

INVESTMENT UPDATE

NOVEMBER 2023

HIGHLIGHTS

- Stock markets were mixed in January with developed market shares advancing while emerging markets saw negative returns.
 - There were signals from major central banks that interest rate cuts may not be forthcoming as soon as had been hoped.
 - In bond markets, government bond yields rose (meaning prices fell). Oil prices rose amid ongoing conflict in the Middle East and shipping disruption.
-

World Markets Update

United Kingdom

UK equities fell over the month as expectations for when interest rates may begin to be cut were pushed out. This occurred following an unanticipated increase in UK inflation as the Office for National Statistics (ONS) revealed that the consumer prices index had increased to 4.0% in December, from 3.9% in November. The consumer inflation numbers added to a complicated picture for UK macroeconomic data, with other statistics from the ONS revealing the wage growth had slowed in the three months to November. Meanwhile, the statistics agency also revealed that UK economy had performed better than expected in November. Chancellor of the Exchequer Jeremy Hunt hinted he would announce major tax cuts in the upcoming spring budget. Against these developments and the increased geopolitical uncertainty, the market struggled to make progress, with the large UK-quoted diversified energy and basic materials firms and financials underperforming. The technology, consumer discretionary, consumer staple and healthcare sectors outperformed. Overseas inbound bid activity for smaller companies remained an important theme over the period, further helping to underpin performance of the UK small and mid-sized companies as overseas buyers made further approaches.

Summary

- UK equities fell over the month as expectations for when interest rates may begin to be cut were pushed out.
- Office for National Statistics (ONS) revealed that the consumer prices index had increased to 4.0% in December, from 3.9% in November.
- Chancellor of the Exchequer Jeremy Hunt hinted he would announce major tax cuts in the upcoming spring budget.

North America

US shares advanced in January, supported by some strong corporate earnings and data suggesting a soft landing for the economy will be achieved. Hopes of imminent rate cuts also boosted shares, although such hopes were dashed by the Federal Reserve (Fed) at month end. Communication services and information technology were the strongest sectors in January, supported by robust earnings and positive outlook statements from some of the “Magnificent Seven” large cap companies. By contrast, real estate and materials were among the weakest sectors. Data showed that US GDP grew at an annualised rate of 3.3% in Q4 2023. For the year as a whole, GDP growth was 3.1%. Meanwhile, annual inflation (as measured by the consumer price index) ticked up to 3.4% from 3.1%. Labour market data remained firm with non-farm payrolls showing 216k jobs added in December and the unemployment rate steady at 3.7%. The ISM manufacturing (PMI) remained in contraction but ticked up to 49.1 from 47.1 in December (a reading above 50 for the PMIs – purchasing managers’ indices – indicated expansion, while below 50 implies contraction). The Fed held a policy-setting meeting at the end of the month. Interest rates were kept on hold, as expected, at 5.25-5.5%. Comments from Fed chair Jerome Powell indicated that, while rates have peaked, a rate cut as soon as the next meeting in March is unlikely.

Summary

- US shares advanced, supported by strong corporate earnings and data suggesting a soft landing for the economy will be achieved.
- Hopes of imminent rate cuts also boosted shares, although such hopes were dashed by the Federal Reserve (Fed) at month end.
- Data showed that US GDP grew at an annualised rate of 3.3% in Q4 2023. For the year as a whole, GDP growth was 3.1%.

World Markets Update continued

Europe

Eurozone shares posted a gain in January, led higher by shares in the information technology (IT) sector. The communication services sector also performed strongly. Sectors that had rallied in late 2023 on hopes of imminent rate cuts – including utilities and real estate – were among the weaker performers. In the IT sector, shares of some semiconductor equipment stocks registered robust gains. While the sector faces a ban on the export of some high-end chipmaking equipment to China, demand elsewhere remains high. The software subsector also performed well. Hopes of an early interest rate cut from the European Central Bank (ECB) began to fade after inflation (as measured by the consumer price index) for December was confirmed at 2.9%, up from 2.4% in November. However, inflation eased again in January with the flash estimate at 2.8% y/y. The ECB kept interest rates unchanged at its January meeting. However, rate cuts are still expected to come later in the year. ECB president Christine Lagarde said that “the disinflation process is at work”. The eurozone economy registered zero GDP growth in Q4 2023. This followed a -0.1% contraction in Q3. This mean annual GDP growth for the single currency bloc was 0.5% in 2023. The German economy was the main drag on growth, shrinking -0.3% in Q4.

