

Template periodic disclosure for the financial products referred to in Article 9,
paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of
Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Swiss Life (LUX) Equity Climate Impact

Legal entity identifier:
549300XQTPKT74ASB364

Sustainable investment objective

Did this financial product have a sustainable investment objective?

☒

Yes

No

☒ It made **sustainable investments with an environmental objective**: ____%

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It made **sustainable investments with a social objective**: ____%

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the sustainable investment objective of the sub-fund was climate change mitigation. The sub-fund achieved its sustainable investment objective through investment in companies which generate revenue from products and services that contribute to support SDGs 7 and 13.

In addition the sub-fund complied with the exclusions and sustainability safeguards defined by Swiss Life Asset Managers.

How did the sustainability indicators perform?

The table below shows the performance of the sub-fund regarding its relevant sustainability indicator. The indicator is an average of monthly snapshots over the whole period.

Swiss Life (LUX) Equity Climate Impact

SDG Alignment Climate 0.52
Coverage

"SDG Alignment Climate" is the indicator monitored by the sub-fund. It reflects the portfolio's weighted average revenue from products and services that contribute to support SDGs 7 and 13. The data source used for this indicator is the rating agency MSCI ESG Research. This indicator was not subject to an assurance provided by an auditor or a review by a third party.

...and compared to previous periods?

A comparison of the portfolio's performance of the sustainability indicators compared to previous periods will be available as of the next reporting period.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Subject to availability of issuer data, the sub-fund applied sustainability safeguards that include assessing the negative impact of issuers on environmental, social and governance issues. It has also identified and excluded from its investment universe those causing significant harm to an environmental or social objective as defined under SFDR. In particular, the sub-fund was not allowed to invest in issuers that have more than 5% cumulative revenues from products or services that negatively contribute to any of the SDGs (based on MSCI SDG contribution assessment).

How were the indicators for adverse impacts on sustainability factors taken into account?

The sub-fund has considered principal adverse impacts on sustainability factors, and has intended to mitigate its negative impact by limiting overall exposure to issuers with the worst PAI score.

The PAI score is derived from a proprietary model that translate each individual mandatory PAI

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

indicators value into a score based on its severity (PAI indicators value are provided by external data vendors). All individual PAI indicators scores are then summed up to constitute the issuer PAI score. As per our methodology, the lower the resulting score, the better.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sub-fund monitored the occurrence of controversies on environmental, social and governance issues and excluded issuers with the most severe ones through its exclusion criteria and the sustainability safeguards defined by Swiss Life Asset Managers.

A severe breach means any detrimental impact made in violation of international standards set out in OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as sustainable investments and are thus excluded.

How did this financial product consider principal adverse impacts on sustainability factors?

The management process was strengthened during the year, in order to take into account the principal adverse sustainability impacts.

In detail, the sub-fund has applied the following exclusion and sustainability safeguards defined by Swiss Life Asset Managers:

- excluded issuers with more than 10% revenues deriving from activities in the thermal coal sector (PAI 1-4)
- excluded issuers involved in controversies related to violation of the UNGC principles (PAI 10)
- excluded issuers involved in the direct or indirect production of nuclear weapons (including intended-use components, warheads and missiles), biological & chemical weapons (including components, systems), landmines, cluster munitions (PAI 14)
- conducted an ESG controversies assessment to exclude issuers with very severe controversies in relation to environmental issues (PAI 1-9)
- limited overall exposure to issuers with worst adverse sustainability impacts by using a proprietary PAI model taking into account the carbon footprint of the issuers (PAI 1-14)
- where appropriate exercised proxy voting rights to incentivize issuers to reduce their carbon footprint and consider the impact that they have on the climate change (PAI 1-14)

For more information, please refer to the “Statement on Principal Adverse Impacts of Investment Decisions on Sustainability Factors” and the Management Company’s responsible investment policy available on the Management Company’s website, which defines the process implemented to consider PAIs.

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
SUNNOVA ENERGY INTERNATIONAL	Utilities	4.90%	US
REPUBLIC SERVICES INC	Industrials	4.35%	US
AIR PRODUCTS & CHEMICALS INC	Materials	4.16%	US
BORALEX INC -A	Utilities	3.57%	CA
NORDEX SE	Industrials	2.86%	DE
SUNRUN INC	Industrials	2.80%	US
CGI INC	Information Technology	2.70%	CA
HYDRO ONE LTD	Utilities	2.65%	CA
AZBIL CORP	Information Technology	2.65%	JP
WASTE MANAGEMENT INC	Industrials	2.64%	US
OX2 AB	Industrials	2.61%	SE
STANTEC INC	Industrials	2.60%	CA
EDP RENOVAVEIS SA	Utilities	2.55%	ES
YOKOGAWA ELECTRIC CORP	Information Technology	2.55%	JP
CBRE GROUP INC - A	Real Estate	2.50%	US

What was the proportion of sustainability-related investments?

80.83% of the sub-fund was invested in sustainable investments with an environmental objective (#1). Not Sustainable category (#2) included derivatives used by the portfolio for hedging purpose and cash or cash equivalent positions to ensure the liquidity of the sub-fund. These investments were not measured against ESG criteria, including any minimum environmental or social safeguards as defined under SFDR.

What was the asset allocation?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets	Sub-sector Weight
C - MANUFACTURING	26 - Manufacture of computer, electronic and optical products	45.15%	18.47%
	20 - Manufacture of chemicals and chemical products		8.51%
	28 - Manufacture of machinery and equipment n.e.c.		5.41%
	27 - Manufacture of electrical equipment		8.96%
	29 - Manufacture of motor vehicles, trailers and semi-trailers		2.74%
	10 - Manufacture of food products		0.83%
	17 - Manufacture of paper and paper products		0.24%
E - WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES		7.38%	
	38 - Waste collection, treatment and disposal activities; materials recovery		7.38%
D - ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY		19.62%	
	35 - Electricity, gas, steam and air conditioning supply		19.62%
M - PROFESSIONAL, SCIENTIFIC AND TECHNICAL ACTIVITIES		4.00%	
	71 - Architectural and engineering activities; technical testing and analysis		4.00%
J - INFORMATION AND COMMUNICATION		4.73%	
	62 - Computer programming, consultancy and related activities		2.28%
	61 - Telecommunications		2.12%
	58 - Publishing activities		0.33%
G - WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES		1.63%	
	45 - Wholesale and retail trade and repair of motor vehicles and motorcycles		1.63%
F - CONSTRUCTION		0.73%	
	42 - Civil engineering		0.73%
Other		16.75%	

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

not applicable

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ **Yes:**

enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- ☐ In fossil gas
- ☐ In nuclear energy
- ☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

- What was the share of investments made in transitional and enabling activities?

not applicable
- How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

not applicable

- What was the share of socially sustainable investments?

not applicable

- What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

These investments included derivatives used by the portfolio for hedging and exposure purpose. They included also cash or cash equivalent positions to ensure the liquidity of the sub-fund. These investments were not measured against ESG criteria, including any minimum environmental or social safeguards as defined under SFDR.

What actions have been taken to attain the sustainable investment objective during the reference period?

No engagement activities were conducted during the period.
Internal control procedures aimed at ensuring compliance with sustainable investment objective were implemented by several departments: portfolio management, risk department, internal audit. These last two departments are independent – they report to a superior, a member of the Board of Directors who has no operational management function. The independent nature of these departments guarantees the impartiality of the checks carried out.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

not applicable

- How did the reference benchmark differ from a broad market index?

not applicable

- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

not applicable

- How did this financial product perform compared with the reference benchmark?

not applicable

- How did this financial product perform compared with the broad market index?
