OUR DESIGN PRINCIPLES

OUR DESIGN PRINCIPLES

1
CONSIDER EVERYONE EVERYWHERE

2
OUR DESIGN IS CALMING AND SIMPLE

3
BE BOLD AND CONFIDENT

4
BLUE IS OUR COLOUR AND ACCENTS
ARE DESIGNED TO ENHANCE

5
RESPECT NEGATIVE SPACE, MORE IS NOT MORE

6
LEAN INTO THE FUTURE, THINK DIGITAL FIRST

7
OUR VOICE HAS HUMANITY, HONESTY AND INTELLIGENCE

8
OUR STORIES ARE POWERFULLY TOLD, REFLECTING
DIFFERENT PERSPECTIVES

9
QUALITY IS DIFFICULT TO DEFINE, ALTHOUGH IT'S
EMBEDDED IN EVERYTHING WE DO

10
REFINE, REFINE, REFINE

CORE ELEMENTS
SYMBOL TRANSPARENCY

1 Primary (Divorced)

We can control our logo usage across creative applications. Our logotype and symbol can be displayed together, but divorced, following the sizing relationship principle. The symbol should always be positioned below the logotype.

RATHBONES

2 Secondary (Logo lockup)

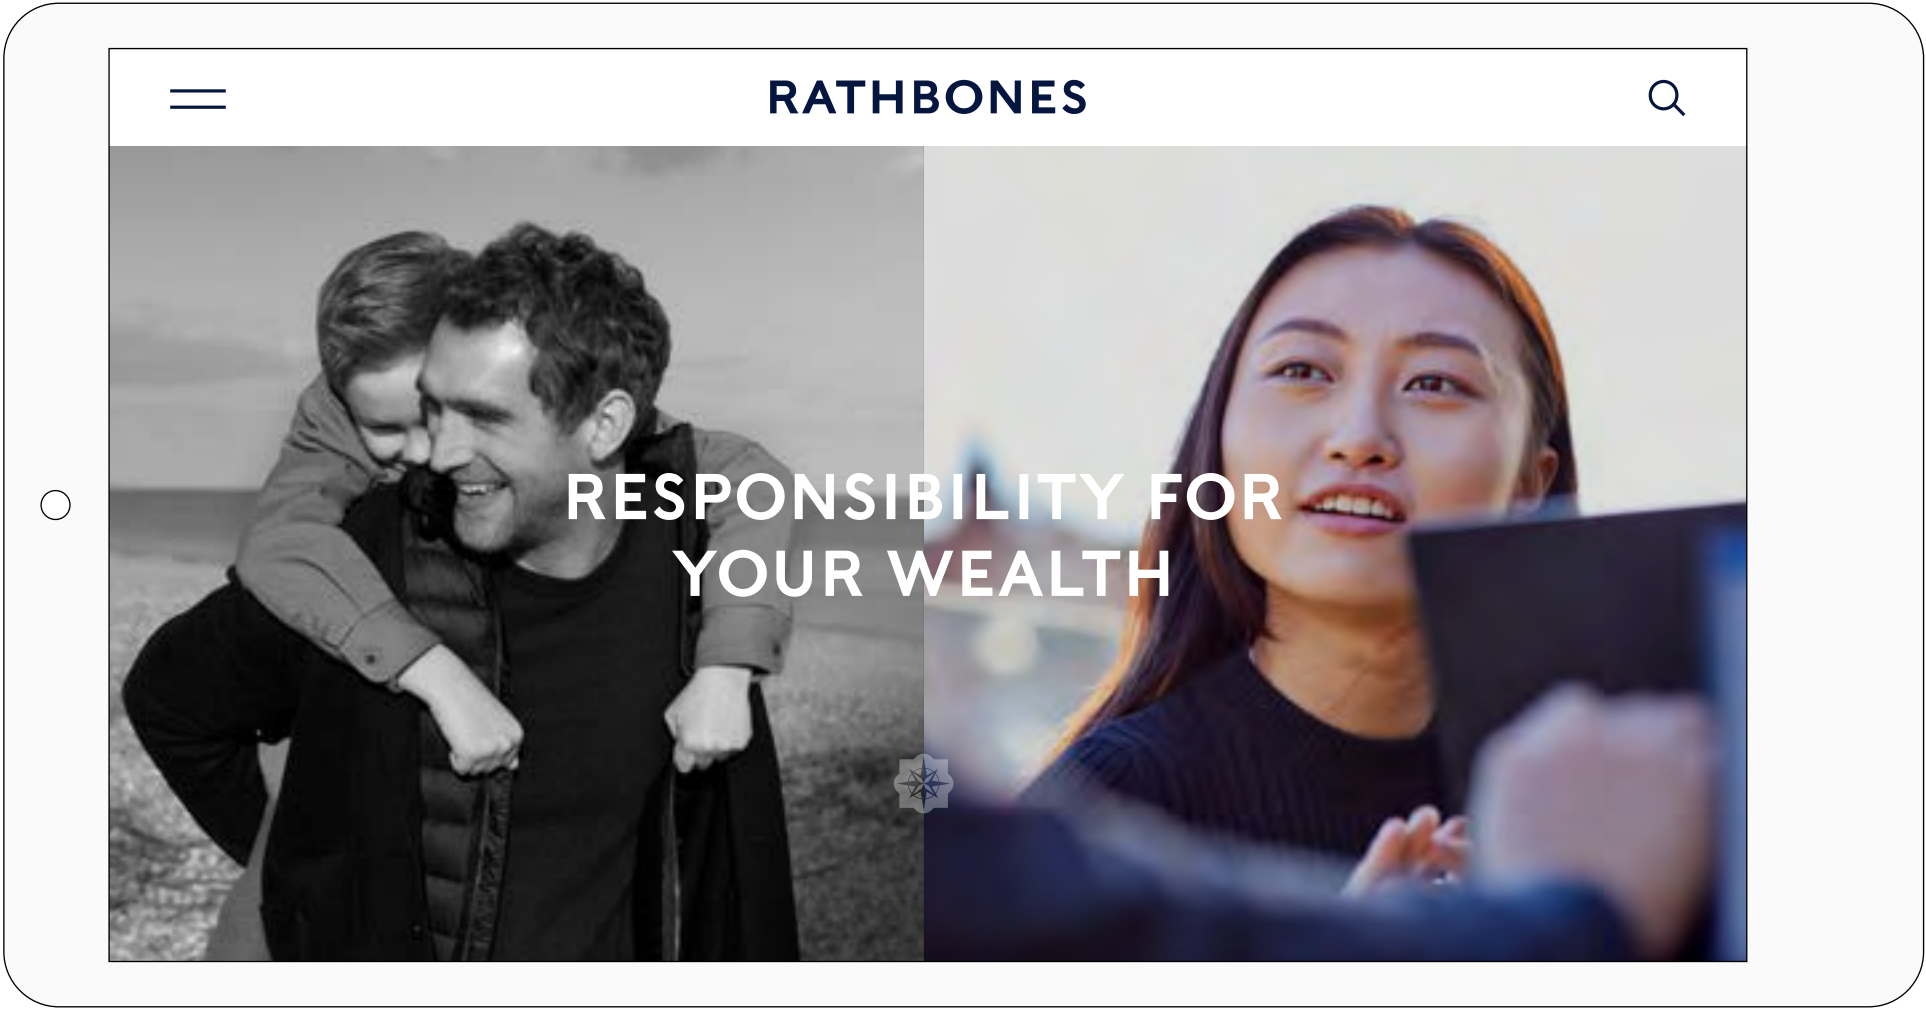

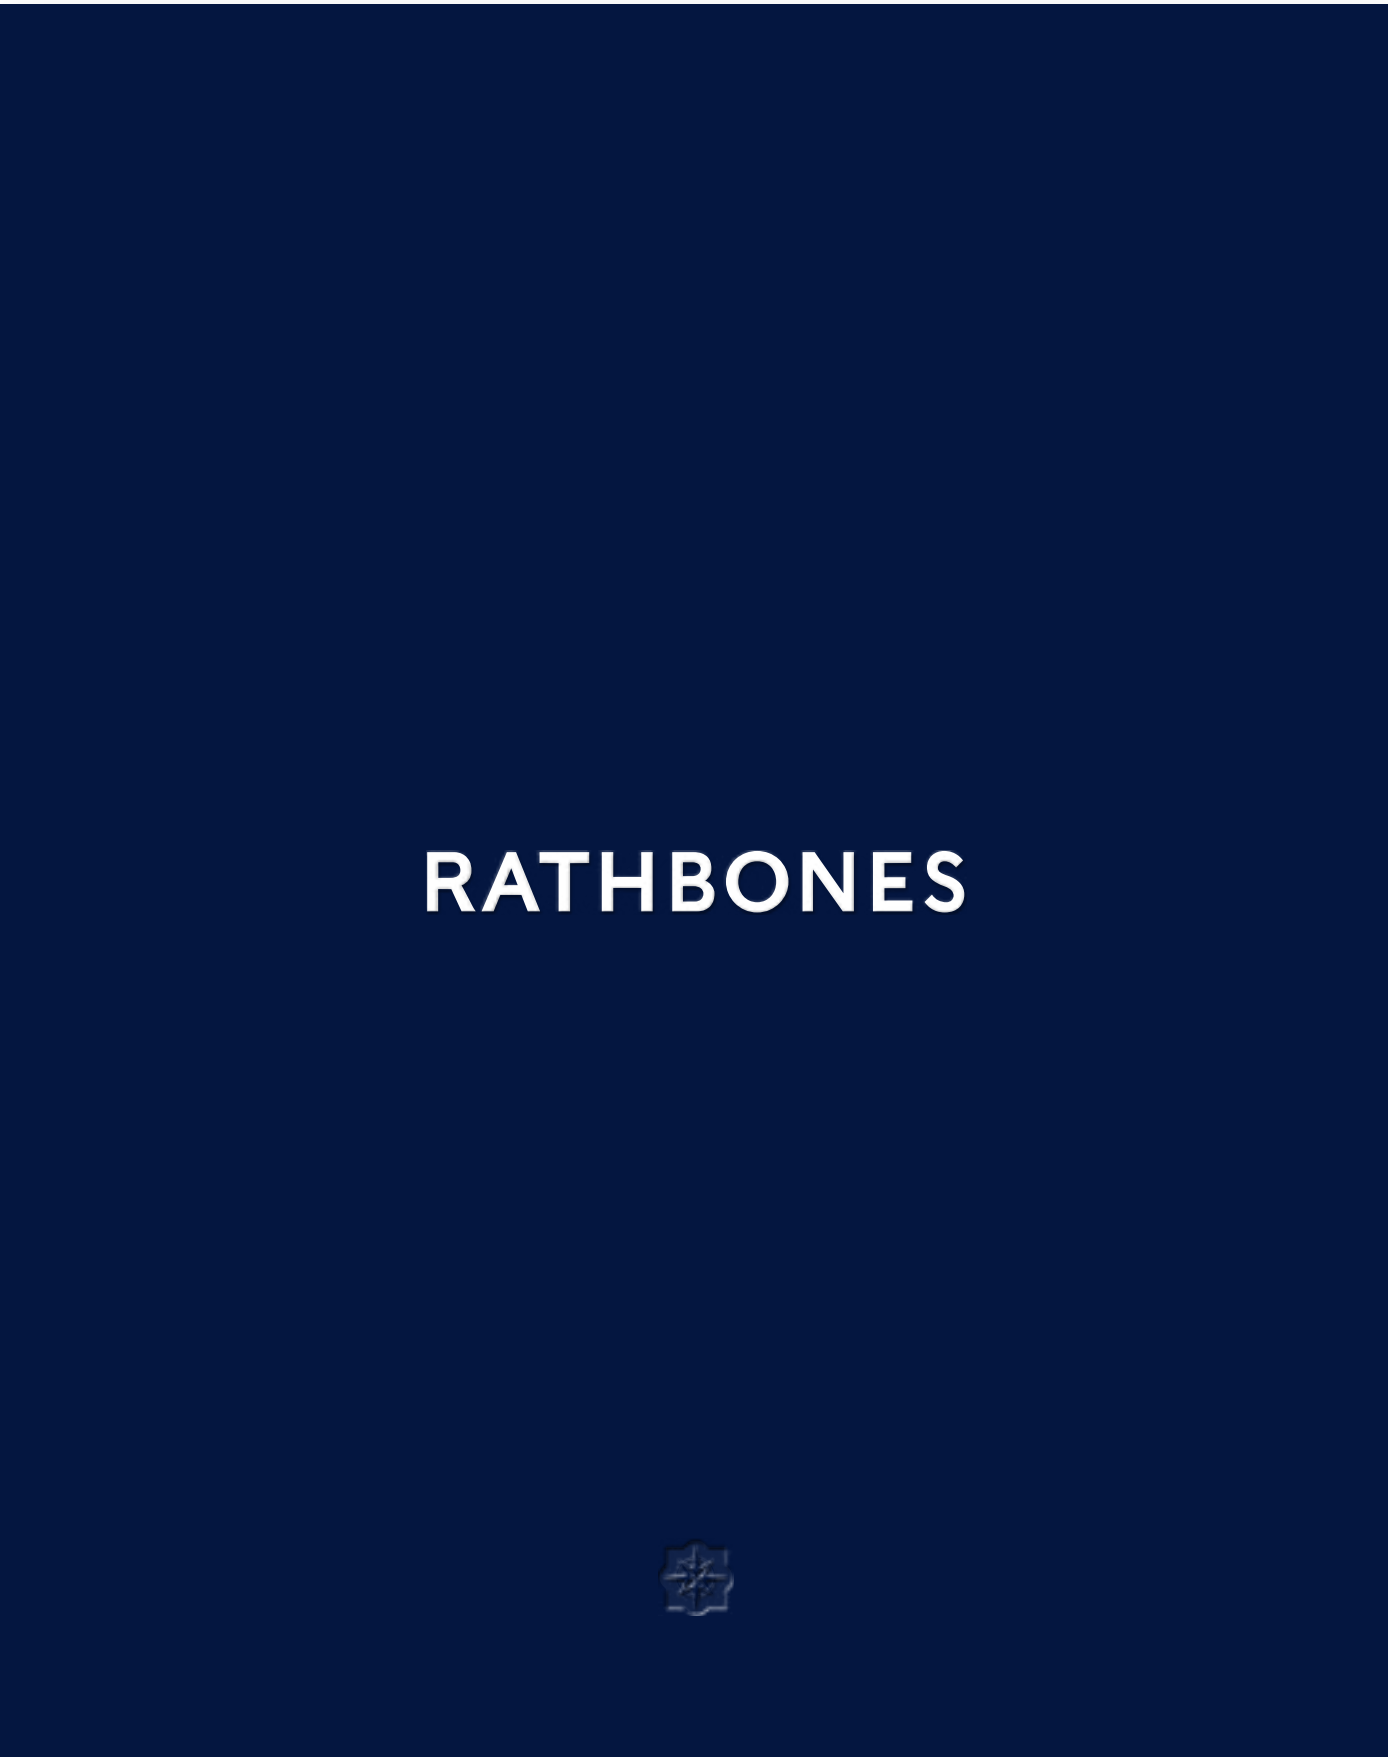

Our logo lockup should only be used when space is limited or when it needs to be supplied externally and its use cannot be controlled. Our logo lockup is an asset and should never be recreated.

3 Logotype Only

