

Zurich Global Green Bond Fund

CHBD EUR Unhedged Distributin

Please refer to the Prospectus, Supplement and KIID before making any final investment decisions.

"The Zurich Global Green Bond Fund is dedicated to financing projects that promote environmental sustainability and address climate change. Green bonds are issued by a broad set of entities such as sovereigns, municipalities, multilateral organizations, financial institutions or corporations to raise finance that is designated for specific projects that either mitigate climate change or promote environmental sustainability.

By investing in a diverse portfolio of high-quality green bonds, this fund supports for example initiatives in renewable energy, energy efficiency and clean transportation. The Zurich Green Bond Fund is designed for investors seeking both financial returns and environmental impact. It aims to contribute to a greener, more sustainable future.

The Zurich Global Green Bond Fund is actively managed with the aim to outperform the reference index, the Bloomberg Barclays MSCI Global Green Bond Index Total Return EUR hedged. For a more detailed description of the Fund including the sustainability aspects of the Fund please refer to the Prospectus, Supplement and latest key investor information document ('KIID') available at www.carnegroup.com/zurich."

Risk and reward profile

Lower risk
Potentially lower reward

Higher risk
Potentially higher reward

The risk indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. The lowest category does not mean a risk-free investment. This requires corresponding risk tolerance and capacity. All investments are subject to market fluctuations and specific risks, which can significantly increase under unusual market conditions. Long-term equity investments are generally subject to greater fluctuations in value than bond and money market investments. The Fund may be suitable for investors that are prepared to invest for at least 5 years. The Fund can use derivatives, which may result in additional risks (particularly counterparty risk). For more information on risks, please see the section entitled "Risk Factors" in the Prospectus of the ICAV and Supplement of the Fund.

Key benefits

Finance projects, not just companies: We hand-pick green bonds so your money goes directly to where it can have most impact. As an actively managed fund, we control what's included.
Competitive returns, added impact: Earn returns comparable to traditional bonds, with the added impact that comes from investments mitigating factors like rising temperatures and extreme weather.
Invest where the experts do: You'll be investing in the same or similar projects as Zurich itself and you'll benefit from the specialist green bond expertise of asset manager Amundi.
Results at your fingertips: Regular reports keep you connected to what your investment is achieving, both in terms of financial returns and environmental impact.

Key risks

Currency Risk: Changes in the exchange rate between the base currency and such denominated currency of an unhedged currency share class may lead to a depreciation of the value of such shares as expressed in the denominated currency. Fluctuations in the exchange rate between the currencies of the Fund's underlying assets and the currency of a share class may lead to currency risk for the holders of shares in the relevant class. Shareholders of hedged share classes should be aware that they may be substantially limited from benefiting if the denominated currency rises against the base currency.

Default Risk The Fund may be adversely affected if the issuer of a debt instrument fails to meet its repayment obligations (i.e.: defaults). Debt of companies with poor credit ratings usually offer higher yields than those of companies with better credit ratings but may also present a higher degree of risk to the Fund. Corporate debt may be subject to credit rating downgrades which may result in the Fund experiencing losses

Derivatives Risk: The Fund may invest in FDIs to hedge against risk and/or to increase return. There is no guarantee that the Fund's use of derivatives for either purpose will be successful. Derivatives are subject to various risks including but not limited to counterparty risk (including potential loss of instruments), liquidity risk, correlation risk and legal risk and are highly sensitive to underlying price movements, interest rates and market volatility and therefore come with a greater risk than directly investing in the underlying securities themselves.

Risks associated with the ability to track an index: Transaction costs and other fees and expenses to be borne by the Fund and exchange rate factors where the underlying equities are denominated in a different currency to the Base Currency or currency of any Class of Shares are likely to affect the ability of a Fund to track the performance of the Index.

Market Risk: The risk that the market will go down in value, with the possibility that such changes will be sharp and unpredictable. Attention is drawn to the risk that the value of the principal invested in the Fund may fluctuate.

For more information on risks, please see the section entitled "Risks Factors" in the Prospectus of the ICAV and Supplement of the Fund and the Key Investor Information Document.

Glossary
Anti-dilution
adjustment
Benchmark (BM)
Ongoing Charges
Figure (OCF)
UN Sustainable Development Goals
Annual Avoided Emissions

The process of adjusting the subscription or redemption price for shares in the Fund from the Fund's net asset value per share where there are net subscriptions/redemptions in order to pass on dealing costs arising from such net subscriptions/ redemptions to investors give rise to such dealing costs and preserve the value of the underlying assets of the Fund. Please see "Anti-Dilution Adjustment" in the Prospectus and Supplement for further details. An index that can be used by an investment fund as the basis of comparison for assessing the performance achieved. The OCF is a measure of the total annual expenses incurred by a fund and is expressed as a percentage. It allows an accurate comparison of the costs of funds from different companies to be made. The Sustainable Development Goals (SDGs) are 17 global objectives established by the United Nations to address global challenges, including poverty, inequality, climate change, environmental degradation, peace, and justice, aiming to achieve a better and more sustainable future by 2030. Annual avoided emissions refers to the reduction in greenhouse gas emissions achieved within a year due to specific actions or investments. This metric can be measured for the entire fund or per 1 million invested, indicating the environmental impact of the investment.

