Your scheme accessed the underlying fund via Scottish Widows plc up to 24th September 2015. Following a change of fund platform provider by the Trustees of your pension scheme effective from 25th September 2015, the underlying fund is now accessed via Phoenix Life Ltd. Past performance figures shown prior to this date reflect the performance achieved whilst access was provided by Scottish Widows plc.

Fund performance figures shown include reinvestment of any income the Fund receives and deduction of the Annual Management Charge, Fund Expenses and where applicable, Property Expense Ratio. Charges and expenses may have changed over time, which is reflected in the performance figures. The Fund performance shown does not take into consideration any additional charges that may apply to your scheme.

Benchmark performance shown in our tables and charts is for comparison purposes only and is based on Total Returns, which assumes the reinvestment of any income. The benchmark will not include any costs and charges that apply to the Fund, which could be a reason why the performance of the Fund may not exactly match the performance of the benchmark.

The fund performance figures refer to the past and past performance is not a reliable indicator of future performance. You should be aware that the value of investments may fall as well as rise and is not guaranteed. You may get back less than you invest.

Important Information

This Fund has a single unit price, which means that on any given date, an investor will purchase units at the same price as an investor selling units. The Fund's unit price is determined by the unit price of the underlying fund(s) in which it invests. Our Fund or the underlying fund's unit price can be impacted by whether money is going in or out of the fund and also the trend of flows in or out. Full details on how our unit linked Funds are valued and priced can be found in the document titled 'Unit Linked Principles & Practices' which is available on <https://www.phoenixwealth.co.uk/Literature/Funds/>.

Risk of Investment

- Exchange Rates: Many underlying funds invest in shares or other assets which are in a different currency from this Fund. Where there are currency differences, prices may rise and fall purely as a result of changes in exchange rates.

- Counterparty: In the event of the failure by a counterparty of the underlying fund (i.e. other firms that the underlying fund manager is contracted with), the impact of this failure will be reflected in the value of the assets and also within our Fund.

Some funds are exposed to additional special risk factors linked to the type of investment strategy they pursue. This section indicates which risks are applicable to this particular fund. Please read the 'Guide to your scheme fund factsheet' for a detailed description of these risks:

- Emerging Markets
- Reinsurance
