Fund performance data is based on a single price basis, net of fees and expenses deducted from the unit price. Other charges may apply, which are specific to individual plans.

The Fund aims to achieve a total return (by way of income and capital appreciation) through investments that are deemed to be supporting and funding socially beneficial activities and development, primarily in the UK. The investment policy is to maximise exposure to socially beneficial activities and development, based on assessments produced under the fund's Social Assessment Methodology. The fund may invest in all forms of trade-able debt instrument (primarily investment grade) issued by a supranational, public, private or voluntary and/or charitable sector organisation, including without limitation, bonds, notes, bills, and loans, whether they have a fixed, floating, variable, index-linked rate or have a zero coupon. Please note: the Scottish Widows unlinked funds aim to provide long-term growth in the price of units. Any income generated will not be distributed, but added to the fund value.

Things you need to know

All funds carry some risk and you should consider these risks before making an investment decision. The value of investments and any income from them can fall as well as rise and will be reduced in real terms by the effects of inflation.

The main factors which may increase the risk of this fund include:

- The amount invested in company shares
- The split between government and corporate bonds
- The extent to which the fund invests in high yield assets
- The amount held in overseas assets
- Any concentration in specific areas or sectors

All or some of the investments are made through a reinsurance arrangement so if the linked life insurance company(ies) were to fail you may lose some or all of your money and this will not be covered by the Financial Services Compensation Scheme.