Our logotype should only be used without the symbol when it is not possible to reproduce the symbol below the minimum size specified (9mm).

Less than 9mm  RATHBONES

LOGOTYPE ONLY

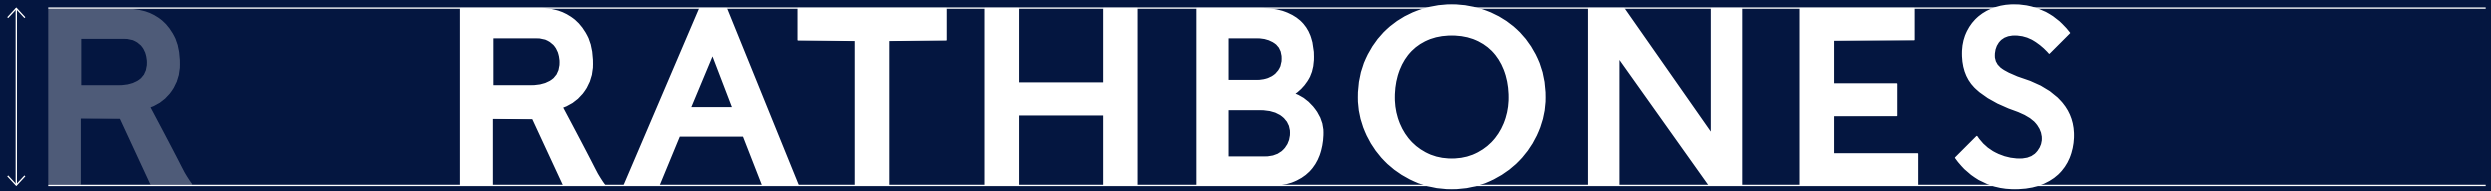

3 Logotype Only
Our logotype should only be used
without the symbol when it is not possible
to print the symbol below the minimum
size specified (9mm).

