

*This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.*

Date of Production 02 November 2023

You are about to purchase a product that is not simple and may be difficult to understand.

**Type:** The Fund is a sub-fund of Volare International UCITS ICAV (Volare Intl.), a UCITS authorised by the Central Bank of Ireland.  
**Term:** The Fund has no fixed maturity date, however it may be terminated in certain circumstances as described in the prospectus of Volare International UCITS ICAV (the "Prospectus").

**Objectives:** The Fund seeks to achieve its investment objective by investing up to 100% of its NAV in units of other CIS with a globally diverse portfolio primarily of equities and equity-related securities. The CIS into which the Fund may invest will be established as UCITS or AIFs and may include exchange-traded funds ("ETFs"), mutual funds, hedge funds and money market funds.

The Fund may also directly invest up to 100% of its NAV in equities and equity-related securities (including common shares, preferred shares, convertible stock, Depositary Receipts, rights issues, equity warrants which will not embed derivatives (held as a result of a corporate action only) and shares in real estate investment trusts ("REITs")) and up to 30% of its NAV in debt securities (exchange-traded commodities ("ETCs") and bonds). The Fund's direct exposure to REITs shall not exceed 30% of the Fund's NAV and to ETCs shall not exceed 10% of its NAV.

The Fund may invest up to 30% of its NAV in Money Market Instruments, cash and near-cash instruments which may comprise of treasury bills (T-bills), cash deposits and money market funds which may be acquired for ancillary liquid asset purposes.

The Investment Manager will invest directly in equities and debt securities where it is of the view that it is more efficient to do so, where the Investment Manager believes it allows for greater risk spreading or where the Investment Manager believes such investment will allow for greater diversification.

The Investment Manager has a robust due diligence process for the selection / ongoing monitoring of underlying CIS which includes: quantitative analysis, qualitative - portfolio analysis, external research, sub-committees of the Investment Manager, meetings - companies and funds and ongoing monitoring.

The Fund does not intend to concentrate on any particular industries, sector or region.

**Distribution:** Accumulating shares do not pay dividends. The annual result is capitalized (or reinvested). Distribution shares pay a dividend, insofar as the performance of the fund allows.

**Intended Retail Investor:**

**Depository:** CACEIS Investor Services Bank S.A., Dublin Branch.

**Further Information:** You can obtain copies of the Prospectus and the latest annual and semi-annual report and accounts for Volare International UCITS ICAV (Volare Intl.) along with latest prices of shares and other practical information from CACEIS Investor Services Bank S.A., Dublin Branch, George's Quay House, 43 Townsend Street, Dublin 2, Ireland.

### Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The risk indicator assumes you keep the product for a minimum of 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

We have classified this Portfolio as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the Fund's capacity to pay you.

**Currency Risk:** The Fund may invest in assets which are priced in currencies other than the Fund's base currency (USD). There is a risk of loss to the value of your investment arising from exchange-rate fluctuations, which may or may not be hedged.

**Emerging Market Risk:** The Fund may have exposure to emerging markets which may involve considerations not usually associated with investing in developed markets. There may be a lower level of investor protection available which could affect the safe-keeping or value of

assets.

**Liquidity Risk:** The Fund may hold assets that may be more difficult to sell at a reasonable price during adverse market conditions. Although it is not expected, liquidity risk has the potential to impact the Fund’s ability to meet redemption requests.

**Operational Risk:** The Fund may experience losses as a result of technology/system failures, human error, policy breaches or incorrect valuations.

**Equities Risk:** The values of equities are subject to changes in the issuing company’s financial condition and overall market and economic condition as well as market perception.

Other Material Risks relevant to the Portfolio not included in the summary risk indicator are set out in the Prospectus. This product does not include any protection from future market performance so you could lose some or all of your investment. If the Fund is not able to pay you what is owed, you could lose your entire investment.

---

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.5% before costs and -0.1% after costs.

# What are the risks and what could I get in return? (continued)

## Performance Scenarios

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest USD10,000.

The scenarios shown are illustrations using the worst, average, and best performance.

