Aegon fund size*	£7.37m
Total charge per annum**	0.00%

*The fund size is the total sum of assets held within the fund. **This is the total charge deducted from your plan. We reserve the right to change it.

About fund performance

Investors should always consider performance in relation to the objective of the fund and over periods of at least five years. If a fund has risen in value, it doesn't mean it is meeting its objective – especially if the fund is aiming to outperform a particular benchmark or meet a risk target. The same applies if the fund has fallen in value.

Our risk rating

Fund objective

The fund aims to outperform the FTSE All Share Index by 2% per year (after charges) over rolling 5-year periods. It does so by investing at least 80% in the shares of UK companies of any size and in any sector. The fund will typically hold between 30 to 50 stocks. The Aegon fund has higher charges than the underlying Baillie Gifford fund and will therefore be less likely to meet this target.

Fund performance

The following graph and tables show the performance of the fund over various time periods compared to the fund's benchmark (if there is one). All performance information is as at 31 Jul 2023 unless otherwise stated.

In the graph, performance is shown since launch if the fund is less than five years old.

Risks specific to this fund

There is no guarantee the fund will meet its objective. The value of an investment can fall as well as rise and investors could get back less than they originally invested. All funds carry a level of risk and the information below outlines the key risks for this fund.

Currency risk - this fund invests overseas so its value will go up and down in line with changes in currency exchange rates. This could be good for the fund or bad, particularly if exchange rates are volatile.

Third party risk - in the event that the underlying investments which the fund invests in suspend trading, Aegon may defer trading and/or payment to investors. The value ultimately payable will depend on the amount Aegon receives or expects to receive from the underlying investments.

Credit risk - this fund invests in bonds or other types of debt. Bonds are essentially loans to companies, governments or local authorities so there's a risk that these companies or government bodies may default on the loan. Bonds are rated in terms of quality, usually from AAA down to B and below. AAA is the highest quality and therefore the least likely to default and B or lower the most likely to default. Where we have it we show the credit quality of the loans held by this fund.

Lifestyle strategy risk - long gilts and long corporate bonds are used in lifestyle strategies because of their inverse relationship with annuity rates, not because they are 'safe' investments. When long bonds go down annuity rates generally go up and vice versa, meaning the size of annuity you can buy stays roughly the same whether bonds go up or down. But, this relationship isn't perfect and can fail, for example there can be a delay between changes in long bond values and annuity rates.

Post-retirement risk - if you don't buy an annuity on your retirement date, you'll remain invested 75% in long-dated bonds (government bonds only or a mix of government and corporate bonds) and 25% in cash until you tell us what you want to do. This mix isn't designed for long-term investing and returns may not keep pace with inflation, meaning the real value of your fund may fall.

Benchmark disclaimer - the Complex Target Dated fund is/are not in any way sponsored, endorsed, sold or promoted by FTSE International Limited ("FTSE") or the London Stock Exchange Group companies ("LSEG") (together the "Licensor Parties") and none of the Licensor Parties make any claim, prediction, warranty or representation whatsoever, expressly or impliedly, either as to (i) the results to be obtained from the use of the FTSE All Share (the "Index") (upon which the Complex Target Dated fund is based), (ii) the figure at which the Index is said to stand at any particular time on any particular day or otherwise, or (iii) the suitability of the Index for the purpose to which it is being put in connection with the Complex Target Dated fund.

None of the Licensor Parties have provided or will provide any financial or investment advice or recommendation in relation to the Index to Scottish Equitable plc. or to its clients. The Index is calculated by FTSE or its agent. None of the Licensor Parties shall be (a) liable (whether in negligence or otherwise) to any person for any error in the Index or (b) under any obligation to advise any person of any error therein.
