About fund performance

Investors should always consider performance in relation to the objective of the fund and over periods of at least five years. If a fund has risen in value, it doesn't mean it is meeting its objective – especially if the fund is aiming to outperform a particular benchmark or meet a risk target. The same applies if the fund has fallen in value.

Fund objective

The objective of the Fund is to achieve a high level of income (greater than the income return of the FTSE ALL Share Index over a rolling 5 year period) and capital growth over the long term (5 years plus). The Fund invests at least 80% of its assets in shares of companies incorporated, domiciled or carrying out the main part of their economic activity in the UK. The Fund may also invest in private and unlisted equities and non-UK companies. The Fund may use derivatives (complex instruments) to manage the Fund more efficiently, with the aim of reducing risk, reducing costs and/or generating additional capital or income. The Fund has an active investment approach based on stock selection driven by the fund manager's assessment of valuation and invests in companies that enable the Fund to grow its dividend and deliver capital appreciation. The Fund is not constrained by a benchmark and has a flexible approach with no inbuilt bias to sector or company size.

Fund performance

The following graph and tables show the performance of the fund over various time periods compared to the fund's benchmark (if there is one). All performance information is as at 30 Jun 2024 unless otherwise stated.

In the graph, performance is shown since launch if the fund is less than five years old.
