

# Julius Bär

## UK Equity High Income (UK)

a sub-fund of Main Fund Name

Acc EUR

This document is marketing material. Investors should read the Key Investor Information Document and Prospectus prior to investing.

### Fund Overview

#### Investment Strategy

The objective of the Fund is to achieve a high level of income (greater than the income return of the FTSE ALL Share Index over a rolling 5 year period) and capital growth over the long term (5 years plus). The Fund invests at least 80% of its assets in shares of companies incorporated, domiciled or carrying out the main part of their economic activity in the UK. The Fund may also invest in private and unlisted equities and non-UK companies. The Fund may use derivatives (complex instruments) to manage the Fund more efficiently, with the aim of reducing risk, reducing costs and/or generating additional capital or income. The Fund has an active investment approach based on stock selection driven by the fund manager's assessment of valuation and invests in companies that enable the Fund to grow its dividend and deliver capital appreciation. The Fund is not constrained by a benchmark and has a flexible approach with no inbuilt bias to sector or company size.

#### Key facts

|                                  |                                |

| PureTech Health          | 3.63%  |
| Total                    | 43.05% |

Source: Three Rock Capital Management Ltd., MSCI. Unless otherwise stated all data as at 30/09/2023. The fund was established in 06/02/1988. This share class was created in 06/02/1988. Performance is shown on a Net Asset Value (NAV) basis, with gross income reinvested. Past performance is not necessarily indicative of future performance and should not be the sole factor of consideration when selecting a product. All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed. ### Sector Exposure

### Market capitalization breakdown

### Geography exposure

### Currency exposure (in %)

### Fund opportunities

- This actively managed fund provides exposure to long-term structural growth trends across a selection of five key themes, namely Arising Asia, Digital Disruption, Energy Transition, Feeding the World and Shifting Lifestyles.
- Investors benefit from access to an experienced team that has a deep understanding of megatrends, industry dynamics and their impact on the respective companies within selected subthemes.
- This fund is aimed at investors looking to obtain thematic exposure to companies in structurally growing industries. The managers apply a market exposure approach. Hence, the fund is expected to move in line with the underlying market and to outperform its benchmark over an investment cycle.

### Risk factors

- The fund invests in equities and equity-related securities whose value can be affected by daily stock market movements. Other influential factors include political and economic news, company earnings and significant corporate events.
- The fund is concentrated in a limited number of industry sectors and, as a result, may be more volatile than a fund invested in a broader universe.
- A significant portion of the fund may be invested in emerging markets (mainly China). These markets are generally more sensitive to economic and political conditions than developed markets. Emerging market securities may also be subject to higher volatility and lower liquidity than non-emerging market securities.
- As this is an actively managed fund, with a mid- to long-term investment horizon, it may deviate from and underperform its benchmark in the shorter term.
