Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Jennison Global Equity Opportunities

Legal entity identifier: 549300R0JSEL2H47CS56

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:** ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund (defined herein as the "Product") changed its investment policy and reclassified from an Article 6 fund to an Article 8 fund under the SFDR with effect from 16 August 2022 (the "Transition Date"). From the Transition Date, the Product promoted one primary environmental characteristic (the "Sustainability Characteristic") which is the reduction of Carbon Intensity relative to the MSCI ACWI (All Country World Index) (the "Benchmark"). In order to measure the Product's promotion of the Sustainability Characteristic the Sub-Investment Manager used its investment process to select investments so that the Product's Weighted Average Carbon Intensity (WACI) was at least 50% lower than the WACI of the Benchmark. 'Weighted Average Carbon Intensity' is defined as a measurement of a portfolio's total Carbon Intensity, calculated as the sum product of the constituent weights and intensities.
The Product met the Sustainability Characteristic such that the Product's WACI was at least 50% lower than the WACI of the Benchmark for each month-end beginning from the Transition Date.

How did the sustainability indicators perform?

The Product's WACI was at least 50% lower than the WACI of the Benchmark each month since the Transition Date, ranging from 88.7% to 90.9% below the Benchmark. The % difference is calculated as (Product WACI – Benchmark WACI) / Benchmark WACI.

...and compared to previous periods?

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

[Include a statement for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852]
The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Product’s consideration of principal adverse impacts was achieved through the consideration of environmental and social issues (“PAI Sustainability Indicators”). The negative impacts of such PAI Sustainability Indicators on the Sustainability Factors considered and prioritised by the Sub-Investment Manager may vary depending on the industry and/or individual company but included the mandatory and additional PAI Sustainability Indicators as set out under the regulatory technical standards published by the European supervisory authorities in accordance with the SFDR. In addition, companies involved in specific activities deemed to have particularly negative impacts are excluded from the Product’s investible universe such as conflicts with the UNGC Principles, controversial weapons, nuclear weapons, civilian firearms, tobacco, adult entertainment, gambling and fossil fuels.

What were the top investments of this financial product?

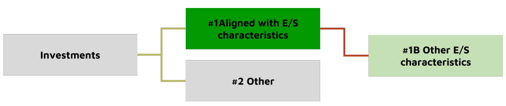
The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:

What was the proportion of sustainability-related investments?

As the Sustainability Characteristic is measured at the portfolio level, all equity investments in the portfolio were sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
C - MANUFACTURING		59.68%
	26 - Manufacture of computer, electronic and optical products	
	15 - Manufacture of leather and related products	
	29 - Manufacture of motor vehicles, trailers and semi-trailers	
	21 - Manufacture of basic pharmaceutical products and pharmaceutical preparations	
	14 - Manufacture of wearing apparel	
	20 - Manufacture of chemicals and chemical products	
	28 - Manufacture of machinery and equipment n.e.c.	
	11 - Manufacture of beverages	
	32 - Other manufacturing	
	27 - Manufacture of electrical equipment	
J - INFORMATION AND COMMUNICATION		20.68%
	58 - Publishing activities	
	63 - Information service activities	
	62 - Computer programming, consultancy and related activities	
G - WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES		10.44%
	47 - Retail trade, except of motor vehicles and motorcycles	
K - FINANCIAL AND INSURANCE ACTIVITIES		3.77%
	66 - Activities auxiliary to financial services and insurance activities	
N - ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES		1.41%
	77 - Rental and leasing activities	
M - PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES		1.04%
	72 - Scientific research and development	
Other		2.98%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

☐ ***Yes:***

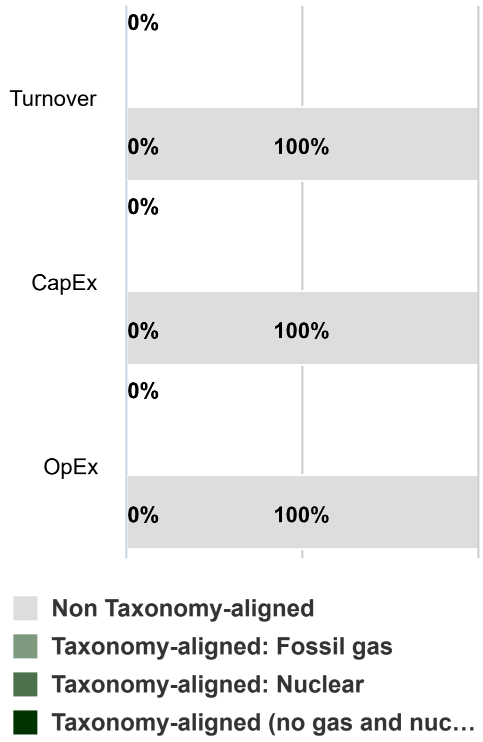
☐ ***In fossil gas*** ☐ ***In nuclear energy***

☒ ***No:***

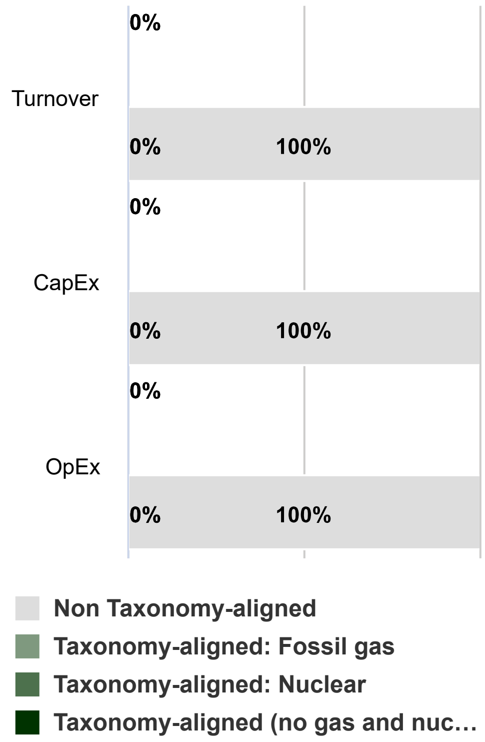
[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy alignment of investments **including sovereign bonds***



2. Taxonomy alignment of investments **excluding sovereign bonds***



This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Investment Manager used data provided by third party ESG research providers to assess a company's Carbon Intensity and using such data the Sub-Investment Manager, on a monthly basis, assessed the WACI for the Product. As stated above, the Product met the Sustainability Characteristic such that the Product's WACI was at least 50% lower than the WACI of the Benchmark during the reference period through the Sub-Investment Manager's investment process. No additional actions were necessary.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?
