What is this product?

Type:

This is an open-ended UCITS Fund.

Term:

There is no maturity date of the Fund.

Investment objective and investment policy:

The investment objective of the Fund is to achieve capital growth over the long term principally through investment in the securities of companies in the Americas. The Fund aims to achieve a return, over the long term, above the return of the Russell 1000 Net 30% Total Return Index ("the benchmark"). The Index has been chosen as the comparator benchmark because it includes a broad universe of US equities which is representative of the US equity market.

The investment policy of the Fund is to invest principally in securities of U.S., Canadian and Latin American companies listed or traded on Recognised Markets in the United States, Canada and Latin America. Investment in Latin American securities will be limited to less than 10 per cent.

The Fund is actively managed using a disciplined stock selection approach that is based on the Investment Manager's investment philosophy. The Investment Manager's investment decisions are not influenced by the constituents of the benchmark and, as a result, the composition of the Fund and its performance is likely to differ significantly from that of the benchmark.

Although the intention of the Fund is to invest predominantly in the shares of companies, it may also invest in cash, money market investments and debt instruments such as bonds. This would be for the efficient operation of the Fund or as considered to be in the best interests of the Fund; for example, during periods of market uncertainty where it is deemed appropriate for defensive purposes.

The Fund is categorised as an Article 8 Fund under the European Union Sustainable Finance Disclosure Regulation (SFDR).

The Fund's portfolio has a base currency of US Dollars while the Class I CHF Accumulation share class is priced in Swiss Franc. This means that the investments will be subject to positive or negative fluctuations in currency exchange rates.

Benchmark:

The Russell 1000 Net 30% Total Return Index has been chosen as the comparator benchmark because it includes a broad universe of US equities which is representative of the US equity market.

Intended Retail Investor:

The Fund may be suitable for investors who seek capital growth and have a long-term investment horizon (at least 5 years). Investors should have a basic knowledge of equity financial markets and the risks they are exposed to and be able to accept a level of volatility in the value of their Shares including bearing the loss of the full capital invested.

Distribution Policy:

The Directors do not anticipate paying a dividend in respect of the Accumulating Share Classes.

Dealing Frequency:

Investors can buy and sell shares on demand daily on any business day (but not on weekends, bank holidays in London or on days when the New York Stock Exchange is closed). In regard to Compulsory Redemptions, please refer to the following sections in the Prospectus: 'Investor restrictions', 'FATCA', 'CRS', & 'Termination of the ICAV/The Sub-Fund.'

Depository:

The Depository of the Fund is Northern Trust Fiduciary Services (Ireland) Limited.)

For full investment objectives and policy details, please refer to the Investment Objectives and Investment Policy in the Fund's Supplement to the Prospectus, which are available at www.findlaypark.com.

The most recent share price is available at www.findlaypark.com and from various information providers including Bloomberg and the Financial Times.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 5 out of 7, which is medium-high risk class.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown in this section.

Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the prospectus, available free of charge at: <https://www.findlaypark.com/> resources or by contacting the Administrator.
This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product/suitable benchmark over the last 5 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

What happens if Bridge Fund Management Limited is unable to pay out?

For the protection of investors, the Fund's assets are held by an independent depositary, so the Fund's ability to pay out would not be affected by the insolvency of Bridge Fund Management Limited. If the Fund is terminated or wound up, the assets will be liquidated, and you will receive an appropriate share of any proceeds but you may lose part or all of your investment. There is no compensation scheme protecting you from this scenario.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. The table below assumes that the product performs as shown in the moderate scenario and CHF10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	105 CHF	722 CHF
Annual cost impact (*)	1.1%	1.0% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.7% before costs and 10.6% after costs.
