BlackRock ESG Fixed Income Strategies

Fund Objective

The BlackRock ESG Fixed Income Strategies Fund seeks to achieve positive total returns over a rolling three year cycle in a manner consistent with the principles of environmental, social and governance “ESG” focused investing and seeking to reduce its carbon emissions profile by allocating to green bonds, lower carbon emitting issuers and issuers committed to decarbonisation. The Fund will seek to achieve this investment objective by taking long, synthetic long and synthetic short investment exposures. The Fund will seek to gain at least 70% of its investment exposure through fixed income transferable securities and fixed income related securities (including derivatives) issued by, or giving exposure to, governments, agencies and / or companies worldwide. The Fund will seek to achieve this investment objective by investing at least 70% of its total assets in fixed income transferable securities and fixed income related securities, currency forwards and, when determined appropriate, cash and near-cash instruments. The asset allocation of the Fund is intended to be flexible and the Fund will maintain the ability to switch exposure as market conditions and other factors dictate. The currency exposure of the Fund is flexibly managed. The Fund seeks to invest in Sustainable Investments, including, but not limited to, “green bonds” (as defined by its proprietary methodology which is guided by the International Capital Markets Association Green Bond Principles) and its total assets will be invested in accordance with the ESG Policy. For futher information please refer to the underlying fund manager factsheet.

Fund Information

Fund Management Company	Zurich International
Zurich Fund Code	USDTT
Underlying ISIN	LU1046547540

All funds carry certain risks, and it is important to consider these risks before making an investment decision. The value of investments and any income derived from them is not guaranteed; they can both fall and rise and may be eroded in real terms by the effects of inflation.

Key factors that may increase these risks include, but are not limited to:
- The proportion of assets held overseas,
- Any concentration in specific geographic areas or industry sectors,
- The amount invested in property or property-related shares,
- The use of derivatives and other financial instruments intended to generate outperformance,
- Additional charges that may reduce the number of units you hold.

Glossary for some of terms used in this factsheet is available in our Fund Centre guide.

ZURICH

Additional Information

The fund invests in a range of global shares, with an emphasis on European markets. The regional bias was somewhat unhelpful over the quarter as European shares underperformed those in other regions, most notably the US. Political uncertainties in France and Germany and the release of subdued economic indicators eroded sentiment. We used the weakness as an opportunity to top up the fund's exposure to European shares and to benefit from any improved performance in 2025. These purchases were funded by selling some of the fund's shareholdings in Asia, Japan, and the US. The latter performed particularly well, following Donald Trump's victory in November's election and amid suggestions that his 'America first' policies could help support profitability among US-listed firms.

Commentary

Market Commentary as at 31 December 2024: Both Equities and Bonds detracted from performance over the quarter, as most of the major asset classes posted negative returns. Within Bonds, performance was broadly negative across the fixed income spectrum, with US Treasuries and Emerging Market bonds being the key detractors to performance. US Treasuries came under pressure as markets mulled over the potential implications of a second Trump presidency. For Emerging Market assets, dollar strength proved to be a significant headwind, particularly for local currency denominated bonds. Within Equities, allocations to the broad US market, Financials and US Small-Cap stocks contributed positively to performance, given that these were amongst the few parts of the market that managed to end in positive territory over the quarter. The broad US market benefitted from the continued participation of Large-Cap Growth stocks in the AI rally, whilst Financials and Small-Cap stocks firmed on the back of expectations that they would be key beneficiaries of a second Trump presidency. On the other hand, Emerging Market equities came under pressure, particularly Korean and Chinese equities.
