## Overview

The Fund's investment objective is to achieve capital growth over the medium term, which should be considered as a period of 3-5 years by predominantly investing globally in the shares of companies listed on Recognised Markets that are deemed to make a positive contribution to society. The Fund's performance target is to outperform, after the deduction of charges, the MSCI All Countries World Net Total Return Index USD (the "Benchmark") by 2.5% per annum over rolling three year periods. Investments in the Fund will adhere to the Investment Manager's Ethical and Sustainable Investment Policy, as detailed in the "Responsible Investment" section of the Prospectus.

## Yield Definitions

The historic yield reflects distributions declared over the past twelve months as a percentage of the mid-market price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. Reported yields reflect RLAM's current perception of market conventions around timing of bond cash flows.

## Important Information

This is a financial promotion and is not investment advice.

The Fund is a sub-fund of Royal London Asset Management Funds plc, an open-ended investment company with variable capital (ICVC), with segregated liability between sub-funds. Incorporated with limited liability under the laws of Ireland and authorised by the Central Bank of Ireland as a UCITS Fund. It is a recognised scheme under the Financial Services and Markets Act 2000. The Management Company is FundRock Management Company SA, Registered office: 33 rue de Gasperich, L – 5826 Hesperange, Luxembourg and is authorised and regulated by the Commission de Surveillance du Secteur Financier (CSSF). The Investment Manager is Royal London Asset Management Limited. For more information on the Fund or the risks of investing, please refer to the Prospectus or Key Investor Information Document (KIID), available via the relevant Fund Information page on www.rlam.com. Most of the protections provided by the UK regulatory system, and the compensation under the Financial Services Compensation Scheme, will not be available.

Issued by Royal London Asset Management Limited, 80 Fenchurch Street, London EC3M 4BY. Authorised and regulated by the Financial Conduct Authority, firm reference number 141665. A subsidiary of The Royal London Mutual Insurance Society Limited.

## ESG Terms and Definitions

**ESG Integration:** The systematic and explicit inclusion of environmental, social and governance (ESG) factors into investment analysis and investment decisions.

**Promotes Environmental or Social Factors: :** An ESG Fund promotes, among other characteristics, environmental or social characteristics, or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices.

**Sustainable Fund Objective:** A product that has sustainable investment or a reduction in carbon emissions as its objective.

**Exclusions:** Explicitly prohibits investing in a particular company, sector, business activity, country or region.

## ESG Metrics Explanation

**Carbon Footprint:** Exposure to high emitters in the portfolio, expressed in $tCO_2e$/\$M invested. Financed emissions (explained above) are divided by the portfolio value, the same approach for listed companies and private issuers is applied in this metric.

**Financed Emissions:** The emissions from activities in the real economy that are financed through lending and investment portfolios, expressed in $tCO_2e$. Emissions are attributed to a portfolio based on the portion of the company's value the portfolio holds, and using different accounting values for public and private corporates. We provide financed emissions for scope 1 and 2 emissions.

**Weighted Average Carbon Intensity:** Portfolio's exposure to carbon-intensive companies, expressed in $tCO_2e$ / \$M revenue. Scope 1 and scope 2 GHG emissions are divided by companies revenues, then multiplied based on portfolio weights (the current value of the investment relative to the current portfolio value). The WACI is calculated as a weighted average sum of the holdings with carbon intensity coverage.

## ESG Characteristics Rationale

The Fund focuses on the sustainability of the products and services of the companies it invests in, as well as their standards of environmental, social, governance ("ESG") management, alongside financial analysis. The investment approach is fundamentally based on positive screening; identifying companies that are making a positive contribution towards a cleaner, healthier, safer and more inclusive society, through assessing both what a company does and how it does it, and through active engagement to encourage continual improvement. The fund will not invest in companies that undertake business activities deemed to be detrimental to society and that breach our Do No Significant Harm principle. Further details of the Funds Sustainable Investment process can be found in the ethical and sustainable investment policy at www.rlam.com

### Key Concepts to Understand

**Capital Growth:** The rise in an investment's value over time.
**Derivatives:** A financial instrument whose price is dependent upon or derived from one or more underlying asset. Derivatives are typically used to hedge the relevant share classes.
**Equities:** Securities that represent an ownership interest in a company.
**Efficient Portfolio Management (EPM) Techniques** The Fund may engage in EPM techniques including holdings of derivative instruments. The use of these instruments may expose the Fund to volatile investment returns and increase the volatility of the net asset value of the Fund. EPM techniques may involve the Fund entering into transactions with counterparties where there may be a risk of counterparty default. The Fund's ability to use EPM strategies may be limited by market conditions, regulatory limits and tax considerations.
**Environmental, social and governance:** A list of pred Environmental, social and governance efined criteria that determines how a company operates in terms of sustainability and overall corporate governance

### Fund Risks

**Investment Risk:** The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.
**Concentration risk:** The price of Funds that invest in a reduced number of holdings, sectors, or geographical areas may be more heavily affected by events that influence the stockmarket and therefore more volatile.
**Counterparty Risk:** The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
**Emerging Markets Risk:** Investing in Emerging Markets may provide the potential for greater rewards but carries greater risk due to the possibility of high volatility, low liquidity, currency fluctuations, the adverse effect of social, political and economic instability, weak supervisory structures and accounting standards.
**Exchange Rate Risk** Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.
**Liquidity Risk** In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.
**Responsible Investment Style Risk** The Fund can only invest in holdings that demonstrate compliance with certain sustainable indicators or ESG characteristics. This reduces the number of securities in which the Fund can invest and there may as a result be occasions where it forgoes more strongly performing investment opportunities, potentially underperforming non-sustainable funds.