Summary

- Eurozone shares posted a gain in January, led higher by shares in the information technology (IT) sector.
- Hopes of an early interest rate cut from the ECB were dashed after the inflation rate for December rose slightly from November.
- The eurozone economy registered zero GDP growth in Q4 2023.

Other Overseas

The Japanese equity market enjoyed a strong start of 2024 with a total return of 7.8% for the TOPIX index in January. The Nikkei 225 surged by 8.4%, reflecting the fact that the market rise was driven by large cap stocks. Foreign investors led the rally on expectations of structural changes in Japan, including the launch of the new NISA (Nippon Individual Savings Account) for Japanese retail investors. Asia ex Japan equities fell in January as investors scaled back their expectations for swift interest rates cuts and amid ongoing concerns about weaker economic growth in China. China, Hong Kong, and South Korea were the weakest index markets in the month, while India and the Philippines achieved modest gains. The sell-off in China comes amid investor concern that the world's second-largest economy could face a long period of slow economic growth, with factory output contracting for the fourth consecutive month in January. The crisis in China's property market, once the engine of economic growth, also continues to weaken investor sentiment towards the country's stock market. Emerging market (EM) equities declined in US dollar terms in the first month of 2024, underperforming developed markets which finished the month in positive territory. China was once again the main drag on performance. Concerns that the Federal Reserve (Fed) will keep rates higher-for-longer added to the negative sentiment in EM amid signs of economic strength in the US. Chile posted the biggest losses in the month with weakness in the peso weighing on returns. Difficulties at a major lithium producer, which saw it temporarily stop extraction activities amid community protests, also had a negative impact. China was another significant underperformer in January as a bigger-than-expected reduction in the reserve requirement ratio failed to lift markets against a backdrop of the ongoing property crisis which saw the indebted property giant Evergrande liquidated. There was also news of further US sanctions on Chinese technology companies. The Korean market, which is typically sensitive to the outlook for US interest rates, also lagged the index.

Summary

- The Japanese equity market enjoyed a strong start of 2024 with a total return of 7.8% for the TOPIX index in January.
- Asia ex Japan equities fell as investors scaled back expectations for swift interest rates cuts and amid concerns about Chinese economic growth.
- Emerging market (EM) equities declined in US dollar terms in the first month of 2024, underperforming developed markets.

World Markets Update continued

Commodities

The S&P GSCI Index rose in January with strong price gains for livestock and energy offsetting weaker prices in agriculture, industrial metals, and precious metals. Oil prices rose amid ongoing conflict in the Middle East and disruption to shipping in the Suez Canal. Industrial metals was the worst-performing component of the index in January, with price gains for lead and copper prices failing to offset price falls for aluminium, nickel, and zinc. Within agriculture, sugar and cocoa prices advanced sharply, while prices for wheat, corn and soybeans fell. In precious metals, gold and silver prices were both lower in the month.

Indices Performance Statistics

Index	Performance Change % over October	Performance Change % Year to Date
FTSE All-Share (UK)	-4.1	0.3

Currencies

The US dollar trade weighted index rebounded in January as investors scaled back expectations of an imminent cut in interest rates. The Federal Reserve (Fed) is seeking more evidence that inflation is moving sustainably towards its 2% target before sanctioning any reduction in borrowing costs. The Fed left interest rates unchanged after the latest GDP figures highlighted the US economy grew at an annualised rate of 3.3% over the fourth quarter, while the December labour market survey was stronger than expected. The euro lost ground against the dollar as investors priced in an interest rate cut from the European Central Bank (ECB) in the spring. The latest GDP figures highlighted that the eurozone narrowly avoided a recession during the fourth quarter as weakness in Germany and France was offset by stronger growth rates in Italy and Spain. The yen weakened as the Bank of Japan (BoJ) retained its ultra-loose monetary policy, giving no indication of any near-term change in interest rates as the recent decline in energy prices eased inflationary pressures. Sterling held firm against the dollar after UK inflation unexpectedly rose in December, with the Bank of England expected to adopt a more cautious approach to cutting interest rates.

