You are about to purchase a product that is not simple and may be difficult to understand.

En quoi consiste ce produit ?

Type

This is an closed ended investment trust.

Term

There is no maturity date of the fund

Investment objective

The Company seeks to provide a high rate of total return through investment in equities and equity-related securities of companies trading in the Asia Pacific region (excluding Japan). The Company seeks to offer a degree of capital preservation through tactical use of derivative instruments.

The Company invests principally in a diversified portfolio of 40-70 companies operating primarily in Asia, including Australasia but excluding Japan. It is intended that the Company will have a bias to investing in small and mid cap companies. Investments may be made in companies listed on the stock markets of countries located in the region and/or listed elsewhere but controlled from within the region and/or with a material exposure to the region. The Company will focus on investing in companies with sound balance sheets, professional management and capital allocation policies that are aligned with the interests of minority shareholders.

The use of derivatives to protect the capital value of the portfolio or for efficient portfolio management is fundamental to the strategy of the Company's Portfolio Managers. Such derivatives may include listed futures, call options, long puts, OTC instruments and instruments to hedge currency exposure with Board approval. The Board will monitor the effectiveness of the underlying process and the use of derivatives.

In order to obtain further exposure to equity indices or individual stocks, the Company may enter into contracts for difference where the underlying investments are not delivered and settlement is made in cash. In extreme circumstances, and subject to Board approval, the majority, or even all, of the Company's assets could be held in cash or near cash instruments, with appropriate diversification of cash held on deposit.

The Company may use gearing to enhance performance but net gearing will not exceed 30% of net asset value. The Company does not tie its portfolio construction to the constituents of any benchmark; instead, the size of stock positions are set on an absolute basis reflecting where the best potential risk adjusted returns are to be found.

Recommendation: Investors should seek independent advice or satisfy themselves that they have an understanding of the strategies and techniques employed by the manager.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently. The fund may use leverage and take short positions.

The fund is valued with reference to the net asset value of the underlying assets.

Intended retail investor

The fund is intended for retail and institutional investors.

Benchmark: The Company does not tie its portfolio construction to the constituents of any benchmark; instead, the size of stock positions are set on an absolute basis reflecting where the best potential risk adjusted returns are to be found.

Quels sont les risques et qu’est-ce que cela pourrait me rapporter ?

Risks

1	2	3	4	5	6	7

Risque le plus faible — Risque le plus élevé

The risk indicator assumes you keep the product for {rhp} years.

You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The product is in this category because it seeks to provide rewards whilst limiting price volatility.

The following factors serve to increase risk and may lead to higher volatility in the Company's share price: it invests in assets which are exposed to foreign currencies; it invests in emerging markets and the Far East; it may invest in unregulated collective investment schemes; it has borrowed (or "geared") to purchase assets; and it uses derivatives for specific investment purposes.

You can find more information about the other risks in the prospectus at: {bold}www.schroders.co.uk/satric{/bold}.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

The Company has no significant exposure to credit risk. None of the Company's investments represent more than 10% of its net asset value.

Scénarios de performance

Période de détention recommandée:		**10 ans**		
Exemple d'investissement:		**$10000**		
		Si vous sortez après 1 an	**Si vous sortez après 5 ans**	**Si vous sortez après 10 ans**
Scénarios				
Minimum	**Il n’existe aucun rendement minimal garanti si vous sortez avant 10 années . Vous pourriez perdre tout ou une partie de votre investissement.**			
Tensions	**Ce que vous pourriez obtenir après déduction des coûts**			
	Rendement annuel moyen			
Défavorable	**Ce que vous pourriez obtenir après déduction des coûts**			
	Rendement annuel moyen			
Intermédiaire	**Ce que vous pourriez obtenir après déduction des coûts**			
	Rendement annuel moyen			
Favorable	**Ce que vous pourriez obtenir après déduction des coûts**			
	Rendement annuel moyen			

Note that the figures shown also reflect the maximum redemption fee of {redemptionfee}. This fee may be applicable at the discretion of the Directors from time to time, in the event that the Fund would need to make asset sales in the secondary market at a spread to meet redemption requests.

The scenarios presented are an estimate of future performance based on evidence from the past, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, including performance fees when these are applied, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

This table shows the money you could get back over the next {RHP} years, under different scenarios, assuming that you invest {scCurrency} {investmentAmount}.

Que se passe-t-il si #^ManufacturerName^# n'est pas en mesure d’effectuer les versements ?

You may sell your shares at any time on the London Stock Exchange using your broker. Your shares are sold to another buyer in the market without recourse to the Company. If the Company goes into liquidation the investments will be sold and you will receive your pro rata share of the proceeds after settlement of any liabilities. You would not be entitled to compensation from the Financial Services Compensation Scheme.

Que va me coûter cet investissement ?

Costs over time

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be {AverageReturnBeforeCosts} % before costs and {AverageReturnAfterCosts} % after costs.

Created with RealObjects PDFreactor(R) Evaluation Version | https://www.pdfreactor.com

The person selling or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods and are based on an investment of {scCurrency} {investmentAmount}. The figures are estimates and may change in the future.

	Si vous quittez après 0 année
Coûts totaux	
Incidence des coûts	

Composition of costs

The table below shows:{break}- the impact each year of the different types of costs on the investment return you might get at the end of Recommended Holding Period;{break}- the meaning of the different cost categories.

Coûts ponctuels à l'entrée ou à la sortie	
Coûts d'entrée	These costs are already included in the price you pay when entering this investment. This is the most you will be charged. The person selling you the product will inform you of the actual charge.
Coûts de sortie	These costs are charged as a % of your investment before it is paid out to you.
Coûts récurrents prélevés chaque année	
Frais de gestion et autres frais administratifs et d'exploitation	These costs are an estimate based on actual costs over the last year that we take each year for managing your investments.
Coûts de transaction	This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell
Coûts accessoires prélevés sous certaines conditions	
Commissions liées aux résultats (et commission d'intéressement)	There is no performance fee charged on the fund

Combien de temps dois-je le conserver et puis-je retirer de l'argent de façon anticipée ?

In order to seek to minimise the effect of shorter term cyclical fluctuations in the market, the recommended minimum holding period for the Company's shares is at least 5 years. Shares in the Company may be bought and sold at any time on the London Stock Exchange using your broker.

Comment puis-je formuler une réclamation ?

Should you wish to complain about your investment in the Company or any aspect of the service provided to you by Schroders, please write to the Board c/o the Company Secretary at 1 London Wall Place, London EC2Y 5AU, or send an email to: investorservices@schroders.com

Autres informations pertinentes

Depending on how you buy these shares you may incur other costs, including broker commission, platform fees and Stamp Duty. The distributor will provide you with additional documents where necessary.

This Key Information Document is updated at least every 12 months, unless there are any ad-hoc changes.

Tax legislation:{/bold} The Company is subject to UK tax legislation which may have an impact on your personal tax position.

Distribution Policy: This share class pays an annual distribution at a variable rate based on gross investment income.

Depository: HSBC Bank plc

The cost, performance and risk calculations included in this Key Information Document follow the methodology prescribed by EU rules.
