Website	www.swissfunddata.ch/sfdpub/

The Swiss Financial Market Supervisory Authority (FINMA) is responsible for supervising UBS Fund Management (Switzerland) AG, Basel in relation to this key investor information.

This key information sheet for packaged retail and insurance-based investment products (PRIIPs) is approved in Switzerland.

UBS Fund Management (Switzerland) AG is authorized in Switzerland and regulated by the Swiss Financial Market Supervisory Authority FINMA.

This key investor information is accurate as at 01 January 2023.

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

Under the name HBL AM Anlagelösung, an umbrella fund of the "Other funds for traditional investments" category (the "Umbrella Fund") is established within the meaning of Art. 25 ff. in conjunction with Art. 68 ff. in conjunction with Art. 92 f. of the Federal Act on Collective Investment Schemes of 23 June 2006 (CISA)

Duration

This product does not have a maturity date (in other words, it is open-ended). The manufacturer may terminate the product early. The amount you would receive if such early termination took place might be lower than the amount you invested.

Targets

The fund invests predominantly in corporate bonds denominated in Swiss francs from issuers domiciled in Switzerland and abroad. By carefully selecting issuers and sectors, the fund tries to achieve added value in the medium term compared with the market as a whole. For this purpose the fund actively manages credit risk and interest rate risk. Within the stipulated investment restriction, the fund manager combines selected corporate bonds in various sectors and countries and different rating categories with the aim of utilising opportunities for returns and optimising risk. The fund may also invest selectively in bonds not denominated in Swiss francs. However, as a rule these are hedged against the Swiss franc. For active management of credit risk and interest rate risk, derivatives may also be used, including in a foreign currency. The return on the fund depends primarily on the performance of interest rates, the creditworthiness of issuers and interest income. The return may also be affected by currency fluctuations, where active or unhedged positions exist.

Income of this share class is reinvested.

Small investor target group

This investment fund is suitable for professional investors with or without a small amount of investment experience that are able to accept potential investment losses. This investment fund aims to establish its performance materially through a flow of regular income and under normal market conditions grant daily access to the invested capital. It satisfies short-term investment requirements and may be acquired only by professional investors.

Custodian bank

UBS Switzerland AG

The current price is available at www.efgbank.com

What are the risks and what could I get in return?

Risk indicator

This risk indicator is based on the assumption that you hold the product for 3 year(s).

The summary risk indicator (SRI) provides information about the risk level of this product compared to other products. It is derived from past returns and can indicate the likelihood of the product generating a loss due to future (unknown) market conditions.

The summary risk indicator (SRI) for this product is 2 out of 7, which is a low risk class.

This classifies the potential losses from future performance in the lower range. The past is not a reliable guide to the future, so the actual risk of loss may vary significantly.

Please be aware that there is a possible currency risk if your reference currency is not the same as the currency of the product. You will receive payments in another currency, which means that your final return will depend on the exchange rate between these two currencies. The indicator above does not capture that risk.

The product can be subject to other risk factors which are not included in the summary risk indicator (SRI), such as operational, political and legal risks. See the prospectus for further details.

This product does not incorporate any protection against future market developments, meaning that you may lose all or part of the invested capital.

If we are unable to pay you what you are entitled to, you could lose all the invested capital.

However, you may possibly benefit from a set of consumer protection rules (see section "What happens if we are unable to make a payment?"). This protection is not taken into account in the indicator stated above.

Performance Scenarios

What you get back from this product depends on future market developments. Future market developments are uncertain and cannot be predicted exactly.

The unfavourable, moderate and favourable scenarios shown are merely examples that show the product's worst, average and best performance in the last 10 years. The markets may develop quite differently in the future.

Recommended holding period:		3 years	
Example Investment:		CHF 10000	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no guaranteed minimum return if you terminate your investment within 3 year(s). You could lose all or part of your investment.		
Stress	What you might get back after costs	CHF 6530	CHF 7290
	Average return each year	-34.7%	-10.0%
Unfavourable	What you might get back after costs	CHF 8210	CHF 8370
	Average return each year	-17.9%	-5.8%
Moderate	What you might get back after costs	CHF 9870	CHF 10150
	Average return each year	-1.3%	0.5%
Favourable	What you might get back after costs	CHF 10640	CHF 10720
	Average return each year	6.4%	2.3%

The stress scenario shows what you could get back in extreme market conditions.

The figures shown include all costs for the product itself. The figures shown do not take your personal tax situation into account. This can also influence the amount that you get back.

These types of scenarios occurred for an investment between 2012-12-01 and 2022-11-01.

What happens if UBS Fund Management (Switzerland) AG is unable to pay out?

Losses are not covered by any investor compensation or guarantee scheme. In addition, in relation to UBS Switzerland AG, which as the Fund's custodian is responsible for the safekeeping of its assets (the "Custodian"), there is a potential risk of default in the event that the Fund's assets held with the Custodian are lost. However, this risk of default is limited as the Custodian is required by law and regulation to segregate its own assets from the Fund's assets. The Custodian shall be liable to the Fund or the Fund's investors for any loss of a financial instrument held in custody by the Custodian or its delegate, unless the Custodian can demonstrate that the loss resulted from an external event beyond its control.

What are the costs?

The person who provides advice on or sells you this product may charge you additional costs. In this case, this person will inform you of these costs and how they impact your investment.

Costs over time

The tables show the amounts that will be deducted from your investment to cover various types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product performs. The examples given here are based on different investment amounts and different investment periods.

We make the following assumptions:

- in the first year, you will get back the amount you invested (0% annual return). For the other holding periods, we have assumed that the product will perform according to the moderate scenario.
- 10,000.00 CHF is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	CHF 228	CHF 288
Annual cost impact (*)	2.3%	1.0% each year

(*) This illustrates how costs reduce your return each year during the holding period. For example, if you terminate your investment after the recommended holding period, your average return per year is estimated to be 1,5% before costs and 1,5% after costs.

Summary of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	0,50% of the amount you pay in when entering this investment. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	Up to CHF 100
Exit costs	0,50% of your investment before it is paid out to you.	CHF 99
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0,2% of the value of your investment per year. This is an estimate that is based on last year's actual costs. For products launched less than one year ago, this is an estimate based on the representation costs.	CHF 25
Transaction costs	0,1% of the value of the investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	CHF 5
Incidental costs taken under specific conditions		
Performance fees	No performance-related fee is charged for this product.	CHF 0

The figures do not take into account additional fees charged as anti-dilution protection for existing/remaining investors when buying or selling. Additional information on costs can be found in the sales prospectus at www.hblasset.ch

How long should I hold it and can I take money out early?

Recommended holding period: 3 Year(s)

The recommended holding period for this product is 3 year(s). This is the holding period we recommend based on the risk and the expected return on the product. Please note that the expected return is not guaranteed. The more the actual holding period deviates from the recommended holding period of the product, the more your actual risk return will deviate from the product assumptions. Depending on your needs and restrictions, a different holding period may be suitable for you. We therefore recommend that you discuss this point with your client advisor.

How can I complain?

If you have a complaint about the product, the producer of the product or the person who recommended or sold you the product, please contact your customer service representative or contact us at sh-am-complaint-switzerland@ubs.com.