The views expressed above are those of Schroders Investment Management, as at date of publication. Investment markets and conditions can change rapidly and as such the views expressed should not be taken as a statement of fact nor should reliance be placed on these views when making investment decisions. Past performance is not a reliable indicator of future results.

World Markets Update continued

Bond Markets

In January, global government bond markets saw a partial reversal in the positive performance experienced at the end of 2023. Despite encouraging news on disinflation, the enthusiasm for near-term rate cuts subsided as the US economy continued to demonstrate robust growth. Yields rose across all major government bond markets, meaning prices fell, with the UK 10-year rising from 3.54% to 3.80%. German 10-year yields also moved higher from 2.03% at the end of December to 2.16% and peripheral spreads tightened. US Treasuries fared better with the 10-year yield rising from 3.87% to 3.95%. Investment grade (IG) corporate bonds posted negative returns, yet they still outperformed government bonds with new issuance being absorbed well and spreads tightening further on the hopes of a soft landing. Within high yield, the eurozone was the notable outperformer, with tighter spreads and positive total returns which exceed its investment grade counterparts. Investment grade bonds are the highest quality bonds as determined by a credit rating agency; high yield bonds are more speculative, with a credit rating below investment grade. From a macroeconomic perspective, the theme was one of ongoing regional divergence. The US economy sustained its momentum, with Q4 GDP surpassing expectations (4.9% against a forecast of 2.0%) and the composite purchasing managers' index (PMI) for January climbing further into expansionary territory, reaching its highest level since June. By contrast, the eurozone's growth remained lacklustre. This sluggishness was underscored by a disappointing German Ifo Index – typically a reliable growth indicator - which unexpectedly fell in January. Additionally, consumer confidence has also dipped across the region. Inflation pressures continued to ease. The Federal Open Market Committee's (FOMC) preferred measure, core PCE inflation, softened to 2.9% year-on-year in December, inching closer to the Federal Reserve's (Fed) 2% target.

Property

Despite a slight softening in demand, occupational markets remain resilient due to tight supply conditions caused by high construction and debt financing costs, and a shortage of sustainability-compliant spaces. This situation is likely to spur growth in the medium term. To meet evolving regulatory and tenant demands, it is crucial to prioritize sustainability and impact considerations, which will necessitate increased capital expenditure. We believe the real estate sector is in the early stages of a broader cyclical buying opportunity due to the extent and uneven pattern of the repricing so far. We advise investors to be patient as opportunities emerge over time across capital structures, property types, and regions. Immediate opportunities can be found in markets that have experienced the fastest repricing, such as the UK and Nordic region, followed by the US and other Continental European markets. In the Asia Pacific region, cyclical opportunities are focused on markets that align with China's recovery or offer alternatives in the nearshoring/friend shoring of supply chains. Industrial and logistics assets have significantly repriced but remain supported by strong structural fundamentals. We favour operational property types that have strong demand-side tailwinds and can deliver direct or indirectly inflation-linked income. These include self-storage, hotels, senior housing, select residential segments, and healthcare-related real estate.

Source: FE fundinfo as at 31.10.2023. Performance figures with "+" are since launch of the fund. No performance information is shown for funds with less than four full quarters of performance history.

Performance figures are in £ sterling on a bid to bid basis, with income (where applicable) reinvested gross of UK tax and net of total annual fund charges. The figures do not include any initial charge or other product charge(s) that may be applicable. Past performance is not a reliable indicator of future results. The value of an investment is not guaranteed and can go up and down depending on investment performance (and currency exchange rates where a fund invests overseas).

