

Key Information Document

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Product name	DIVERSIFIED HEDGE FUND Class J-CHF, a subfund of the KEY ALTERNATIVE PLATFORM ICAV umbrella fund
ISIN	IE00BYLVK39
Manufacturer	This Fund's management company is UBS Fund Management (Ireland) Limited, a subsidiary of UBS AG.
Website	www.ubs.com/quotes

What is this product?

Type

The product is an open-ended Investment Company (SICAV) with multiple sub-funds incorporated under the laws of Luxembourg, and subject to Part I of the Law of 2010.

Objectives and Investment Policy

Under normal market conditions, the main part of the portfolio is invested in convertible bonds and/or other fixed income securities, bank deposits and warrants or call options on shares. The sub-fund may also invest in shares or other instruments equivalent to shares and use derivatives for investment purposes or to reduce investment risks (hedging). The fund manager selects - based on criteria such as product innovation, quality of management, sector leadership, valuation - companies around the world that appear to offer solid growth prospects or whose securities seem to him undervalued. The sub-fund invests in a concentrated portfolio made of shares of these companies and/or in financial instruments convertible in shares or entitling the sub-fund to acquire shares of these companies. The main part of the portfolio is managed in an endeavour to replicate the financial behaviour of a convertible bonds portfolio. To this end, the fund manager ensures that (i) at least 50% of the portfolio is invested in bonds or other fixed income instruments and (ii) the global exposure of the sub-fund to the equity market, through shares and other financial instruments whose value is linked to shares, shall not exceed 100% of the sub-fund's net asset. Most of the sub-fund's exposure to foreign exchange risk is hedged back into the reference currency of the share class.

Intended retail investors

This product is intended to retail investors wishing to invest over the long term (we recommend an investment horizon of 5 years) and able to bear losses, without having necessarily some financial experience or background.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

This risk indicator is based on the assumption that you hold the product for 5 year(s).

The Summary Risk Indicator (SRI) is a guide to the level of risk of this product compared to other products. It is derived from past returns and may indicate how likely it is that the product will lose money as a result of future (unknown) market conditions.

The Summary Risk indicator (SRI) for this product is 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level. The past may be a poor predictor of the future and, hence, the actual risk of losing money may vary significantly.

Be aware of currency risk when your reference currency differs from the currency of the product. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This type of risk is not considered in the indicator shown above.

REALOBJECTS PDFReactor®

Evaluation Version

This PDF document was created by an evaluation version of RealObjects PDFReactor 11.4.8 (14222). The evaluation version is fully functional, but includes this information page. It must not be used for production purposes. The information page and all other evaluation notices must not be removed from the PDF file.

NOTE: Conversions in evaluation mode might be slower and the results might have a larger file size than in production mode.

About PDFReactor

RealObjects PDFReactor is a powerful formatting processor for converting HTML and XML documents into PDF. It uses Cascading Style Sheets (CSS) to define page layout and styles. The server-side tool enables a great variety of applications in the fields of ERP, eCommerce and Electronic Publishing.

PDFReactor supports HTML5, CSS3 and JavaScript.

It allows you to dynamically generate PDF documents such as invoices, delivery notes and shipping documents on-the-fly. PDFReactor allows you to easily add server-based PDF generation functionality to your application or service. Since PDFReactor runs on a server, the end-user in general does not need any software other than a PDF viewer.

Performance Scenarios

The scenarios presented are an estimate of future performance based on evidence from the past. And are not an exact indicator. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period:		12 years		
Example Investment:		1230 \$ per year		
		If you exit after 1 year	If you exit after 5 years	If you exit after 12 years
Survival Scenarios				
Minimum	123			
Stress	What you might get back after costs	40 \$	50 \$	50 \$
	Average return each year	54.58%	34.34%	54.89%
Unfavourable	What you might get back after costs	30 \$	50 \$	50 \$
	Average return each year	54.00%	43.00%	54.00%
Moderate	What you might get back after costs	50 \$	40 \$	40 \$
	Average return each year	55.00%	55.00%	57.00%
Favourable	What you might get back after costs	80 \$	80 \$	70 \$
	Average return each year	43.00%	45.00%	66.00%
Amount invested over time		60 \$	80 \$	70 \$
Death Scenario				
Insured event	What your beneficiaries might get back after costs	70 \$	70 \$	60 \$
Insurance premium taken over time		70 \$	80 \$	70 \$

Note that the figures shown also reflect the maximum redemption fee of {redemptionfee}. This fee may be applicable at the discretion of the Directors from time to time, in the event that the Fund would need to make asset sales in the secondary market at a spread to meet redemption requests.

The scenarios presented are an estimate of future performance based on evidence from the past, and are not an exact indicator.

What you get will vary depending on how the market performs and how long you keep the investment/product.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

What happens if #^ManufacturerName^# is unable to pay out?

As the shares are not traded directly with the Trust or Baillie Gifford & Co Limited but are traded on the London Stock Exchange, any default by Baillie Gifford & Co Limited will not materially affect the value of your shares. However, a default by the Trust or any of the underlying holdings could affect the value of your investment. As the shares are listed on the London Stock Exchange, any direct holding of these shares is not covered by any investor compensation schemes in relation to either Baillie Gifford & Co Limited or the Trust.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be {AverageReturnBeforeCosts} % before costs and {AverageReturnAfterCosts} % after costs.

The person selling or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Costs narrative test 1

	If you exit after 1 year	If you exit after 5 years	If you exit after 12 years
Total costs	7 \$	40 \$	55 \$
Annual cost impact (*)	24.1 %	25.3% each year	27.9% each year

Costs narrative test 2

One-off costs upon entry or exit		Annual cost impact if you exit after 12 years
Entry costs	The impact of the costs you pay when entering your investment. [This is the most you will pay, and you could pay less].	Up to 66.0%
Exit costs	The impact of the performance fee. We take these from your investment if the product outperforms its benchmark [y by %].	65.0%
Ongoing costs taken each year		
Management fees and other administrative or operating costs	The impact of the costs that we take each year for managing your investments.	68.0%
Transaction costs	The impact of the costs of us buying and selling underlying investments for the product.	55.0%
Incidental costs taken under specific conditions		
Performance fees		76.0%

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

How can I complain?

If you have a complaint about the product or the person advising on or selling the product you will need to provide the details to the person who advised you or sold you the product. As a shareholder of Scottish Mortgage Investment Trust PLC you do not have the right to complain to the Financial Ombudsman Service (FOS) about the management of Scottish Mortgage Investment Trust PLC. Complaints about the Company or the Key Information Document should be sent to our Client Relations Manager at Baillie Gifford & Co Limited, Calton Square, 1 Greenside Row, Edinburgh EH1 3AN, by emailing trutenquiries@bailliegifford.com or by calling 0800 917 2112. You can also visit www.bailliegifford.com for more information.

Other relevant information

Depending on how you buy these shares you may incur other costs, including broker commission, platform fees and Stamp Duty. The distributor will provide you with additional documents where necessary.
