Zurich Target Retirement Fund 2055

Fund Objective

The Zurich Target Retirement Funds are a series of target-retirement portfolios. The fund seeks to achieve capital growth for investors planning to retire in or within approximately five years after 2055. The Fund will seek to achieve its investment objective predominantly through investment in passive, index tracking collective investment schemes.

Additional Information
The fund invests in a range of global shares, with an emphasis on European markets. The regional bias was somewhat unhelpful over the quarter as European shares underperformed those in other regions, most notably the US. Political uncertainties in France and Germany and the release of subdued economic indicators eroded sentiment. We used the weakness as an opportunity to top up the fund's exposure to European shares and to benefit from any improved performance in 2025. These purchases were funded by selling some of the fund's shareholdings in Asia, Japan, and the US. The latter performed particularly well, following Donald Trump's victory in November's election and amid suggestions that his 'America first' policies could help support profitability among US-listed firms.

Commentary
Market Commentary as at 31 December 2024: Both Equities and Bonds detracted from performance over the quarter, as most of the major asset classes posted negative returns. Within Bonds, performance was broadly negative across the fixed income spectrum, with US Treasuries and Emerging Market bonds being the key detractors to performance. US Treasuries came under pressure as markets mulled over the potential implications of a second Trump presidency. For Emerging Market assets, dollar strength proved to be a significant headwind, particularly for local currency denominated bonds. Within Equities, allocations to the broad US market, Financials and US Small-Cap stocks contributed positively to performance, given that
these were amongst the few parts of the market that managed to end in positive territory over the quarter. The broad US market benefitted from the continued participation of Large-Cap Growth stocks in the AI rally, whilst Financials and Small-Cap stocks firmed on the back of expectations that they would be key beneficiaries of a second Trump presidency. On the other hand, Emerging Market equities came under pressure, particularly Korean and Chinese equities.