Scottish Widows operates four different series of fund prices for its range of pension products. The fund series that applies will depend on the pension product chosen. The prices used for the performance data in this document are based on the series 2 prices in accordance with ABI rules on reporting of past performance. The performance of the funds using series 1 series 3 or series 4 prices will be different and dependent on the relevant fund charges.

Not all Scottish Widows products have access to these funds, please refer to the relevant product literature. Full terms and conditions are available on request from Scottish Widows using the contact details provided. Charges, terms and the selection of funds we make available may change. Information on the general and specific risks associated with investing in this fund is available in the relevant fund guide. We may change the investment approach rating for the fund in the future.

Please note that the funds marked with an * are not available for new investment and we have therefore ceased to market them to new investors.

Source: FE fundinfo as at 31.10.2023. Performance figures with "+" are since launch of the fund. No performance information is shown for funds with less than four full quarters of performance history.

Performance figures are in £ sterling on a bid to bid basis, with income (where applicable) reinvested gross of UK tax and net of total annual fund charges. The figures do not include any initial charge or other product charge(s) that may be applicable. Past performance is not a reliable indicator of future results. The value of an investment is not guaranteed and can go up and down depending on investment performance (and currency exchange rates where a fund invests overseas).

Scottish Widows operates four different series of fund prices for its range of pension products. The fund series that applies will depend on the pension product chosen. The prices used for the performance data in this document are based on the series 2 prices in accordance with ABI rules on reporting of past performance. The performance of the funds using series 1 series 3 or series 4 prices will be different and dependent on the relevant fund charges.

Not all Scottish Widows products have access to these funds, please refer to the relevant product literature. Full terms and conditions are available on request from Scottish Widows using the contact details provided. Charges, terms and the selection of funds we make available may change. Information on the general and specific risks associated with investing in this fund is available in the relevant fund guide. We may change the investment approach rating for the fund in the future.

Please note that the funds marked with an * are not available for new investment and we have therefore ceased to market them to new investors.

Scottish Widows life funds, managed by Schroders Investment Management - Performance Statistics 1 November 2023

These life funds are available to existing customers who are already invested in a Scottish Widows product. New customers should contact their advisers or Scottish Widows for information on fund availability.

Source: FE fundinfo as at 31.10.2023. If less than 5 years are available, performance figures will show a "+". No performance information is shown for funds with less than four full quarters of performance history.

Performance figures are in £ sterling on a single pricing basis, with income (where applicable) reinvested net of UK tax and net of total annual fund charges. The figures do not include any initial charge or other product charge(s) that may be applicable. Past performance is not a reliable indicator of future results. The value of an investment is not guaranteed and can go up and down depending on investment performance (and currency exchange rates where a fund invests overseas).

Full terms and conditions are available on request from Scottish Widows using the contact details provided. Charges, terms and the selection of funds we make available may change. Information on the general and specific risks associated with investing in this fund is available in the relevant fund guide. All information is sourced from Scottish Widows or the relevant fund management group unless otherwise stated.

Scottish Widows life funds, managed by Blackrock Investment Management U.K. - Performance Statistics 1 November 2023

These life funds are available to existing customers who are already invested in a Scottish Widows product. New customers should contact their advisers or Scottish Widows for information on fund availability.

Source: FE fundinfo as at 31.10.2023. If less than 5 years are available, performance figures will show a "+". No performance information is shown for funds with less than four full quarters of performance history.

Performance figures are in £ sterling on a single pricing basis, with income (where applicable) reinvested net of UK tax and net of total annual fund charges. The figures do not include any initial charge or other product charge(s) that may be applicable. Past performance is not a reliable indicator of future results. The value of an investment is not guaranteed and can go up and down depending on investment performance (and currency exchange rates where a fund invests overseas).

Full terms and conditions are available on request from Scottish Widows using the contact details provided. Charges, terms and the selection of funds we make available may change. Information on the general and specific risks associated with investing in this fund is available in the relevant fund guide. All information is sourced from Scottish Widows or the relevant fund management group unless otherwise stated.

OEIC funds, managed by Schroders Investment Management - Performance Statistics 1 November 2023

These OEIC funds are available to existing customers who are already invested in a Scottish Widows product. New customers should contact their adviser or Scottish Widows for information on fund availability.

The value of an investment is not guaranteed and can go up and down depending on investment performance (and currency exchange rates where a fund invests overseas).

Yields may vary, data as at 31.10.2023. Effective Yield: The yield quoted for bond funds is determined by the effective yield of the underlying assets. 'Effective yield' is defined by the IA, and takes account of all expected cash flows over the lifetime of each underlying asset, including differences between the purchase and redemption prices. Historic Yield: The yield quoted for equity funds is an historic yield based on distributions paid over the previous 12 month period. Coupon: The yield for the UK Index Linked Tracker is calculated on a coupon basis. This takes into account only the expected coupons for each underlying asset. The past performance information for OEICs funds include the performance of the Unit Trusts which existed prior to their conversion to OEICs. Where the performance of the Unit Trust is included we have used the bid price on the units.

These funds are available to existing customers who already hold shares in these funds. New customers should contact their adviser or Scottish Widows for information on fund availability. Full terms and conditions are available on request from Scottish Widows using the contact details provided. Charges, terms and the selection of funds we make available may change. For further information on any of the above Scottish Widows OEIC funds contact your Financial Adviser or telephone our contact centre on 0345 716 6777. We may record and monitor to help us improve our service.

OEIC funds with Benchmark, managed by Schroders Investment Management - Performance Statistics 1 November 2023

Past performance figures for SWUTM OEIC funds and their benchmarks are shown below. For funds which don't have a benchmark, see 'OEIC funds without a benchmark'.

Fund/Benchmark	Description	Discrete Annual Performance (%)					Performance Change (%)	
		Q3 2022-Q3 2023	Q3 2021-Q3 2022	Q3 2020-Q3 2021	Q3 2019-Q3 2020	Q3 2018-Q3 2019	3 Years	5 Years
High Income Bond	The benchmark index for the Fund is the Bloomberg Barclays Global High Yield Index hedged back to Sterling. The Fund is actively managed by the Investment Adviser who chooses investments with the aim of outperforming the Index by 1.5% per annum on a rolling 3 year basis, before deduction of fees. The Bloomberg Barclays Global High Yield Index hedged back to Sterling Index has been selected as an appropriate benchmark as it provides a representation of the returns of securities in the high yield bond market.	8.78	-16.87	-	-	-	-2.60	-
Bloomberg Barclays Global High Yield Index hedged back to Sterling Index + Outperformance Target of 1.5%		12.64	-16.43	11.10	1.86	6.00	3.44	13.62
Gilt	The benchmark index for the Fund is the FTSE Actuaries UK Conventional Gilts All Stocks Index. The Fund is actively managed by the Investment Adviser who chooses investments with the aim of outperforming the Index by 0.75% per annum on a rolling 3 year basis, before deduction of fees. The FTSE Actuaries UK Conventional Gilts All Stocks Index has been selected as an appropriate benchmark as it provides a representation of the returns of securities in the government bond (gilt) market.	-1.60	-26.87	-	-	-	-33.26	-
FTSE Actuaries UK Conventional Gilts All Stocks Index + Outperformance Target of 0.75%		-1.74	-22.71	-6.12	4.18	14.22	-28.58	-16.24
Regular Income	The figures reflect past performance of the Fund and its benchmark. The benchmark is a blend, 75% consists of the FTSE All-Share Index and 25% consists of the iBoxx Sterling Corporate & Collateralised Index. The percentages of the underlying benchmark indices have been selected to reflect the Fund's long-term exposure to shares and bonds. We believe the indices provide a reasonable representation of returns in those markets. The Fund Manager aims to provide an income return in excess of 110% of the benchmark income yield each year before deduction of fees (index yields are calculated by totalling the annual income paid and dividing it by the respective total value of each index). The Fund Manager also aims to outperform the benchmark on a rolling 3 year basis, before deduction of fees.	14.41	-12.18	17.78	-13.55	1.27	19.22 (1)	6.09 (4)
Benchmark		12.55	-9.30	19.14	-10.99	4.78	20.78	14.03
Environmental Investor	The figures illustrate past performance of the Fund and its benchmark, the FTSE All-Share Index. This has been selected as an appropriate benchmark as	5.77	-12.28	12.68	2.89	8.33	3.94	21.95

Fund/Benchmark	Description	Discrete Annual Performance (%)					Performance Change (%)	
		Q3 2022-Q3 2023	Q3 2021-Q3 2022	Q3 2020-Q3 2021	Q3 2019-Q3 2020	Q3 2018-Q3 2019	3 Years	5 Years
	it provides a representation of the returns of securities in the UK equity market. The Fund Manager selects shares that meet the Fund's environmental criteria from a diverse range of UK shares including those from outside of the FTSE All-Share Index. The Fund Manager seeks to outperform the Index by 3% per annum on a rolling 3 year basis, before deduction of fees. This outperformance target is applied to the index and we illustrate it in the figures from 7 August 2019 onwards. Prior to this date the Fund aimed to outperform its benchmark.							
Ethical	The figures illustrate past performance of the Fund and its benchmark, the FTSE All-Share Index. This has been selected as an appropriate benchmark as it provides a representation of the returns of securities in the UK equity market. The Fund Manager selects shares that meet the Fund's ethical criteria from a diverse range of UK shares including those from outside of the FTSE All-Share Index. The Fund Manager seeks to outperform the Index by 3% per annum on a rolling 3 year basis, before deduction of fees. This outperformance target is applied to the index and we illustrate it in the figures from 7 August 2019 onwards. Prior to this date the Fund aimed to outperform its benchmark.	11.22	-12.53	19.32	-14.15	7.19	18.58	15.53
UK Select Growth	The figures illustrate past performance of the Fund and its benchmark, the FTSE All-Share Index. This has been selected as an appropriate benchmark as it provides a representation of the returns of securities in the UK equity market. The Fund Manager seeks to outperform the Index by 3% per annum on a rolling 3 year basis, before deduction of fees. This outperformance target is applied to the index and we illustrate it in the figures from 7 August 2019 onwards. Prior to this date the Fund aimed to outperform its benchmark.	15.83	-19.44	24.33	-11.45	6.52	18.61 (3)	15.39 (3)
Benchmark		17.24	-1.12	31.73	-14.09	3.13	52.31	37.24
UK Equity Income	The figures reflect past performance of the Fund and its benchmark, the FTSE All-Share Index. This has been selected as an appropriate benchmark as it provides a representation of the returns of securities in the UK equity market. The Fund Manager aims to deliver an income of 110% of the dividend yield of the FTSE All-Share Index on a rolling 3 year basis, before deduction of fees. The Fund also aims to outperform the Index by 1.25% per annum on a rolling 3 year basis, before deduction of fees. This outperformance target is applied to the Index and we illustrate it in the figures from 7 August 2019 onwards. Prior to this date the Fund aimed to outperform its benchmark.	17.04	-8.10	23.94	-21.27	-0.86	34.97 (3)	7.05 (4)
UK Growth	The figures illustrate past performance of the Fund and its benchmark, the FTSE All-Share Index. This has been selected as an appropriate benchmark as it provides a representation of the returns of securities in the UK equity market. The Fund Manager seeks to outperform the Index by 1.25% per annum on a rolling 3 year basis, before deduction of fees. This outperformance target is applied to the index and we illustrate it in the figures from 7 August 2019 onwards. Prior to this date the Fund aimed to outperform its benchmark.	18.72	-10.92	21.32	-19.40	-0.51	30.07 (2)	6.77 (3)

