Market Commentary

Hedged Developed Markets Overseas Shares delivered a 2.8% return. US indices were broadly in line with international developed markets, however, Emerging Markets (unhedged) outperformed with a positive 4.9% return. Value modestly outperformed growth over the period, although when looking on a year-to-date basis, mega-cap tech stocks still dominate returns and has led to increased market concentration within that segment of global markets. Hedged Overseas Government Bonds returned -0.4% over the month, as bond yields across most regions increased in July. Yields on both key long bonds in the US (10-year and 30-year) rose by approximately 15bps over the month. The UK was the only major economy where the 10-year yield fell, albeit modestly. Australian Shares returned 2.9%, marginally outperforming their overseas counterparts in July. Financials (4.9%) and Energy (8.4%) were the strongest sectors of the market, while Healthcare (-1.5%), and Materials (1.4%) detracted.

Economic Outlook

In July, global equity markets maintained current upward momentum with most regions delivering solid, positive returns. On the other hand, fixed income performance was mixed, although in this “risk on” phase of the cycle, riskier parts of the sector fared better. A combination of further declines in headline inflation, resilient economic data, particularly from the US, and market expectations that the current interest rate hiking cycle is nearing an end, led to positive investor sentiment throughout the month.

Inflation data continued to decline, somewhat aided by the impact of last year’s energy price surge rolling off. US headline CPI fell to 3.0% pa and is at the lowest level since early 2021. Similarly, CPI data across the UK, Eurozone and Australia, continues to show easing inflationary conditions, albeit at higher levels than the US. Central banks continued to emphasise a data-driven approach to future rate adjustments. In the US, which is furthest ahead in the inflation cycle, markets are now pricing in a greater than 50% chance that the Fed’s policy rate has peaked and interest rate cuts maybe forthcoming in 2024.