1.3
CORE ELEMENTS
LOGO RELATIONSHIP

Our logotype and symbol should always adhere to the following sizing relationship principle.

The square shape within our symbol should be the same height as the ‘R’ cap height from our logotype.

1.3
CORE ELEMENTS
LOGO RELATIONSHIP

Our logotype should only be displayed on our navigation. This should follow our minimum clear space area.

Please follow rathbones.com for size relationship and proportions for our logo.

CORE ELEMENTS
LOGO RELATIONSHIP

Our website loading page features our symbol slowly rotating in motion.

Our symbol is positioned central to the screen and should only appear when first loading our website, not between loading a new page within the site.

Our symbol on the website loading page should follow the sizes listed below:

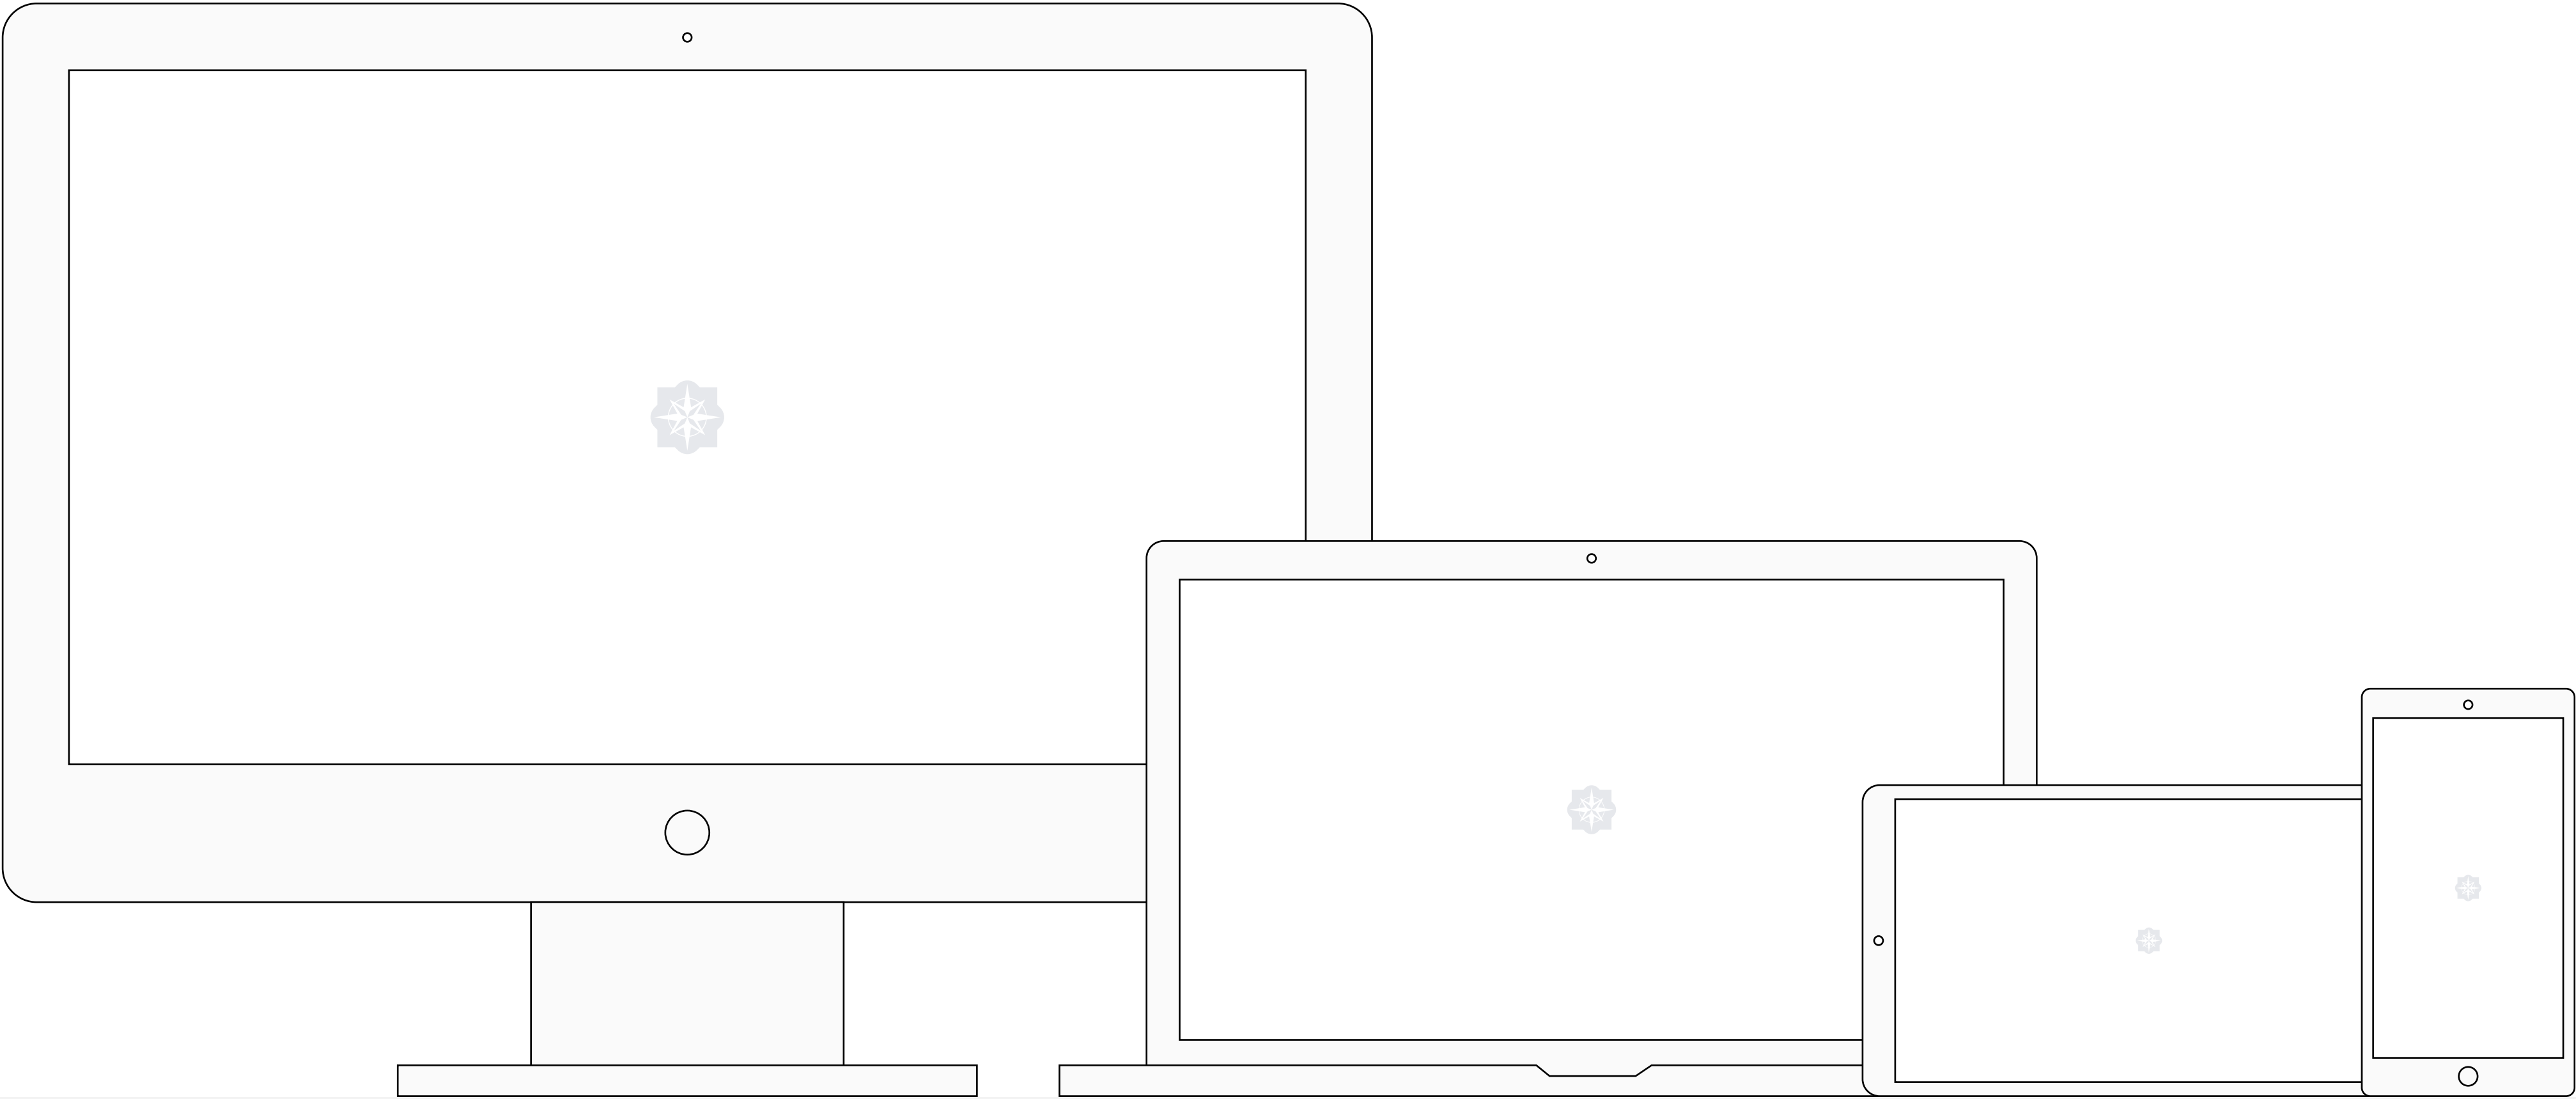

1680px screen size
100px x 100px

1280px screen size
66px x 66px

768px screen size
40px x 40px

414px screen size
40px x 40px