Fund/Benchmark	Description	Discrete Annual Performance (%)					Performance Change (%)	
		Q3 2022-Q3 2023	Q3 2021-Q3 2022	Q3 2020-Q3 2021	Q3 2019-Q3 2020	Q3 2018-Q3 2019	3 Years	5 Years
Benchmark		15.26	-2.80	29.49	-15.55	2.87	44.67	27.64
Corporate Bond	The benchmark index for the Fund is the iBOXX Sterling Corporate and Collateralised Index. The Fund is actively managed by the Investment Adviser who chooses investments with the aim of outperforming the Index by 0.75% per annum on a rolling 3 year basis, before deduction of fees. The iBOXX Sterling Corporate and Collateralised Index has been selected as an appropriate benchmark as it provides a representation of the returns of securities in the sterling investment grade corporate bond market.	7.00	-25.95	-	-	-	-21.35	-
iBoxx Sterling Corporate and Collateralised Index + Outperformance Target of 0.75%		8.84	-23.41	0.88	5.01	11.76	-16.13	-1.90
Strategic Income	The benchmark for the Fund is a blended return of the iBOXX Sterling Corporate and Collateralised Index and Bloomberg Barclays Pan European High Yield Index ex Financials (Issuer Constrained) Index. 70% of the Benchmark will consist of the iBOXX Sterling Corporate and Collateralised Index and 30% of the Bloomberg Barclays Pan European High Yield Index ex Financials (Issuer Constrained) Index. The Fund is actively managed by the Investment Adviser who chooses investments with the aim of outperforming the Benchmark by 0.75% per annum on a rolling 3 year basis, before deduction of fees. The iBOXX Sterling Corporate and Collateralised Index has been selected as an appropriate benchmark as it provides a representation of the returns of securities in the sterling investment grade corporate bond market. The Bloomberg Barclays Pan European High Yield Index ex Financials Index has been selected as an appropriate benchmark as it provides a representation of non-investment grade European corporate bonds. It excludes financial institutions and emerging market bonds.	8.89	-24.67	-	-	-	-16.09	-
70% iBOXX Sterling Corporate and Collateralised Index and 30% Bloomberg Barclays Pan European High Yield Index ex Financials (Issuer Constrained) Index + Outperformance target of 0.75%		10.92	-20.21	3.73	3.56	10.08	-8.53	4.42
International Bond	The benchmark index for the Fund is the JPM Global Government Bond Index. The Fund is actively managed by the Investment Adviser who chooses investments with the aim of outperforming the Index by 0.75% per annum on a rolling 3 year basis, before deduction of fees. The JPM Global Government Bond Index has been selected as an appropriate benchmark as it provides a representation of the returns of securities in the global government bond market.	-9.99	-7.12	-	-	-	-23.35 (4)	-

Fund/Benchmark	Description	Discrete Annual Performance (%)					Performance Change (%)	
		Q3 2022-Q3 2023	Q3 2021-Q3 2022	Q3 2020-Q3 2021	Q3 2019-Q3 2020	Q3 2018-Q3 2019	3 Years	5 Years

Japan Growth	The figures illustrate past performance of the Fund and its benchmark, the MSCI Japan Index. This has been selected as an appropriate benchmark as it provides a representation of the returns of securities in the Japanese equities market. The Fund Manager seeks to outperform the Index by 1.25% per annum on a rolling 3 year basis, before deduction of fees. This outperformance target is applied to the index and we illustrate it in the figures from 7 August 2019 onwards. Prior to this date the Fund aimed to outperform its benchmark.	19.15	-12.98	18.91	-3.78	-0.94	20.96 (1)	19.30 (3)
Benchmark		16.60	-13.54	18.50	3.18	1.04	16.65	28.20
UK Smaller Companies	The figures illustrate past performance of the Fund and its benchmark, the Numis Smaller Companies excluding Investment Trusts Index. This has been selected as an appropriate benchmark as it provides a representation of the returns of smaller UK listed companies by value. The Fund Manager seeks to outperform the Index by 3% per annum on a rolling 3 year basis, before deduction of fees. This outperformance target is applied to the index and we illustrate it in the figures from 7 August 2019 onwards. Prior to this date the Fund aimed to outperform its benchmark.	7.23	-29.20	40.62	-9.00	-8.38	2.34 (2)	-4.16 (3)
Benchmark		15.18	-22.87	50.31	-6.91	-3.63	23.74	20.39

