

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Jennison Global Equity Opportunities

Legal entity identifier:
549300R0JSEL2H47CS56

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☐ Yes	☒ No
☐ It made sustainable investments with an environmental objective : ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective : ____%	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☒ It promoted E/S characteristics, but did not make any sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund (defined herein as the "Product") changed its investment policy and reclassified from an Article 6 fund to an Article 8 fund under the SFDR with effect from 16 August 2022 (the "Transition Date"). From the Transition Date, the Product promoted one primary environmental characteristic (the "Sustainability Characteristic") which is the reduction of Carbon Intensity relative to the MSCI ACWI (All Country World Index) (the "Benchmark"). In order to measure the Product's promotion of the Sustainability Characteristic the Sub-Investment Manager used its investment process to select investments so that the Product's Weighted Average Carbon Intensity (WACI) was at least 50% lower than the WACI of the Benchmark. 'Weighted Average Carbon Intensity' is defined as a measurement of a portfolio's total Carbon Intensity, calculated as the sum product of the constituent weights and intensities.

The Product met the Sustainability Characteristic such that the Product's WACI was at least 50% lower than the WACI of the Benchmark for each month-end beginning from the Transition Date.

How did the sustainability indicators perform?

The Product's WACI was at least 50% lower than the WACI of the Benchmark each month since the Transition Date, ranging from 88.7% to 90.9% below the Benchmark. The % difference is calculated as (Product WACI – Benchmark WACI) / Benchmark WACI.

...and compared to previous periods?

Not applicable, this is the first period in which the Product is required to make disclosures regarding the performance of the sustainability indicators.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Product's consideration of principal adverse impacts was achieved through the consideration of environmental and social issues ("PAI Sustainability Indicators"). The negative impacts of such PAI Sustainability Indicators on the Sustainability Factors considered and prioritised by the Sub-Investment Manager may vary depending on the industry and/or individual company but included the mandatory and additional PAI Sustainability Indicators as set out under the regulatory technical standards published by the European supervisory authorities in accordance with the SFDR. In addition, companies involved in specific activities deemed to have particularly negative impacts are excluded from the Product's investible universe such as conflicts with the UNGC Principles, controversial weapons, nuclear weapons, civilian firearms, tobacco, adult entertainment, gambling and fossil fuels.

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
NVIDIA Corp	Information Technology	8.52	United States
Hermes International	Consumer Discretionary	6.42	France
Microsoft Corp	Information Technology	6.18	United States
Apple Inc	Information Technology	5.97	United States
Ferrari NV	Consumer Discretionary	4.98	Netherlands
LVMH Moët Hennessy Louis Vuitton SE	Consumer Discretionary	4.54	France
L'Oreal SA	Consumer Staples	3.94	France
Eli Lilly & Co	Health Care	3.75	United States
Mastercard Inc	Financials	3.63	United States
MercadoLibre Inc	Consumer Discretionary	3.62	United States
Broadcom Inc	Information Technology	3.30	United States
ASML Holding NV	Information Technology	3.13	Netherlands
Novo Nordisk A/S	Health Care	3.05	Denmark
Tesla Inc	Consumer Discretionary	2.95	United States
Palo Alto Networks Inc	Information Technology	2.88	United States

Portfolio Exposure as of 30/06/2023. It does not represent an average for the reporting period and is not representative of the Portfolio Exposure at any other day of the financial year. The sector breakdowns are defined by the Investment Manager.

What was the proportion of sustainability-related investments?

As the Sustainability Characteristic is measured at the portfolio level, all equity investments in the portfolio were sustainability-related investments.

What was the asset allocation?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S Characteristics: Equity holdings aligned with E/S Characteristics ranged from 95% to 100% over the reference period

#2 Other: Cash and Cash Equivalents, not aligned with E/S Characteristics, ranged from 0% to 5% over the reference period

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	40.70%
Consumer Discretionary	31.50%
Health Care	10.50%
Consumer Staples	6.50%
Communications	3.80%
Financials	3.80%
Cash & Cash Equivalents	2.10%
Industrials	1.40%

Portfolio Exposure as of 31/08/2023. It does not represent an average for the reporting period and is not representative of the Portfolio Exposure at any other day of the financial year. The sector breakdowns are defined by the Investment Manager.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ **Yes:**

☐ ***In fossil gas*** ☐ ***In nuclear energy***

☒ **No:**

levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy alignment of investments including sovereign bonds*

2. Taxonomy alignment of investments excluding sovereign bonds*

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

a. Sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Investment Manager used data provided by third party ESG research providers to assess a company's Carbon Intensity and using such data the Sub-Investment Manager, on a monthly basis, assessed the WACI for the Product. As stated above, the Product met the Sustainability Characteristic such that the Product's WACI was at least 50% lower than the WACI of the Benchmark during the reference period through the Sub-Investment Manager's investment process. No additional actions were necessary.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
