The value of investments and any income from them can go down as well as up and you may not get back the amount originally invested.

Investors should note that actual portfolio returns may be different to the returns of the model portfolio. Figures represent performance of a model portfolio, individual account performance may differ.

Past performance is not a guide to future performance. Levels and bases for taxation may change.

CF Fund

Investment objective

The investment objective of the Fund is to provide a combination of investment growth and income, the Fund will seek to achieve its objective on an active basis. The Fund seeks to achieve its investment objective by outperforming its benchmark, theBofA Merrill Lynch BB-B Global Non-Financial High Yield Constrained Index (the "Benchmark") by 1% per annum over rolling three year periods. The Benchmark is being used by the Fund for performance comparison purposes only and the Fund does not intend to track the Benchmark.

About PDFreactor

RealObjects PDFreactor is a powerful formatting processor for converting HTML and XML documents into PDF. It uses Cascading Style Sheets (CSS) to define page layout and styles. The server-side tool enables a great variety of applications in the fields of ERP, eCommerce and Electronic Publishing.

PDFreactor supports HTML5, CSS3 and JavaScript.

It allows you to dynamically generate PDF documents such as invoices, delivery notes and shipping documents on-the-fly. PDFreactor allows you to easily add server-based PDF generation functionality to your application or service. Since PDFreactor runs on a server, the end-user in general does not need any software other than a PDF viewer.

Portfolio Manager commentary

It was pleasing to see positive returns for our ESG portfolios in what were very volatile market conditions. This was a quarter where markets were spooked by two major worries: whether higher levels of inflation would be persistent rather than transitory and whether the COVID-19 Omicron variant would be concerning enough to cause widespread economic and social harm. Generally it was a quarter where outperformance was limited to areas like oil, banks and megacap technology stocks.

Our strategy prefers to target longer term growth stories and sees more value in smaller disruptive companies. Pleasingly, some of our favoured structural themes such as smart materials, robotics, timber and clean water were very resilient in this trickier investment backdrop. Worries surrounding worker shortages in areas like healthcare and manufacturing were part of the inflation narrative. Robotics and automation can potentially help alleviate some of this burden and we saw examples of companies announce more investment in this area.

Our strategy prefers to target longer term growth stories and sees more value in smaller disruptive companies. Pleasingly, some of our favoured structural themes such as smart materials, robotics, timber and clean water were very resilient in this trickier investment backdrop. Worries surrounding worker shortages in areas like healthcare and manufacturing were part of the inflation narrative. Robotics and automation can potentially help alleviate some of this burden and we saw examples of companies announce more investment in this area.

On a different note, we also saw some major announcements from both governments and companies at COP 26 around electric vehicles. This theme is less a play on which car company will be the winner but more a structural innovation story on batteries becoming cheaper and more powerful. We made no changes to the portfolios this quarter but have been considering further investment into infrastructure, an area we like both from an inflation protection perspective as well as offering useful diversification benefits.
