

# Key Information Document

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

## **DIVERSIFIED HEDGE FUND Class J-CHF, a subfund of the KEY ALTERNATIVE PLATFORM ICAV umbrella fund IE00BJSBBF96**

This subfund is managed by UBS Fund Management (Luxembourg) S.A., a wholly-owned group company of UBS Group AG.

---

### What is this product?

The information contained in this document and the methodologies for calculating risks, costs and potential returns are prescribed by law.

---

### What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The risk indicator assumes you keep the product for {rhp} years.

# REALOBJECTS PDFReactor®

## Evaluation Version

This PDF document was created by an evaluation version of RealObjects PDFReactor 11.4.8 (14222). The evaluation version is fully functional, but includes this information page. It must not be used for production purposes. The information page and all other evaluation notices must not be removed from the PDF file.

**NOTE:** Conversions in evaluation mode might be slower and the results might have a larger file size than in production mode.

## About PDFReactor

RealObjects PDFReactor is a powerful formatting processor for converting HTML and XML documents into PDF. It uses Cascading Style Sheets (CSS) to define page layout and styles. The server-side tool enables a great variety of applications in the fields of ERP, eCommerce and Electronic Publishing.

PDFReactor supports HTML5, CSS3 and JavaScript.

It allows you to dynamically generate PDF documents such as invoices, delivery notes and shipping documents on-the-fly. PDFReactor allows you to easily add server-based PDF generation functionality to your application or service. Since PDFReactor runs on a server, the end-user in general does not need any software other than a PDF viewer.

For more information visit [www.pdfreactor.com](http://www.pdfreactor.com)

## Performance Scenarios

The scenarios presented are an estimate of future performance based on evidence from the past. And are not an exact indicator. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The stress scenario shows what you might get back in extreme market circumstances.

| Insurance premium taken over time |                                                           | 70 \$                           | 80 \$                            | 70 \$                             |

Note that the figures shown also reflect the maximum redemption fee of {redemptionfee}. This fee may be applicable at the discretion of the Directors from time to time, in the event that the Fund would need to make asset sales in the secondary market at a spread to meet redemption requests.

The scenarios presented are an estimate of future performance based on evidence from the past, and are not an

exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

## What happens if #^ManufacturerName^# is unable to pay out?

As the shares are not traded directly with the Trust or Baillie Gifford & Co Limited but are traded on the London Stock Exchange, any default by Baillie Gifford & Co Limited will not materially affect the value of your shares. However, a default by the Trust or any of the underlying holdings could affect the value of your investment. As the shares are listed on the London Stock Exchange, any direct holding of these shares is not covered by any investor compensation schemes in relation to either Baillie Gifford & Co Limited or the Trust.

## What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be {AverageReturnBeforeCosts} % before costs and {AverageReturnAfterCosts} % after costs.

The person selling or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

## How long should I hold it and can I take money out early?

Recommended holding period: 5 years

## How can I complain?

If you have a complaint about the product or the person advising on or selling the product you will need to provide the details to the person who advised you or sold you the product. As a shareholder of Scottish Mortgage Investment Trust PLC you do not have the right to complain to the Financial Ombudsman Service (FOS) about the management of Scottish Mortgage Investment Trust PLC. Complaints about the Company or the Key Information Document should be sent to our Client Relations Manager at Baillie Gifford & Co Limited, Calton Square, 1 Greenside Row, Edinburgh EH1 3AN, by emailing [trusenquiries@bailliegifford.com](mailto:trusenquiries@bailliegifford.com) or by calling 0800 917 2112. You can also visit [www.bailliegifford.com](http://www.bailliegifford.com) for more information.

## Other relevant information

Depending on how you buy these shares you may incur other costs, including broker commission, platform fees and Stamp Duty. The distributor will provide you with additional documents where necessary.