Our logotype and symbol can be displayed together, but they should be divorced in position to one another.

Three column body copy for dense copy lengths

Headings, statistics, body copy headings and captions are typeset in Rathbones Sans. Body copy only set using Guardian Egyptian Light.

AMERICA MAY BE RUNNING OUT OF GAS BUT EUROPE IS ALMOST ON EMPTY

THE ECONOMIC OUTLOOK HAS DETERIORATED AROUND THE WORLD RECENTLY, BUT THERE ARE SOME KEY DIFFERENCES BETWEEN THE CHALLENGES FACING EACH OF THE WORLD’S LARGEST REGIONS. UNDERSTANDING THEM CAN HELP US ADAPT OUR INVESTMENT STRATEGY IN THE FACE OF AN INCREASINGLY DIFFICULT BACKDROP.

An energy supply shock of historic proportions is squeezing the UK and Eurozone. Russia has halted gas deliveries to Europe via the Nord Stream pipeline indefinitely, and wholesale gas prices are about nine times their 2015–21 average. Policies like the UK’s freeze on household and business energy prices should help to cushion the blow in the short term, limiting the hit to real incomes. (France has a similar ‘tariff shield’ policy, and governments across Europe have announced a variety of alternative measures to protect households from the full force of surging gas prices.)

Even so, recession seems highly likely. The UK economy has already begun to shrink, while the latest business surveys from the Eurozone are also consistent with contraction. Energy bills will still be high by past standards, although they won’t hit the stratospheric levels they might have done otherwise. In the UK, for example, Ofgem’s price cap on gas and electricity is to be frozen at levels equating to £2,500 annually for the average household’s consumption, compared with £1,971 currently and £1,277 at the end of last year. Without a freeze, the cap could have risen to more than £5,000 in early 2023. The large package of tax cuts announced by UK Chancellor Kwasi Kwarteng won’t help either, especially as the Bank of England—focused on reducing inflation “no ifs no buts” — is likely to increase interest rates much further in response.

