retail investor.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Lower risk						Higher risk
1	2	3	4	5	6	7

The risk indicator assumes you keep the product for a minimum of 0 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

Be aware of currency risk. The Product is denominated in AUD. You may receive payments in a different currency, so the final return you get will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Not all risks are captured by the summary risk indicator. Other risks should be considered before investing in the Product. Please refer to section XVII and Appendix A sub-section X of the prospectus for further information.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Investment performance information

Future performance will be driven principally by:
• The financial performance of the investments of AESIF Master. This performance could be affected by broader geopolitical and macro-economic factors, including economic growth, monetary policy (interest rates), inflation, energy markets and fiscal policy, among others;
• The ability of AESIF Master to continue to make new investments and realise or sell existing investments to crystallise returns. This ability is affected by the competitive dynamics in the private and public markets, broader market volatility and the availability of financing for investments, among other factors; and
• The valuation of AESIF Master's investments, which is based primarily on the financial performance of the underlying investments (i.e., company specific) as well as the wider macro-economic and market environment (i.e., not company specific).
Other factors that could impact performance include, but are not limited to, the ability to attract and retain able investment professionals, the evolving legal and regulatory landscape in which the Product and its investments operate, the performance of private and public credit markets, interest rate movements, and foreign exchange fluctuations.

What could affect my return positively?

Returns may be positively affected by how well the Product's investment manager selects investments and utilises certain investment strategies given the economic climate. Factors that could affect returns positively include the ability of the investment manager to manage such investments to deliver income and growth in value during the holding period. Investment performance could be supported further by a positive macro-economic environment and buoyant financial markets, as well as rising interest rates increasing the income generated by underlying debt investments. Leverage utilised by the Product can also positively impact returns.

What could affect my return negatively?

Returns may be negatively affected if AESIF Master's investments do not perform as expected. This could be for various reasons, including poor investment decisions by the Product's investment manager or due to a negative macro-economic outlook where a sustained period of economic uncertainty marked by inflationary or deflationary pressures and recessionary concerns could lead to high levels of default in the private credit investments into which AESIF Master invests a majority of its assets. Leverage utilised by the Product may also further negatively impact returns during a negative economic period.

Under severely adverse market conditions, there is a risk that the capital value of an investment in the Product's shares could reduce significantly, potentially down to zero.
Outcomes can also be affected by how long you keep your investment.

What happens if MPMF Fund Management (Ireland) Limited is unable to pay out?

You may face a financial loss (equal to some or all of your investment in the Product) due to the default of the Product. Such a potential loss is not covered by any investor compensation or guarantee scheme. The assets of the Product are held in safekeeping by its depositary; The Bank of New York Mellon SA/NV, Luxembourg branch (the "Depositary"). In the event of the insolvency of the Manufacturer, the Product's assets capable of being held in custody by the Depositary should not be affected but other assets could be impacted. In the event of the Depositary's insolvency, or a third party acting on its behalf, the Product may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Product. The Depositary will also be liable to the Product and the investors for any loss arising from, among other things, its negligent or intentional failure to properly fulfil its obligations (subject to certain limitations).

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Cost over time

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The tables below shows:
- The impact each year of the different types of costs on the investement return you might get at the end of the recommended holding period; and
- The meaning of the different cost categories.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest AUD 10 000,00. The figures are estimates and may change in the future.

Investment 10,000.00 AUD	
Scenarios	If you cash in at 0 year
Total costs	
Impact on return (RIY) per year	

Composition of costs

One-off costs	Entry costs		The impact of the costs you pay when entering your investment
	Exit costs		The impact of the costs of exiting your investment when it matures
Ongoing costs	Portfolio transaction costs		The impact of the costs of buying and selling underlying investments for the product
	Other ongoing costs		The impact of the costs that we take each year for managing your investments
Incidental costs	Performance fees		The impact of the performance fees. We take these from the product if it outperforms the relevant criteria as defined in the constituent documents
	Carried interests		The impact of carried interests

How long should I hold it and can I take money out early?

Recommended Holding Period: 0 Years.

This period has been chosen in order to make the Product comparable to other products and because the Product is only suitable as a long-term investment for persons of adequate financial means who do not need near-term liquidity from their investment. This is not a recommendation to redeem your investment after this time and while longer holding periods may allow greater time for the Product to implement its strategy, the outcome of any holding period with respect to investment returns is not guaranteed. Redeeming your shares in the Product before the end of the recommended holding period may be detrimental in terms of your return and may increase the risks associated with your investment, which may and could lead to the realisation of a loss. We do not expect there to be a public market for the Product and thus it may be difficult for you to sell your shares.

Redemptions are expected to be offered each month at the net asset value ("NAV") per share as of the last calendar day of the relevant month (each, a "Redemption Date"), in each case 18 months after the date upon which your subscription is first accepted ("Initial Subscription Period"). Shares redeemed within the Initial Subscription Period will incur an early redemption deduction of 5 % of the NAV of the shares being redeemed. Redeeming your shares in the Product before the recommended holding period may be detrimental in terms of your return and may increase the risks associated with your investment, and could lead to the realisation of a loss. For the avoidance of doubt, if you have made multiple purchases of shares, any redemption request will be processed on a first in / first out basis for the purposes of any potential early redemption deductions. Redemptions are generally limited to 2% of aggregate NAV per month (measured using the aggregate NAV as of the end of the immediately preceding month and 5% of such aggregate NAV per calendar quarter (measured using the average of such aggregate NAV as of the end of the immediately preceding three months). Redemption requests must be provided by 5 p.m. Central European Time on or before the close of business on the first Business Day of the month on which the Redemption Date falls. Settlements of share redemptions are generally expected to be within 2 Business Days after the date falling on the 15th Business Day of the month following the Redemption Date. In exceptional circumstances and not on a systematic basis, the Product's investment manager may make exceptions to modify or suspend, in whole or in part, the redemption program if in the investment manager's reasonable judgment it deems such action to be in the Product's best interest and in the best interests of the investors in the Product as a whole.

How can I complain?

Complaints may be referred to the Head of Distribution of MPMF Fund Management (Ireland) Limited in writing to the following registered address - MPMF Fund Management (Ireland) Limited, 32 Molesworth Street, Dublin 2, Co. Dublin, or, alternatively via e-mail - : #MPMF-Distribution@maples.com. A link to the relevant website for such complaints is www.maples.com/dublin/. Any complaints concerning the conduct of your advisor or distributor should be addressed to that advisor or distributor.

Other relevant information

The information contained in this KID is supplemented by the articles of incorporation and the prospectus, which will be provided to retail investors before subscription as required by law. Further information about the Product, including a copy of the prospectus, latest annual report and any subsequent semi-annual report, if available, can be found, free of charge, in English by contacting AWMSEurope@aresmgmt.com or AWMSAsia@aresmgmt.com.
