Term

The Fund has no maturity date. The Fund could be closed under the conditions laid down in the current prospectus of the Fund.

Objectives

Investment Objective

The investment objective of the Fund is to aim to maintain capital value while seeking to produce a return to the investor in line with money market rates.

Investment Policy

- The Fund is a short-term money market fund ("Short-Term MMF") and a low volatility net asset value Money Market fund ("LVNAV MMF") for the purposes of the Money Market fund Regulation ("MMFR").
- The Fund will invest in a wide range of high quality eligible "Money Market Instruments" and short-term bonds denominated in US dollars.
- The Fund may arrange to enter into repurchase agreements (sell a security to a buyer with an agreement that the Fund will repurchase the security at a later date at an agreed price) and reverse repurchase agreements (buy a security from a seller with an agreement that the seller will repurchase the security at a later date at an agreed price). The sellers and buyers will be highly rated by recognised credit rating agencies. Repurchase and reverse repurchase agreements are only used to assist with efficient portfolio management of the Fund.
- The Fund may invest in asset-backed securities, which are bonds that provide the bondholder with regular payments dependent on the cash-flow arising from a specified pool of assets such as interest and capital from mortgages or car loans. The Fund will only invest in higher rated asset-backed securities.

• As a result of the Fund investing in a wide range of high quality issuers the Fund has received an AAAM rating by Standard & Poor's and an AAAMmf rating by Fitch.

• **Manager's Discretion:** The Fund is actively managed, and the investment manager is not constrained by the benchmark. The benchmark is used for performance comparison purposes and by the investment manager in measuring and managing investment risk.

• **Transaction Costs:** The Fund bears costs in buying and selling investments, which may have a material impact on the Fund's performance.

Share Class Policy

Income and gains from the Fund's investments are not paid but instead are reflected in the Fund's share price.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 1 out of 7, which is the lowest risk class. This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact the capacity to pay you.

Be aware of currency risk. In some circumstances, you may receive payment in a different currency, so that the final return you get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the product not included in the summary risk indicator:
