You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

The fund contract of Swiss Life Flex Funds (CH) was drawn up by Swiss Life Asset Management AG, Zurich (formerly Swiss Life Funds AG, Lugano) as fund management under the name Swiss Life iFunds (CH) BVG Absolute Return (CHF) and as a sub-fund of the umbrella fund Swiss Life iFunds (CH) and, with the consent of Banca del Gottardo (now BSI AG), which was acting as custodian bank at the time, was first approved by the Swiss Federal Banking Commission (SFBC) (now the Swiss Financial Market Supervisory Authority FINMA) on 22 December 2005. Swiss Life iFunds (CH) is an umbrella fund whose sub-funds are reserved for qualified investors.

Duration

This product does not have a maturity date (in other words, it is open-ended). The manufacturer may terminate the product early. The amount you would receive if such early termination took place might be lower than the amount you invested.

Targets

The investment objective is to invest in a wide range of risk premiums and to generate profits through active asset allocation. In order to achieve this objective, the collective investment scheme invests predominantly in other collective investment schemes ('target funds'), subject to the following investment restrictions on a consolidated basis:- Equity securities max. 80%- Debt securities max. 80%- Money market instruments max. 100%- investments in precious metals and commodities max. 20%- No acquisition of funds of funds. The subfund is managed actively and without reference to a benchmark. Foreign currency risks are hedged to at least 90% against the Swiss franc. When selecting target funds, both qualitative and quantitative selection criteria are used. Quantitative criteria are, for example, the historical return, the sequence of losses, the portfolio concentration, etc. Qualitative criteria are, for example, the service providers involved, the professional qualifications of the asset managers, the quality of the legal documents, etc. The debt securities in which investments are made directly or indirectly may be issued by issuers with an investment grade rating as well as issuers without an investment grade rating. The investment decisions may be made freely within the framework of the investment objective and the investment policy. Recommendation: This collective investment scheme may not be suitable for investors who want to withdraw their money from the collective investment scheme in the short term.

The fund's return depends primarily on the development of the capital markets. The following factors play a role to varying degrees: Development of the stock markets and dividend payments, interest rates, creditworthiness of the issuers of the invested instruments and interest income. The return can also be influenced by exchange rate fluctuations if there are active or unhedged positions.

Small investor target group

This fund applies to retail investors with a basic financial understanding, who can accept a possible loss on the investment amount. The fund is aimed at growing the investment value, while granting daily access to the capital under normal market conditions. With their investment in this fund, investors can satisfy medium term investment needs. The fund is suited to be acquired subject to a test of the investor's financial knowledge and experience.

Custodian bank

UBS Switzerland AG, Zürich

About PDFreactor

RealObjects PDFreactor is a powerful formatting processor for converting HTML and XML documents into PDF. It uses Cascading Style Sheets (CSS) to define page layout and styles. The server-side tool enables a great variety of applications in the fields of ERP, eCommerce and Electronic Publishing.

PDFreactor supports HTML5, CSS3 and JavaScript.

It allows you to dynamically generate PDF documents such as invoices, delivery notes and shipping documents on-the-fly. PDFreactor allows you to easily add server-based PDF generation functionality to your application or service. Since PDFreactor runs on a server, the end-user in general does not need any software other than a PDF viewer.

What are the risks and what could I get in return?

Risk indicator

1	2	**3**	4	5	6	7

Lower risk **Higher risk**

This risk indicator is based on the assumption that you hold the product for 4 year(s).

The summary risk indicator (SRI) provides information about the risk level of this product compared to other products. It is derived from past returns and can indicate the likelihood of the product generating a loss due to future (unknown) market conditions.

The summary risk indicator (SRI) for this product is 3 out of 7, which is a medium to low risk class.

This classifies the potential losses from future performance as medium to low. The past is not a reliable guide to the future, so the actual risk of loss may vary significantly.

Please be aware that there is a possible currency risk if your reference currency is not the same as the currency of the product. You will receive payments in another currency, which means that your final return will depend on the exchange rate between these two currencies. The indicator above does not capture that risk.

The product can be subject to other risk factors which are not included in the summary risk indicator (SRI), such as operational, political and legal risks. See the prospectus for further details.

This product does not incorporate any protection against future market developments, meaning that you may lose all or part of the invested capital.

If we are unable to pay you what you are entitled to, you could lose all the invested capital.