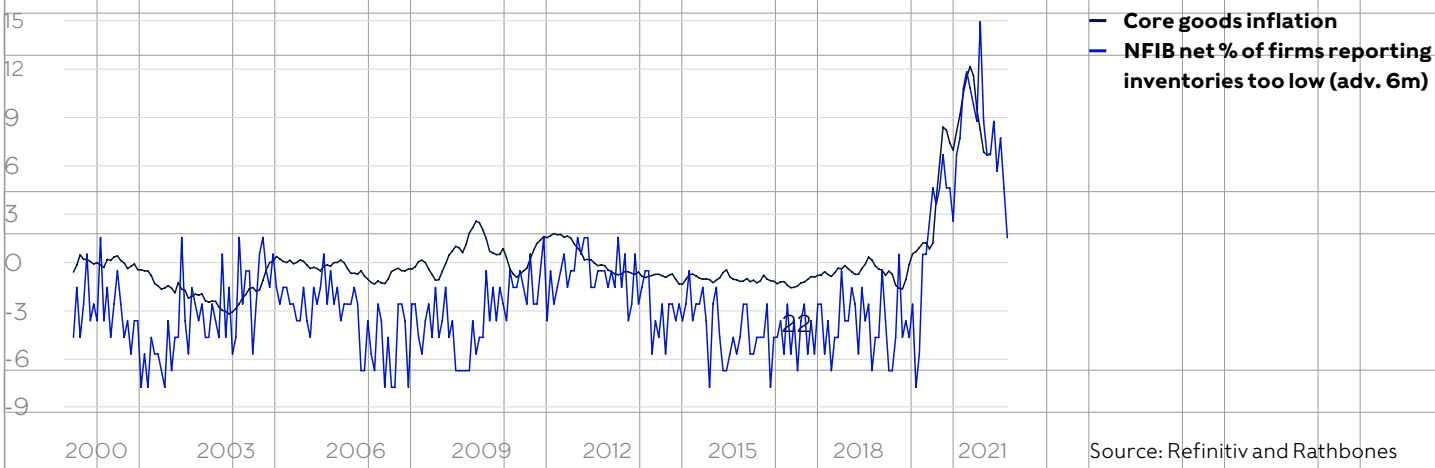

The economic outlook in the US isn’t quite as bad. In contrast to Europe, it is well insulated from the Russia energy shock. It has a much greater degree of energy

independence, and wholesale gas prices have risen by far less there than they have in Europe. Americans are starting from a position of relative strength too — we’ve written before about the large cushion of savings that they amassed during the acute phase of the pandemic.

Even so, a recession there in the coming quarters still appears more likely than not as the US Federal Reserve aggressively raises interest rates in its fight against high inflation. (For clarity, we’re not counting the two quarters of falling GDP in the US earlier this year as a recession — that had more to do with big swings in inventories than broad weakness in the economy.) The parts of the economy most sensitive to interest rates are starting to struggle, with the housing market the most obvious example. Home sales have already dropped by more than a quarter from their January peak, new building permits are down 10%, and the forward-looking components of key housing surveys suggest that more weakness is on the way.

Figure 1: US CPI core goods inflation and inventory shortages

Goods inflation has been falling as last year’s pandemic-induced disruption to global supply chains has continued to unwind.

Robust performance oversight

We want you to feel comfortable and secure knowing that we are managing your wealth according to the mandate you have given us. Our internal procedures and risk management systems make sure this happens.

While our investment managers enjoy flexibility and discretion to deliver our service to you, it is important to have a formal oversight framework to support the investment process. Our investment executive committee is responsible for establishing and overseeing this framework.

This committee makes sure we are managing all portfolios to the same high standards while being able to adapt to changing regulatory requirements and market conditions. It promotes best practice and oversees all aspects of the process from portfolio construction and investment selection to implementation.

This framework, supported by risk management systems, due diligence procedures and regular reviews, makes sure your portfolio remains in line with your investment objectives.

Corporate governance

We prefer to invest in companies with high standards of corporate governance as they prioritise the interests of shareholders rather than those of management. We monitor the actions, policies and decisions of the boards of companies we invest in and participate in voting at annual general meetings and extraordinary general meetings. This makes sure that your interests as a shareholder are protected. Emsf quatibusam int mollorempos qui del idit eum et unt voluptas iur moloria eptur. 1.7
CORE ELEMENTS
FULL COLOUR

Our art direction can be used as a single image full colour.

Our art direction can be used as a 50/50 image combination. When selecting two images, consider the contrast between the two images to create one composition.

We can use two images in full colour together.

Our art direction can be used as a single image in black and white.

Our art direction can be used as a 50/50 image combination. When selecting two images, consider the contrast between the two images to create one composition.

We can use one image in black and white with the other in full colour together. We never use the combination of two black and white images together.

One word headlines positioned central
to the 50/50 composition.
