

Q4
2023SL Intl Standard Life Sterling
Liquid Assets Fund

Standard Life

Part of Phoenix Group

31 December 2023

This document is intended for use by individuals who are familiar with investment terminology. Please contact your financial adviser if you need an explanation of the terms used.

The fund aims to preserve capital and produce a return in line with sterling money market rates, before charges, while maintaining a high degree of liquidity. Investments include, but are not limited to, Fixed Deposits and Certificates of Deposit, Commercial Paper, Floating Rate Notes, UK gilts and other types of bonds. This will be achieved by investing in one or more sterling money market funds. The fund may also invest directly in sterling money market investments.

The fund price is not guaranteed by Standard Life. The value of the fund can go up and down and you may get back less than you pay in. Examples of when this could happen include where the fund charges are higher than the return the fund is generating, late or non-payment of income and/or the final maturity payment from the investments held or an unexpected rise in interest rates.

About PDFReactor

RealObjects PDFReactor is a powerful formatting processor for converting HTML and XML documents into PDF. It uses Cascading Style Sheets (CSS) to define page layout and styles. The server-side tool enables a great variety of applications in the fields of ERP, eCommerce and Electronic Publishing.

PDFReactor supports HTML5, CSS3 and JavaScript.

It allows you to dynamically generate PDF documents such as invoices, delivery notes and shipping documents on-the-fly. PDFReactor allows you to easily add server-based PDF generation functionality to your application or service. Since PDFReactor runs on a server, the end-user in general does not need any software other than a PDF viewer.

	3 Months (%)	1 Year (%)	3 Years (%)	5 Years (%)
SL Intl Standard Life Sterling Liquid Assets Fund	1.1	4.1	4.4	4.4
Money Market	0.0	-0.2	2.2	0.7

Note(s): The information shown relates to the past. Past performance is not a guide to the future. The value of your investment can go down as well as up. For the relevant charges on your policy please refer to your policy documentation.

Where a fund holds overseas assets the Sterling value of these assets may rise and fall as a result of exchange rate fluctuations.

Definition(s): Volatility Rating - The volatility rating of a fund indicates how much the fund price might move compared to other funds. The higher the volatility rating, the less stable the fund price is likely to be. You can use this to help you decide how much risk you're comfortable taking with your investments. Volatility ratings are calculated on a scale of 0-7.

Money Market - may include bank and building society deposits, other money market instruments such as Certificates of Deposits (CDs), Floating Rate Notes (FRNs) including Asset Backed Securities (ABSs), Money Market Funds and allowances for tax, dividends and interest due if appropriate.
