Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Asset Manager Full Equties (EU) Sustainable Energy Impact

Legal entity identifier::949381BDK45

Sustainable investment objective

Did this financial product have a sustainable investment objective?

☐ **Yes** | ☐ **No**

☐ It made **sustainable investments with an environmental objective**: 96.92%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: 55.85%

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The fund was launched in April 23rd 2024 a week prior to the end of the fund's fiscal year end which is the reporting reference period. We'll provide the fund's relevant data in the fund's next report. The fund aims to achieve capital growth over the long term and provide income by investing in sustainable investments. The fund determines a sustainable investment as follows:
(a) issuers whereby the majority of their economic activities (more than 50%) either:
(i) contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or,
(ii) contribute to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) issuers which contribute towards a decarbonization objective consistent with maintaining the global temperature rise below 1.5 degrees; or
(c) sustainable use of proceeds bonds which use the proceeds for specific activities, assets or projects that contribute to environmental or social objectives; provided they do no significant harm, meet minimum safeguards, and for investee companies only, meet good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website: https://sdgs.un.org/goals .
Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action.
Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.
No reference benchmark has been designated for the purpose of attaining the sustainable investment objective.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The fund was launched in April 23rd 2024 a week prior to the end of the fund's fiscal year end which is the reporting reference period.

The E&S characterics displayed above are representative of the values that we have tried to achieve. We invested heavily in environmental and sustainable characteristics to achieve the results that we did.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

...and compared to previous periods?

The fund was launched in April 23rd 2024 a week prior to the end of the fund's fiscal year end which is the reporting reference period.

Created with RealObjects PDFreactor(R) Evaluation Version | https://www.pdfreactor.com

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do not significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered
through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:

3/31/2025 12:00:00 AM

Largest investments	Sector	% Assets	Country
Amedisys, Inc.	Health Care	4.09%	United States
ANSYS, Inc.	Information Technology	3.94%	United States
Juniper Networks, Inc.	Information Technology	3.82%	United States
Discover Financial Services	Financials	3.79%	United States
Axonics, Inc.	Health Care	3.19%	United States
DS Smith PLC, 12/26/49	Materials	3.18%	United Kingdom
HashiCorp, Inc.	Information Technology	3.05%	United States
Catalent, Inc.	Health Care	2.96%	United States
Albertsons Cos., Inc.	Consumer Staples	2.75%	United States
Kindred Group PLC	Consumer Discretionary	2.65%	Malta
ChampionX Corp.	Energy	2.59%	United States
Westrock Co.	Materials	2.47%	United States
Heartland Financial USA	Financials	2.16%	United States
McGrath RentCorp	Industrials	1.98%	United States
Stericycle, Inc.	Industrials	1.98%	United States

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024.The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the asset allocation?

The fund was launched in April 23rd 2024 a week prior to the end of the fund's fiscal year end which is the reporting reference period.

Asset allocation describes the share of investments in specific assets.

No. 1 Sustainable covers sustainable investments with environmental or social objectives.

No. 2 Not sustainable includes investments which do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector&Sub-sector	Weight
Health Care	18.02%
Health Care Providers & Services	6.46%
Health Care Equipment & Supplies	4.87%
Pharmaceuticals	3.68%
Biotechnology	2.91%

The following data is as at April 30th 2024.This data includes all securities,excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

Notes for these sections are not mandatory for all products and depend on what you're including in the report. This can be included or opted out of.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Notes for these sections are not mandatory for all products and depend on what you're including in the report. This can be included or opted out of.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund was launched in April 23rd 2024 a week prior to the end of the fund's fiscal year end which is the reporting reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ **Yes:**

☐ **In fossil gas** ☐ **In nuclear energy**

☐ **No:**

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is as at April 30th 2024.This data includes all securities,excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

What was the share of investments made in transitional and enabling activities?

The fund was launched in April 23rd 2024 a week prior to the end of the fund's fiscal year end which is the reporting reference period.

Transitional Activities: 34.00%

Enabling Activities: 45.00%

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The fund was launched in April 23rd 2024 a week prior to the end of the fund's fiscal year end which is the reporting reference period.

Notes for these sections are not mandatory for all products and depend on what you're including in the report. This can be included or opted out of.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The fund was launched in April 23rd 2024 a week prior to the end of the fund's fiscal year end which is the reporting reference period.

What was the share of socially sustainable investments?

The fund was launched in April 23rd 2024 a week prior to the end of the fund's fiscal year end which is the reporting reference period.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to attain the sustainable investment objective during the reference period?

The fund took the following actions to meet the sustainable investment objective:
1. The fund made sustainable investments.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative ESG characteristics.
3. The fund has applied the Exclusions.

How did this financial product perform compared to the reference sustainable benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial.

Notes for these sections are not mandatory for all products and depend on what you're including in the report. This can be included or opted out of.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social
