Date of Production 05 September 2023

What is this product?

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

What are the risks and what could I get in return? (continued)

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest EUR10,000.

The scenarios shown are illustrations using the worst, average, and best performance.

The scenarios presented are an estimate of future performance based on evidence from the past and are not an exact indicator. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all the costs of the product itself, where applicable, but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Recommended holding period:		5 years	
Example Investment:		€10000	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return if you exit before 5 years. You could lose some or all of your investment.		
Stress	What you might get back after costs	€5140	€5070
	Average return each year	-48,56%	-12,70%
Unfavourable	What you might get back after costs	€8600	€8300
	Average return each year	-14,00%	-3,65%
Moderate	What you might get back after costs	€10070	€10720
	Average return each year	0,68%	1,40%
Favourable	What you might get back after costs	€12220	€12440
	Average return each year	22,23%	4,46%

This type of scenario occurred for an investment using the shareclass' NAVs and the benchmark as a proxy, between October 2016 - October 2021

This type of scenario occurred for an investment using the shareclass' NAVs and the benchmark as a proxy, between May 2017 - May 2022

This type of scenario occurred for an investment using the shareclass' NAVs and the benchmark as a proxy, between March 2015 - March 2020

What happens if LGT Wealth Management is unable to pay out?

What are the costs?

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10000 per year is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	EUR 159	EUR 839
Annual cost impact (*)	1.6%	1.6% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.0% before costs and 1.4% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. These figures include the maximum distribution fee that the person selling you the product may charge.

What are the costs? (continued)

This table shows the impact on return per year

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	The impact of the costs you pay when entering your investment.	EUR 0
Exit costs	The impact of the costs of exiting your investment when it matures.	EUR 0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	The impact of the costs that we take each year for managing your investments.	EUR 85
Transaction costs	The impact of the costs of us buying and selling underlying investments for the product.	EUR 74
Incidental costs taken under specific conditions		
Performance fees	The impact of the performance fee.	

This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other PRIIPs.

How long should I hold it and can I take money out early?

How can I complain?
