You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

Objectives

Term

Intended retail investor

What are the risks and what could I get in return?

The risk indicator assumes you keep the product for a minimum of 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

REALOBJECTS PDFReactor®

Evaluation Version

This PDF document was created by an evaluation version of RealObjects PDFReactor 11.4.8 (14222). The evaluation version is fully functional, but includes this information page. It must not be used for production purposes. The information page and all other evaluation notices must not be removed from the PDF file.

NOTE: Conversions in evaluation mode might be slower and the results might have a larger file size than in production mode.

About PDFReactor

RealObjects PDFReactor is a powerful formatting processor for converting HTML and XML documents into PDF. It uses Cascading Style Sheets (CSS) to define page layout and styles. The server-side tool enables a great variety of applications in the fields of ERP, eCommerce and Electronic Publishing.

PDFReactor supports HTML5, CSS3 and JavaScript.

It allows you to dynamically generate PDF documents such as invoices, delivery notes and shipping documents on-the-fly. PDFReactor allows you to easily add server-based PDF generation functionality to your application or service. Since PDFReactor runs on a server, the end-user in general does not need any software other than a PDF viewer.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

Recommended holding period:		5 years	
Example Investment:		10000 JPY	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return if you exit before 5 years. You could lose some or all of your investment.		
Stress	What you might get back after costs		
	Average return each year		
Unfavourable	What you might get back after costs		
	Average return each year		
Moderate	What you might get back after costs		
	Average return each year		
Favourable	What you might get back after costs		
	Average return each year		

The stress scenario shows what you might get back in extreme market circumstances.

This product cannot be easily cashed in. If you exit the investment earlier than the recommended holding period you do not have a guarantee.

What happens if Eric Sturdza Management Company S.A. is unable to pay out?

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario.
- That your JPY 1000000 has been invested.

	If you exit after 1 year	If you exit after 5 years
Total costs		
Annual cost impact (*)		

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at maturity your average return per year is projected to be % before costs and % after costs.

Composition of Costs

One-off costs upon entry or exit	If you exit after 1 year	
Entry costs		
Exit costs		
Ongoing costs taken each year		
Management fees and other administrative or operating costs		
Transaction costs		
~incidentcostsunderspecificcondition~		
Performance fees (and carried interest)		

How long should I hold it and can I take money out early?

How can I complain?
