Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: **Legal entity identifier:**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes No

It made **sustainable investments with an**

It **promoted Environmental/ Social (E/S) characteristics**

in economic activities that qualify
as environmentally sustainable

with an environmental objective
in economic activities that qualify

in economic activities that do not
qualify as environmentally

with an environmental objective
in economic activities that do not

with a social objective

It made **sustainable investments with a social**

It promoted E/S characteristics, but **did not make any**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

...and compared to previous periods?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Asset allocation describes the share of investments in specific assets.

Sector	**Sub-sector**	**% Assets**
C - MANUFACTURING		25.06%
	19 - Manufacture of coke and refined petroleum products	
	12 - Manufacture of tobacco products	
	21 - Manufacture of basic pharmaceutical products and pharmaceutical preparations	
	23 - Manufacture of other non-metallic mineral products	
	20 - Manufacture of chemicals and chemical products	
	32 - Other manufacturing	
	10 - Manufacture of food products	
G - WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES		14.36%
	47 - Retail trade, except of motor vehicles and motorcycles	
	46 - Wholesale trade, except of motor vehicles and motorcycles	
K - FINANCIAL AND INSURANCE ACTIVITIES		15.69%
	64 - Financial service activities, except insurance and pension funding	
	65 - Insurance, reinsurance and pension funding, except compulsory social security	
	66 - Activities auxiliary to financial services and insurance activities	
D - ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY		10.95%
	35 - Electricity, gas, steam and air conditioning supply	
J - INFORMATION AND COMMUNICATION		3.95%
	58 - Publishing activities	
B - MINING AND QUARRYING		9.18%
	6 - Extraction of crude petroleum and natural gas	
	7 - Mining of metal ores	
I - ACCOMMODATION AND FOOD SERVICE ACTIVITIES		4.90%

Sector	Sub-sector	% Assets
	56 - Food and beverage service activities	
N - ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES		2.91%
	82 - Office administrative, office support and other business support activities	
	77 - Rental and leasing activities	
E - WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES		2.46%
	36 - Water collection, treatment and supply	
M - PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES		1.11%
	71 - Architectural and engineering activities; technical testing and analysis	
Other		9.42%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational

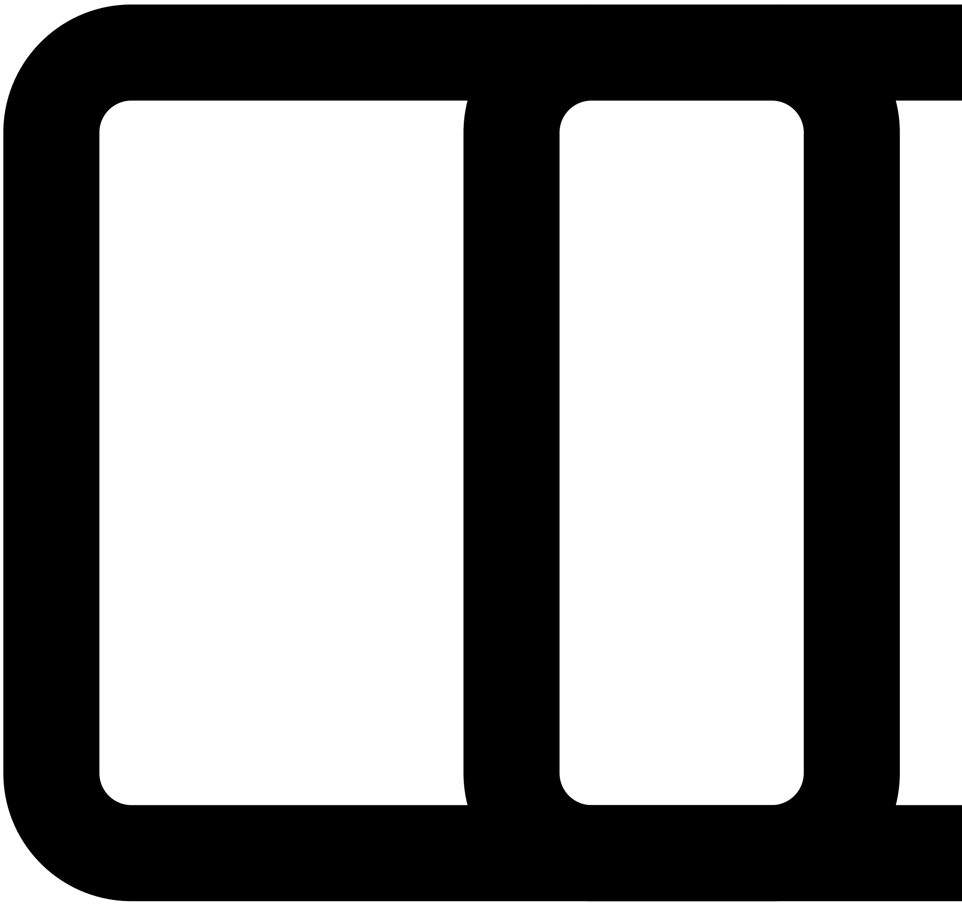
To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

activities of investee companies.	Yes: ☐

In fossil gas

In nuclear energy



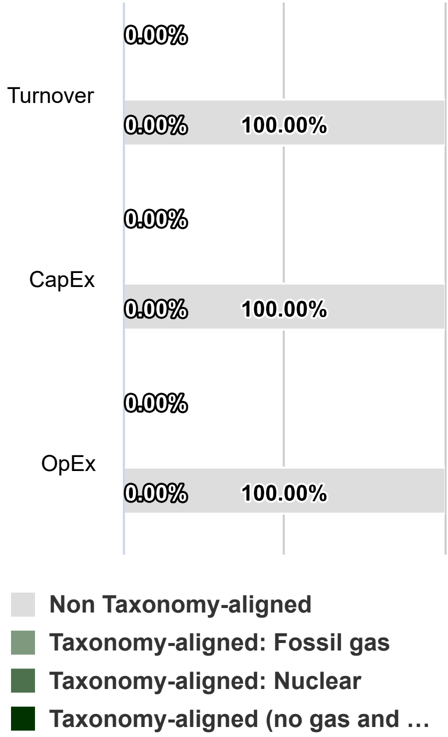
No: ☑

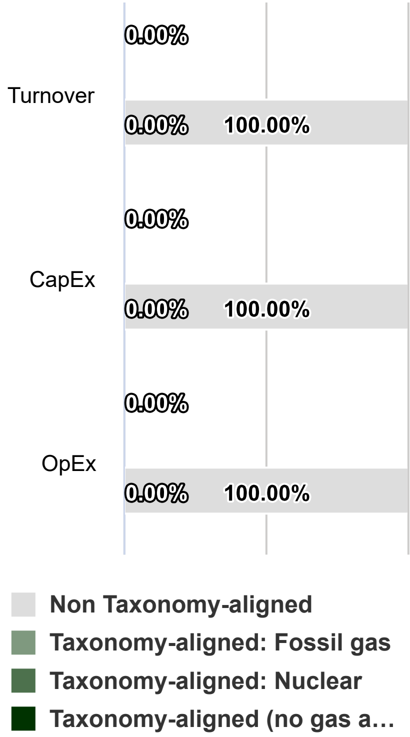
[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***





This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

What was the share of socially sustainable investments?

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared with the broad market index?