However, you may possibly benefit from a set of consumer protection rules (see section “What happens if we unable to make a payment?”). This protection is not taken into account in the indicator stated above.

Performance Scenarios

What you get back from this product depends on future market developments. Future market developments are uncertain and and cannot be predicted exactly.

The unfavourable, moderate and favourable scenarios shown are merely examples that show the product's worst, average and best performance in the last 10 years. The markets may develop quite differently in the future.

Recommended holding period:		**4 years**	
Example Investment:		**CHF 10000**	
		If you exit after 1 year	**If you exit after 4 years**
Scenarios			
Minimum	There is no guaranteed minimum return if you terminate your investment within 4 year(s). You could lose all or part of your investment.		
Stress	What you might get back after costs	CHF 6120	CHF 6510
	Average return each year	-34.3%	-10.2%
Unfavourable	What you might get back after costs	CHF 8470	CHF 8600
	Average return each year	-15.3%	-3.7%
Moderate	What you might get back after costs	CHF 9320	CHF 9480
	Average return each year	-2.1%	-2.1%
Favourable	What you might get back after costs	CHF 10600	CHF 10440
	Average return each year	6.0%	1.1%

The stress scenario shows what you could get back in extreme market conditions.

The figures shown include all costs for the product itself. The figures shown do not take your personal tax situation into account. This can also influence the amount that you get back.

These types of scenarios occurred for an investment between 2012-11-01 and 2022-10-01.

What happens if Swiss Life Asset Management AG is unable to pay out?

Losses are not covered by any investor compensation or guarantee scheme. In addition, in relation to UBS Switzerland AG, Zürich, which as the Fund's custodian is responsible for the safekeeping of its assets (the "Custodian"), there is a potential risk of default in the event that the Fund's assets held with the Custodian are lost. However, this risk of default is limited as the Custodian is required by law and regulation to segregate its own assets from the Fund's assets. The Custodian shall be liable to the Fund or the Fund's investors for any loss of a financial instrument held in custody by the Custodian or its delegate, unless the Custodian can demonstrate that the loss resulted from an external event beyond its control.

What are the costs?

The person who provides advice on or sells you this product may charge you additional costs. In this case, this person will inform you of these costs and how they impact your investment.

Costs over time

The tables show the amounts that will be deducted from your investment to cover various types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product performs. The examples given here are based on different investment amounts and different investment periods.

We make the following assumptions:

- in the first year, you will get back the amount you invested (0% annual return). For the other holding periods, we have assumed that the product will perform according to the moderate scenario.

- 10,000.00 CHF is invested.

	If you exit after 1 year	If you exit after 4 years
Total costs	CHF 828	CHF 1206
Annual cost impact (*)	8.3%	3.2% each year

(*) This illustrates how costs reduce your return each year during the holding period. For example, if you terminate your investment after the recommended holding period, your average return per year is estimated to be 1,9% before costs and 1,9% after costs.

We may share some of the charges with the person who sells you the product to cover the services they provide to you. This person will inform you about the amount.

Summary of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	5,00% of the amount you pay in when entering this investment. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	Up to CHF 500
Exit costs	2,00% of your investment before it is paid out to you.	CHF 187
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1,4% of the value of your investment per year. This is an estimate that is based on last year's actual costs. For products launched less than one year ago, this is an estimate based on the representation costs.	CHF 138
Transaction costs	0,1% of the value of the investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	CHF 10
Incidental costs taken under specific conditions		
Performance fees	No performance-related fee is charged for this product.	CHF 0

Additional information on costs can be found in the sales prospectus at www.swisslife-am.com

How long should I hold it and can I take money out early?

Recommended holding period: 4 Year(s)

The recommended holding period for this product is 4 year(s). This is the holding period we recommend based on the risk and the expected return on the product. Please note that the expected return is not guaranteed. The more the actual holding period deviates from the recommended holding period of the product, the more your actual risk return will deviate from the product assumptions. Depending on your needs and restrictions, a different holding period may be suitable for you. We therefore recommend that you discuss this point with your client advisor.

How can I complain?

If you have a complaint about the product, the product manufacturer or the person who recommended or sold the product to you, please speak to your client advisor or contact us on {Website}.

Other relevant information

Information about the historical performance and calculations of earlier performance scenarios can be found at {website}.