The scenarios presented are an estimate of future performance based on evidence from the past and are not an exact indicator. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all the costs of the product itself, where applicable, but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

| Recommended holding period: |                                                                                                                  | 5 years                  |                           |
|-----------------------------|------------------------------------------------------------------------------------------------------------------|--------------------------|---------------------------|
| Example Investment:         |                                                                                                                  | \$10000                  |                           |
|                             |                                                                                                                  | If you exit after 1 year | If you exit after 5 years |
| Scenarios                   |                                                                                                                  |                          |                           |
| Minimum                     | There is no minimum guaranteed return if you exit before 5 years. You could lose some or all of your investment. |                          |                           |
| Stress                      | What you might get back after costs                                                                              | \$4350                   | \$4510                    |
|                             | Average return each year                                                                                         | -56,50%                  | -14,72%                   |
| Unfavourable                | What you might get back after costs                                                                              | \$8030                   | \$8340                    |
|                             | Average return each year                                                                                         | -19,73%                  | -3,56%                    |
| Moderate                    | What you might get back after costs                                                                              | \$9770                   | \$9970                    |
|                             | Average return each year                                                                                         | -2,33%                   | -0,06%                    |
| Favourable                  | What you might get back after costs                                                                              | \$12990                  | \$13130                   |
|                             | Average return each year                                                                                         | 29,88%                   | 5,60%                     |

The stress scenario shows what you might get back in extreme market circumstances.

**Unfavourable scenario:** This type of scenario occurred for an investment between May 2021 - October 2023

**Moderate scenario:** This type of scenario occurred for an investment between September 2015 - September 2020

**Favourable scenario:** This type of scenario occurred for an investment between October 2016 - October 2021

Where insufficient fund performance history exists, a proxy index has been used to perform the before-mentioned calculations. For future performance of the Fund please refer to <https://www.lgtwm.com/uk-en/>.

## What happens if LGT Wealth Management is unable to pay out?

You may not face a financial loss due to the default of the LGT Wealth Management Jersey Limited. The assets of the Fund are held in safekeeping by its depositary, CACEIS Investor Services bank S.A., Dublin Branch (the "Depositary"). In the event of the insolvency of LGT Wealth Management Jersey Limited, the fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the fund. The Depositary will also be liable to the fund for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations as set out in the agreement with the Depositary). Investors in the fund are not covered by any compensation scheme and could, in the worst case, lose their entire investment.

# What are the costs?

The person advising on or selling you the Fund may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

## Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you invest in the Fund and how well the Fund does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10000 per year is invested

|                        | If you exit after 1 year | If you exit after 5 years |
|------------------------|--------------------------|---------------------------|
| Total costs            | USD 159                  | USD 804                   |
| Annual cost impact (*) | 1.6%                     | 1.6% each year            |

We may share part of the costs with the person selling you the product to cover the services they provide to you. These figures include the maximum distribution fee that the person selling you the product may charge. This person will inform you of the actual distribution fee.

## What are the costs? (continued)

### Composition of Costs

| This table shows the impact on return per year              |                                                                                          |                          |
|-------------------------------------------------------------|------------------------------------------------------------------------------------------|--------------------------|
| One-off costs upon entry or exit                            |                                                                                          | If you exit after 1 year |
| Entry costs                                                 | The impact of the costs you pay when entering your investment.                           | USD 0                    |
| Exit costs                                                  | The impact of the costs of exiting your investment when it matures.                      | USD 0                    |
| Ongoing costs taken each year                               |                                                                                          |                          |
| Management fees and other administrative or operating costs | The impact of the costs that we take each year for managing your investments.            | USD 85                   |
| Transaction costs                                           | The impact of the costs of us buying and selling underlying investments for the product. | USD 74                   |
| Incidental costs taken under specific conditions            |                                                                                          |                          |
| Performance fees                                            | The impact of the performance fee.                                                       |                          |

## How long should I hold it and can I take money out early?

**Recommended holding period:** 5 years

The Fund has no required minimum holding period but is designed for investment; you should have an investment horizon of at least 5 to 10 years. Investors may redeem their shares on each Dealing Day (as defined in the Prospectus). Please see the section of the Prospectus entitled “How to Sell Shares in a Fund” for certain fees payable in respect of redemptions.

## How can I complain?

You should in first instance liaise directly with the bank, broker, trading platform or financial adviser through which you purchased your shares. If your complaint is not satisfactory resolved, you may also contact LGT Wealth Management via email at [fund-investors-queries@lgt.com](mailto:fund-investors-queries@lgt.com), by post LGT Wealth Management Jersey Limited, Charles Bisson House, 30-32 New Street, St. Helier JE2 3TE Jersey or by consulting the following website, <https://www.lgtwm.com/uk-en>.
