The Swiss Financial Market Supervisory Authority (FINMA) is responsible for supervising UBS Fund Management (Switzerland) AG, Basel in relation to this key investor information.

This key information sheet for packaged retail and insurance-based investment products (PRIIPs) is approved in Switzerland.

UBS Fund Management (Switzerland) AG is authorized in Switzerland and regulated by the Swiss Financial Market Supervisory Authority FINMA.

This key investor information is accurate as at 18 May 2023.

**You are about to purchase a product that is not simple and may be difficult to understand.**

## What is this product?

### Type

The fund contract of UBS (CH) Fund Solutions was drawn up by UBS Fund Management (Switzerland) AG, Basel, as fund management and submitted to the Swiss Financial Market Supervisory Authority FINMA with the consent of the custodian bank UBS Switzerland AG, Zurich, and approved by FINMA for the first time on 16 October 2020.

### Duration

This product does not have a maturity date (in other words, it is open-ended). The manufacturer may terminate the product early. The amount you would receive if such early termination took place might be lower than the amount you invested.

### Targets

The investment objective of the subfund is to track the performance of the underlying UBS Bloomberg CMCI WTI Crude Oil Hedged CHF Index and thus participate in the performance of the above index plus an additional cash return. The subfund tracks the index synthetically. Sustainability risks are not systematically integrated as they are not taken into account as part of the index selection process.

The fund's return depends primarily on the performance of the tracked index.

This share class is a distributing share class. The share class may pay dividends. The exchange rate risk of the share class currency is to a large extent hedged against the currency of the fund.

### Small investor target group

This fund applies to retail investors with an advanced financial understanding, who can accept a possible loss on the investment amount. The fund is aimed at growing the investment value, while granting daily access to the capital under normal market conditions. With their investment in this fund, investors can satisfy long term investment needs. The fund is suited to be acquired subject to a test of the investor's financial knowledge and experience.

### Custodian bank

State Street Bank International GmbH, Munich, Zürich Branch

### Additional information

Information on UBS (CH) Fund Solutions - CMCI Oil SF ETF (CHF) A-dis and the available unit classes as well as the full prospectus and the current annual or semi-annual reports and other information can be obtained free of charge from the fund management company, the central administration agent, the depositary, the custodian bank, the fund distributors or online at [www.ubs.com/etf](http://www.ubs.com/etf). The current price is available at [www.ubs.com/etf](http://www.ubs.com/etf)

## What are the risks and what could I get in return?

Risk indicator

This risk indicator is based on the assumption that you hold the product for 8 year(s).

The summary risk indicator (SRI) provides information about the risk level of this product compared to other products. It is derived from past returns and can indicate the likelihood of the product generating a loss due to future (unknown) market conditions.

The summary risk indicator (SRI) for this product is 6 out of 7, which is the second-highest risk class.

This classifies the potential losses from future performance in the upper range. The past is not a reliable guide to the future, so the actual risk of loss may vary significantly.

Please be aware that there is a possible currency risk if your reference currency is not the same as the currency of the product. You will receive payments in another currency, which means that your final return will depend on the exchange rate between these two currencies. The indicator above does not capture that risk.

The product can be subject to other risk factors which are not included in the summary risk indicator (SRI), such as operational, political and legal risks. See the prospectus for further details.

This product does not incorporate any protection against future market developments, meaning that you may lose all or part of the invested capital.

If we are unable to pay you what you are entitled to, you could lose all the invested capital.

However, you may possibly benefit from a set of consumer protection rules (see section "What happens if we unable to make a payment?"). This protection is not taken into account in the indicator stated above.

## Performance Scenarios

What you get back from this product depends on future market developments. Future market developments are uncertain and cannot be predicted exactly.

The unfavourable, moderate and favourable scenarios shown are merely examples that show the product's worst, average and best performance in the last 13 years. The markets may develop quite differently in the future.

| Recommended holding period: |                                                                                                                                         | 8 years                  |                           |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|--------------------------|---------------------------|
| Example Investment:         |                                                                                                                                         | CHF 10000                |                           |
|                             |                                                                                                                                         | If you exit after 1 year | If you exit after 8 years |
| Scenarios                   |                                                                                                                                         |                          |                           |
| Minimum                     | There is no guaranteed minimum return if you terminate your investment within 8 year(s). You could lose all or part of your investment. |                          |                           |
| Stress                      | What you might get back after costs                                                                                                     | CHF 400                  | CHF 50                    |
|                             | Average return each year                                                                                                                | -96.1%                   | -47.9%                    |
| Unfavourable                | What you might get back after costs                                                                                                     | CHF 4230                 | CHF 2020                  |
|                             | Average return each year                                                                                                                | -57.7%                   | -18.1%                    |
| Moderate                    | What you might get back after costs                                                                                                     | CHF 9060                 | CHF 4510                  |
|                             | Average return each year                                                                                                                | -9.4%                    | -9.5%                     |
| Favourable                  | What you might get back after costs                                                                                                     | CHF 18840                | CHF 7660                  |
|                             | Average return each year                                                                                                                | 88.4%                    | -3.3%                     |

The stress scenario shows what you could get back in extreme market conditions.

