Relative Risk Profile

These risk ratings are only applicable to funds available via TargetPlan. Other risk ratings apply across the rest of our fund range and they, or ratings from other providers, are not comparable. Be aware that even lower risk investments can fall in value.

Fund objective

This fund is aimed at investors who plan to set-up a guaranteed income (annuity) within the next 5 years. The fund invests in a mix of fixed interest securities including UK government bonds (known as gilts), corporate bonds (loans to companies) and cash. It aims to achieve a reasonably predictable level of annuity income, although this cannot be guaranteed. Typically, if the value of long-dated gilts goes down, annuity rates tend to go up and vice versa. So even if the fund value goes down just before you retire, you'll be able to buy roughly the same level of income (size of pension) – although this relationship isn't perfect and there's no guarantee that the objective will be met. You should also be aware that if you keep too much money in this fund over the long term, the value of your investment could be eroded by inflation.

Fund performance

The following graph and tables show the performance of the fund over various time periods compared to the fund's benchmark (if there is one). All performance information is as at 29 Feb 2024 unless otherwise stated.

In the graph, performance is shown since launch if the fund is less than five years old.

Aegon TargetPlan Annuity Pathway Pn

Aegon TargetPlan Annuity Pathway: plan to set up guaranteed income within next five years

Differences in performance reporting between fund and benchmark may arise due to the impact of timing, charges, cashflows, and the pricing basis of the underlying fund. Fund returns are calculated on a total return basis with dividends reinvested.

The value of your plan depends directly on a number of things, including the level of your pensions savings, charges, investment returns and the annuity rates available to buy your pension income when you decide to take your benefits. Levels and basis of, and reliefs from, taxation can also change. Any money that you invest in the plan is tied up until you take your retirement benefits. You cannot normally take the benefits until at least the age of 55.

If the name of the Fund includes "BlackRock", "BlackRock" may be abbreviated to "BLK" on some materials such as Annual Benefit Statements.
