Fund objective

The fund aims to outperform the FTSE All Share Index by 2% per year (after charges) over rolling 5-year periods. It does so by investing at least 80% in the shares of UK companies of any size and in any sector. The fund will typically hold between 30 to 50 stocks. The Aegon fund has higher charges than the underlying Baillie Gifford fund and will therefore be less likely to meet this target.

Understanding the LifePath Capital asset allocation strategy

LifePath Capital takes into account the changes in investors' needs through their working life. This chart shows how an investor's investment mix will change gradually as they get nearer to their target retirement date. The bottom right 'zero' represents the target retirement date of the fund.

Fund performance

The following graph and tables show the performance of the fund over various time periods compared to the fund's benchmark (if there is one). All performance information is as at 31 Jul 2023 unless otherwise stated.

In the graph, performance is shown since launch if the fund is less than five years old. Aegon Lifepath

Past performance is not a reliable guide to future performance. The value of investments and the income from them can fluctuate and are not guaranteed. Investors may not get back the full amount invested.
