Investment strategy

Investment markets are the main driver of the Trust's investment returns. The Trust's allocation to investment markets is shown in its strategic asset allocation and ranges below. It's invested in growth assets with minimal exposure to defensive assets.

Our investment experts actively look for opportunities to provide better returns, or less risk, than those generated by the strategic asset allocation. They do this by:

Adjusting the allocations to the asset classes away from the strategic asset allocation, while aiming to remain within the defined ranges.

Researching and selecting a broad range of mainstream asset classes, and including some exposure to alternative assets and strategies.

Researching hundreds of investment managers from around the world and selecting the managers they believe are the best for the Trust. These investment managers, who are mainly active managers, choose many companies and securities in Australia and overseas for investment.

Quarter highlights

Key contributors to performance for the quarter ended 30 September 2023 are:

- In another volatile quarter, there were negative returns in share markets and all maturity bonds. The exposure to private equity (+3.0%) helped cushion the negative returns.

Note: Returns for the asset classes above are before fees and tax.