Important legal information

Zurich Global Green Bond Fund (the "Fund") is a sub-fund of Zurich Invest ICAV (the "ICAV"). The ICAV is an umbrella fund with segregated liability between sub-funds constituted as an Irish Collective Asset-management Vehicle with variable capital and is authorised by the Central Bank of Ireland as an Undertaking for Collective Investment in Transferable Securities.

This is a marketing communication. Investment decisions should only be made after a thorough reading of the current versions of the prospectus of the ICAV, the supplement of the Fund and the latest key information document ("KID/KIID") available at www.carnegroup.com/zurich.

The Fund has sustainable investment as its objective within the meaning of Article 9 of Regulation (EU) 2019/2088 (SFDR) and commits to having a minimum proportion of 90% of sustainable investments. Investors should refer to the pre-contractual disclosure annex of the supplement of the Fund and the Article 10 SFDR website disclosure available at www.carnegroup.com/zurich for further details. Past performance is no guarantee of future results. There is no assurance that the Fund will achieve its investment objective, generate profits or avoid losses. The value of your investment and any income on it may go down as well as up, and may vary. Income may fluctuate due to variations in the value of the coupon rate of the security underlying your investment. Issuers of fixed income securities underlying your investment may not always be able to pay back the value of the coupon or the notional value of the fixed income security at maturity. Income may also be affected by taxation arrangements. Changes in interest rates may have an adverse effect on the value, price or income of an investment. An investment in the Fund should only be made by persons who can sustain a loss on their investment. Any such investment should not constitute a substantial portion of an investment portfolio and may not be appropriate for all investors.

Investment in shares of the Fund is subject to risks. Investors should read the prospectus of the ICAV, the supplement of the Fund, and the KID/KIID, paying particular attention to the sections related to risk factors and risks, before making any investment decisions.

Your investment may also be subject to currency, interest rate, as well as market fluctuations. Consequently, an investor may not get back a sum equal to the amount originally invested.

In accordance with the prospectus of the ICAV and the supplement of the Fund, the Fund may utilise Over-the-Counter and/or Exchange-Traded derivative instruments for hedging or investment purposes. Transactions in derivative instruments involve a risk of loss or depreciation of capital due to adverse changes in security prices, exchange rates or interest rates or, in the case of Over-the-Counter instruments, default of the counterparty. An investment in a fund that may make such investments may not be suitable for all types of investors.

This brochure is not intended to contain and should not be regarded as containing advice relating to legal, taxation, investment or any other matters. This brochure may not be adequate for the needs, profile and experience of each individual investor. Each prospective investor should consult with their own professional advisors as to any legal, economic, or tax implications and related aspects which may be relevant to the purchase, holding or disposal of shares in the Fund and as to suitability of an investment for such investor.

For details in respect of key investor rights, please refer to the prospectus of the ICAV and the supplement of the Fund which can be obtained free of charge by all investors or potential investors on this website www.carnegroup.com/zurich.

Further, the impact of costs of investing into the Fund are described in the offering documentation and the KID/KIID, available on the following website www.carnegroup.com/zurich.

For German investors: The role of Information agent in Germany in accordance with section 309 para. 2 of the German Investment Code is undertaken by Zürich (Deutschland), Solmsstraße 27-37, 60486 Frankfurt am Main, Deutschland.

For Swiss investors: The representative in Switzerland is FIRST INDEPENDENT FUND SERVICES AG, Zürich. The paying agent in Switzerland is NPB Neue Privat Bank AG, Zürich.

For Austrian investors: The Zurich Invest ICAV has appointed Erste Bank der oesterreichischen Sparkassen AG as its domestic paying and information agent under section 141(1) InvFG, Official Gazette no 2011/77. The Zurich Invest ICAV has also appointed Erste Bank der oesterreichischen Sparkassen AG as its tax agent. The details of the paying agent and tax agent are as follows: Erste Bank der oesterreichischen Sparkassen AG - Am Belvedere 1, 1100 Wien, Austria.

The Fund is actively managed by reference to the Bloomberg MSCI Global Green Bond Index (the "Reference Benchmark"). The Fund will typically invest in green bonds included in the Reference Benchmark however the Fund has the flexibility to invest up to 20% of its Net Asset Value in debt securities which are not included in the Reference Benchmark. Investors should refer to the latest versions of the prospectus of the ICAV and the supplement of the Fund for further details of the Fund's investment policies and investment strategy.