Fund/Benchmark	Description	Discrete Annual Performance (%)					Performance Change (%)	
		Q3 2022-Q3 2023	Q3 2021-Q3 2022	Q3 2020-Q3 2021	Q3 2019-Q3 2020	Q3 2018-Q3 2019	3 Years	5 Years
American Growth	The figures illustrate past performance of the Fund and its benchmark, the S&P 500 Index. This has been selected as an appropriate benchmark as it provides a representation of the returns of securities in the North American equities market. The Fund Manager seeks to outperform the Index by 1.25% per annum on a rolling 3 year basis, before deduction of fees. This outperformance target is applied to the index and we illustrate it in the figures from 7 August 2019 onwards. Prior to this date the Fund aimed to outperform its benchmark.	9.13	4.87	25.62	6.40	6.29	43.75 (1)	68.54 (2)
Benchmark		12.62	3.38	26.21	11.14	9.97	48.66	86.23
Cash	From August 2019 to June 2021 the Fund's benchmark was LIBOR with an outperformance target of 0.05% per annum on a rolling 3 year basis, before deduction of fees. This benchmark and outperformance target is illustrated in the figures from 7 August 2019 to 21 June 2021. In June 2021 we changed the benchmark to the Sterling Overnight Index Average (SONIA) with an outperformance target of 0.1% per annum on a rolling 3 year basis, before deduction of fees. This is illustrated in the benchmark figures from 22 June 2021 onwards. SONIA has been selected as an appropriate benchmark as it provides a representation of the returns of cash-like securities in the UK market. Prior to August 2019 the Fund aimed to outperform its benchmark.	3.58	0.06	-0.56	-0.06	0.23	3.56 (4)	3.62 (4)
Benchmark		4.07	0.82	0.02	0.27	0.58	5.42	6.26

Source: Financial Express as at 31.10.2023. Performance figures are in £ sterling on a single pricing basis, with income (where applicable) reinvested net of UK tax and net of total annual fund charges. The figures do not include any initial charge or other product charge(s) that may be applicable. Past performance is not a reliable indicator of future results. The value of an investment is not guaranteed and can go up and down depending on investment performance (and currency exchange rates where a fund invests overseas). Yields may vary, data as at 31.10.2023. Effective Yield: The yield quoted for bond funds is determined by the effective yield of the underlying assets. 'Effective yield' is defined by the IA, and takes account of all expected cash flows over the lifetime of each underlying asset, including differences between the purchase and redemption prices. Historic Yield: The yield quoted for equity funds is an historic yield based on distributions paid over the previous 12 month period. Coupon: The yield for the UK Index Linked Tracker is calculated on a coupon basis. This takes into account only the expected coupons for each underlying asset. The past performance information for OEICs funds include the performance of the Unit Trusts which existed prior to their conversion to OEICs. Where the performance of the Unit Trust is included we have used the bid price on the units.

These funds are available to existing customers who already hold shares in these funds. New customers should contact their adviser or Scottish Widows for information on fund availability. Full terms and conditions are available on request from Scottish Widows using the contact details provided. Charges, terms and the selection of funds we make available may change. For further information on any of the above Scottish Widows OEIC funds contact your Financial Adviser or telephone our contact centre on 0345 716 6777. We may record and monitor to help us improve our service.

OEIC funds with Benchmark, managed by Blackrock Investment Management U.K. - Performance Statistics 1 November 2023

OEIC funds without a benchmark, managed by Schroders Investment Management 1 November 2023

Funds without a Benchmark - We do not quote a benchmark or outperformance target for the Fund(s) below. This is because the asset allocation of the Fund(s) will change over time. For these funds we've suggested an Investment Association sector which investors can use to compare with their fund's performance. Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers) to help investors compare funds with broadly similar characteristics.

Funds	Sector Description
-------	--------------------

More information on the sectors, including performance figures, can be found at www.theinvestmentassociation.org/fund-sectors