The figures shown include all costs for the product itself. The figures shown do not take your personal tax situation into account. This can also influence the amount that you get back.

These types of scenarios occurred for an investment between 2009-11-01 and 2022-10-01.

## What happens if UBS Fund Management (Switzerland) AG is unable to pay out?

Losses are not covered by any investor compensation or guarantee scheme. In addition, in relation to State Street Bank International GmbH, Munich, Zürich Branch, which as the Fund's custodian is responsible for the safekeeping of its assets (the "Custodian"), there is a potential risk of default in the event that the Fund's assets held with the Custodian are lost. However, this risk of default is limited as the Custodian is required by law and regulation to segregate its own assets from the Fund's assets. The Custodian shall be liable to the Fund or the Fund's investors for any loss of a financial instrument held in custody by the Custodian or its delegate, unless the Custodian can demonstrate that the loss resulted from an external event beyond its control.

## What are the costs?

The person who provides advice on or sells you this product may charge you additional costs. In this case, this person will inform you of these costs and how they impact your investment.

### Costs over time

The tables show the amounts that will be deducted from your investment to cover various types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product performs. The examples given here are based on different investment amounts and different investment periods.

We make the following assumptions:

- in the first year, you will get back the amount you invested (0% annual return). For the other holding periods, we have assumed that the product will perform according to the moderate scenario.
- 10,000.00 CHF is invested.

|                        | <b>If you exit after 1 year</b> | <b>If you exit after 8 years</b> |
|------------------------|---------------------------------|----------------------------------|
| <b>Total costs</b>     | <b>CHF 813</b>                  | <b>CHF 782</b>                   |
| Annual cost impact (*) | 8.1%                            | 1.2% each year                   |

(\*) This illustrates how costs reduce your return each year during the holding period. For example, if you terminate your investment after the recommended holding period, your average return per year is estimated to be -8.2% before costs and -8.2% after costs.

#### Summary of costs

| <b>One-off costs upon entry or exit</b>                            |                                                                                                                                                                                                                             | <b>If you exit after 1 year</b> |
|--------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|
| <b>Entry costs</b>                                                 | 5.00% of the amount you pay in when entering this investment. This is the most you will be charged. The person selling you the product will inform you of the actual charge.                                                | Up to CHF 500                   |
| <b>Exit costs</b>                                                  | 3.00% of your investment before it is paid out to you.                                                                                                                                                                      | CHF 284                         |
| <b>Ongoing costs taken each year</b>                               |                                                                                                                                                                                                                             |                                 |
| <b>Management fees and other administrative or operating costs</b> | 0.3% of the value of your investment per year. This is an estimate that is based on last year's actual costs. For products launched less than one year ago, this is an estimate based on the representation costs.          | CHF 26                          |
| <b>Transaction costs</b>                                           | 0.0% of the value of the investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. | CHF 4                           |
| <b>Incidental costs taken under specific conditions</b>            |                                                                                                                                                                                                                             |                                 |
| <b>Performance fees</b>                                            | No performance-related fee is charged for this product.                                                                                                                                                                     | CHF 0                           |

The figures shown here do not include any additional charges that may be levied by your distributor, adviser, stockbroker when trading in the secondary market or any "insurance wrapper" into which the fund may be placed. Transaction costs incurred in direct trading in the fund will be borne by eligible participants or new investors in the fund. Additional information on costs can be found in the sales prospectus at [www.ubs.com/etf](http://www.ubs.com/etf)

#### How long should I hold it and can I take money out early?

**Recommended holding period: 8 Year(s)**

The recommended holding period for this product is 8 year(s). This is the holding period we recommend based on the risk and the expected return on the product. Please note that the expected return is not guaranteed. The more the actual holding period deviates from the recommended holding period of the product, the more your actual risk return will deviate from the product assumptions. Depending on your needs and restrictions, a different holding period may be suitable for you. We therefore recommend that you discuss this point with your client advisor.

Investors can buy fund units directly from the issuer (primary) or by trading on a stock exchange (secondary market). The issue and redemption of fund units by the fund management company or its distributors are referred to as the primary market. The purchase or sale of fund units via the stock exchange is referred to as the secondary market.

#### How can I complain?

If you have a complaint about the product, the producer of the product or the person who recommended or sold you the product, please contact your customer service representative or contact us at [sh-am-complaint-switzerland@ubs.com](mailto:sh-am-complaint-switzerland@ubs.com).
