FUND OBJECTIVE AND POLICY

The Fund's objective is to provide income with the potential for capital growth over 5+ years. The Fund has a target annual income of 3 - 4% per annum (not guaranteed). The Fund aims to stay within a risk profile classification (RPC) (with volatility parameters) of 4 as set and monitored by an external risk rating company (not guaranteed). The Fund is in the Santander Atlas Portfolio range. The lower the RPC number, typically the lower the fund's volatility (exposure to more volatile assets e.g. shares). More information on volatility and RPCs is provided in the Prospectus glossary. The Fund is actively managed and invests 80-100% in other Collective Investment Schemes (CIS). It obtains exposure globally (inc. non-developed markets) to: bonds, and company shares; up to: 20% to alternative strategies, 10% to commodities, 10% to real estate, and 15% to cash/cash like instruments. Typically it will invest at least 70% in a combination of shares and bonds. Derivatives (inc. passives) will be used regularly for investment purposes and efficient portfolio management (inc. hedging). The ACD considers market, economic and geopolitical outlook in choosing asset/sub-asset classes, geographies and sectors to seek exposure to, and uses its expertise (active management) to select CIS. The ACD will tend to favour actively managed CIS, but up to 100% of the Fund can be in passively managed CIS (typically 35-50%). The Fund is not managed with reference to a benchmark, and the Comparator Benchmark has been chosen as it provides comparison of performance against a sector that largely consists of other multi asset funds which have the ability to invest globally.

5 YEAR CUMULATIVE PERFORMANCE

Share Class Launch Date

11/12/2008

Past performance is not a reliable indicator of future results. The value of investments and revenue from them can fall as well as rise and investors may not get back the amount originally invested. Please note that the value of any foreign investments may be affected by changes in currency exchange rates.

REALOBJECTS PDFReactor®

Evaluation Version

This PDF document was created by an evaluation version of RealObjects PDFReactor 11.6.10 (15798). The evaluation version is fully functional, but includes this information page. It must not be used for production purposes. The information page and all other evaluation notices must not be removed from the PDF file.

NOTE: Conversions in evaluation mode might be slower and the results might have a larger file size than in production mode.

About PDFReactor

RealObjects PDFReactor is a powerful formatting processor for converting HTML and XML documents into PDF. It uses Cascading Style Sheets (CSS) to define page layout and styles. The server-side tool enables a great variety of applications in the fields of ERP, eCommerce and Electronic Publishing.

PDFReactor supports HTML5, CSS3 and JavaScript.

It allows you to dynamically generate PDF documents such as invoices, delivery notes and shipping documents on-the-fly. PDFReactor allows you to easily add server-based PDF generation functionality to your application or service. Since PDFReactor runs on a server, the end-user in general does not need any software other than a PDF viewer.

RISK AND REWARD PROFILE

LOWER RISK

HIGHER RISK

Typically lower rewards

Typically higher rewards

Risk and Reward Indicator: The Risk and Reward Indicator table shown above demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money, and the lowest risk and reward indicator does not mean risk free. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The value of your investment is not guaranteed and you may get back less than the original amount you invested. Investors should refer to the most up to date Key Investor Information Document available from our website.
