

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Swiss Life (LUX) Multi Asset Growth

Legal entity identifier:
549300ZTEUFHU49NNS21

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ Yes

☒ No

☐ It made **sustainable investments with an environmental objective**: ____%

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It made **sustainable investments with a social objective**: ____%

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The sub-fund has promoted environmental and social characteristics through its investment in funds which have obtained the French Label ISR or funds with an equivalent Label in Europe. During the reference period, 94.90 % of the sub-fund (excluding cash) was invested in Label ISR funds or funds with an equivalent label in Europe. The indicator is an average of monthly snapshots over the whole period.

The French Label ISR (Investissement Socialement Responsable) is an external recognition for identifying responsible investment funds. Created and supported by the French Finance Ministry, the objective of the Label is to increase the visibility of ESG products among investors in France and Europe.

The Label requires multiple criteria, including the monitoring of tangible extra-financial KPIs on the Environmental, Social, Human Rights and Governance dimensions. Funds also have to demonstrate that they offer a significant improvement of their ESG profile compared to a ESG reference index that reflects their investment strategy. This significant improvement can be achieved through the exclusion of 20% of the initial ESG reference index, or through a significantly better average ESG rating.

After the initial audit by a third-party organization, a fund can retain the label for three years (with an annual control).

How did the sustainability indicators perform?

The sub-fund used the percentage of investment made in Label ISR fund as sustainability indicator. In line with the precontractual commitment of the sub-fund, this indicator was above 90% (excluding cash).

	Portfolio ESG Reference Universe	
Weighted average ESG rating	7.99	5.73
Coverage	76.82%	98.25%
Carbon footprint	259.93	351.13
Coverage	74.52%	73.47%
Executive pay linked to sustainability factors	58.25%	57.84%
Coverage	76.84%	74.49%

...and compared to previous periods?

A comparison of the sub-fund's performance of the sustainability indicators compared to previous periods will be available as of the next reporting period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

not applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-funds negative impact was addressed by limiting overall exposure to funds which are not addressing the PAIs, through their labeled investment strategy (label ISR or equivalent ESG label).

For more information, please refer to the "Statement on Principal Adverse Impacts of Investment Decisions on Sustainability Factors" and Swiss Life Asset Managers Luxembourg's responsible investment policy available on Swiss Life Asset Managers Luxembourg's website, which defines the process implemented to consider PAIs (<https://lu.swisslifeam.com/en/home/responsible-investment/sustainability-related-disclosures.html>).

What were the top investments of this financial product?

The list includes the 15 largest positions in the portfolio during the period. This list is based on the average positions in the portfolio at the end of each quarter of the financial year. The column on the right shows the percentage that each position represented, on average and at the end of the months.

Largest Investments	Sector % Assets	Country

What was the proportion of sustainability-related investments?

89.37 % of the sub-fund was aligned with E/S characteristics (#1).

The "Other" category (#2) included investments made in non labelled funds, derivatives used by the portfolio for hedging purpose and cash or cash equivalent positions to ensure the liquidity of the sub-fund. These investments were not measured against ESG criteria, including any minimum environmental or social safeguards as defined under SFDR.

● **What was the asset allocation?**

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

 In which economic sectors were the investments made?

Sector	Sub-sector	% Assets	Sub-sector Weight
C - MANUFACTURING	26 - Manufacture of computer, electronic and optical products	27.83%	5.75%
	29 - Manufacture of motor vehicles, trailers and semi-trailers		0.98%
	28 - Manufacture of machinery and equipment n.e.c.		2.61%
	14 - Manufacture of wearing apparel		0.82%
	27 - Manufacture of electrical equipment		1.19%
	21 - Manufacture of basic pharmaceutical products and pharmaceutical preparations		5.16%
	19 - Manufacture of coke and refined petroleum products		1.06%
	11 - Manufacture of beverages		1.72%
	20 - Manufacture of chemicals and chemical products		2.62%
	10 - Manufacture of food products		1.71%
	22 - Manufacture of rubber and plastic products		0.57%
	17 - Manufacture of paper and paper products		0.70%
	30 - Manufacture of other transport equipment		0.67%
	23 - Manufacture of other non-metallic mineral products		0.59%
	15 - Manufacture of leather and related products		0.47%
	32 - Other manufacturing		0.41%
	25 - Manufacture of fabricated metal products, except machinery and equipment		0.11%
	16 - Manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials		0.07%
	12 - Manufacture of tobacco products		0.25%

	84 - Public administration and defence; compulsory social security		0.21%
Other		20.81%	

In addition, the table below shows the proportion of investments made in companies that are directly linked to fossil resources (non-metallurgical coal, oil, gas) - either because they hold fossil reserves or because they generate income from these resources. The extent of each company's exposure to fossil resources (reserves or revenues) is not taken into account; it may be limited. This list is based on the average positions in the portfolio at the end of each quarter of the financial year.

Share of portfolio invested directly in companies linked to fossil resources	7.98%
--	-------

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

not applicable

☒ Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

☐ What was the share of investments made in transitional and enabling activities?

not applicable

☐ How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

not applicable

What was the share of socially sustainable investments?

not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

These investments included investments made in non labelled funds, derivatives used by the sub-fund for hedging purpose and cash or cash equivalent positions to ensure the liquidity of the sub-fund. These investments were not measured against ESG criteria, including any minimum environmental or social safeguards as defined under SFDR.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Internal control procedures aimed at ensuring compliance with environmental and social characteristics were implemented by several departments: portfolio management, risk department, internal audit. These last two departments are independent – they report to a superior, a member of the Swiss Life Group board of directors who has no operational management function. The independent nature of these departments guarantees the impartiality of the checks carried out.

The internal control procedures to comply with the binding elements as described in the pre-contractual document entailed the following checks:

- Pre-Trade checks based on our internal compliance and portfolio management systems
- Ongoing monitoring of the binding elements as part of the daily investment compliance checks

How did this financial product perform compared to the reference benchmark?

not applicable

How does the reference benchmark differ from a broad market index?

not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

not applicable

How did this financial product perform compared with the reference benchmark?

not applicable

How did this financial product perform compared with the broad market index?

not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
