Julius Bär

UK EQUITY HIGH INCOME (UK)

a sub-fund of Main Fund Name
As of July 2023

Class Acc EUR

Fund Overview

Objective

The objective of the Fund is to achieve a high level of income (greater than the income return of the FTSE ALL Share Index over a rolling 5 year period) and capital growth over the long term (5 years plus). The Fund invests at least 80% of its assets in shares of companies incorporated, domiciled or carrying out the main part of their economic activity in the UK. The Fund may also invest in private and unlisted equities and non-UK companies. The Fund may use derivatives (complex instruments) to manage the Fund more efficiently, with the aim of reducing risk, reducing costs and/or generating additional capital or income. The Fund has an active investment approach based on stock selection driven by the fund manager's assessment of valuation and invests in companies that enable the Fund to grow its dividend and deliver capital appreciation. The Fund is not constrained by a benchmark and has a flexible approach with no inbuilt bias to sector or company size.

Investment thesis

• This actively managed fund provides exposure to long-term structural growth trends across a selection of five key themes, namely Arising Asia, Digital Disruption, Energy Transition, Feeding the World and Shifting Lifestyles.
• Investors benefit from access to an experienced team that has a deep understanding of megatrends, industry dynamics and their impact on the respective companies within selected subthemes.
• This fund is aimed at investors looking to obtain thematic exposure to companies in structurally growing industries. The managers apply a market exposure approach. Hence, the fund is expected to move in line with the underlying market and to outperform its benchmark over an investment cycle.

Key risks

• The fund invests in equities and equity-related securities whose value can be affected by daily stock market movements. Other influential factors include political and economic news, company earnings and significant corporate events.
• The fund is concentrated in a limited number of industry sectors and, as a result, may be more volatile than a fund invested in a broader universe.
• A significant portion of the fund may be invested in emerging markets (mainly China). These markets are generally more sensitive to economic and political conditions than developed markets. Emerging market securities may also be subject to higher volatility and lower liquidity than non-emerging market securities.
• As this is an actively managed fund, with a mid- to long-term investment horizon, it may deviate from and underperform its benchmark in the shorter term

Important legal information

This publication has been produced by Bank Julius Baer & Co. Ltd., Zurich, which is authorised and regulated by the Swiss Financial Market Supervisory Authority (FINMA). This publication series is issued regularly. Information on financial instruments and issuers is updated irregularly or in response to important events.

Disclosures

The Julius Baer Group Ltd. and its affiliated companies (the "Group") may enter into transactions for their own account or for the account of other investors that are related to the bonds that may be mentioned in this publication (issuers BNP Paribas, Citigroup, Credit Suisse, Deutsche Bank, UBS). Furthermore, the Group may have or have had a (co-lead) role in the issuance of the Bonds or other debt instruments of the relevant companies. Accordingly, conflicts of interest may arise between the Group and the client. If so, the Group strives to provide fair and equitable treatment of such conflicts.
