The Commission de Surveillance du Secteur Financier (CSSF) is responsible for supervising UBS Fund Management (Luxembourg) S.A. in relation to this Key Information Document.

This key information document for packaged retail investment and insurance-based products (PRIIPs) is authorised in Luxembourg. The management company is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

This key investor information is accurate as at 25 May 2023.

What is this product?

Type

The fund was established in accordance with Part I of the Luxembourg Law of March 30, 1988 relating to Undertakings for Collective Investment as a legally dependent open-ended investment fund under the legal form of a Fonds Commun de Placement (FCP) and was adapted in February 2004 to the requirements of the Luxembourg Law of 20 December 2002 relating to Undertakings for Collective Investment. It was originally established under the name SBC Emerging Economies Portfolio in accordance with the contractual terms approved by the Board of Directors of UBS Emerging Economies Fund Management Company S.A. (formerly SBC Emerging Economies Portfolio Management Company S.A) on 20 January 1995.

Term

The Product does not have a maturity date (the Product has been established for an indefinite period of time). The Manufacturer may terminate the Product early. The amount you will receive upon early termination may be less than the amount you invested.

Objectives

The actively managed sub-fund invests primarily in short-term bonds and currency instruments from emerging markets worldwide. The average residual maturity of the investments in the fund is less than one year.

The sub-fund uses the benchmark JPM ELMH+ as a reference for portfolio construction, performance comparison and risk management. Although a portion of the portfolio may be invested in the same instruments and at the same weightings as the benchmark, the Portfolio Manager is not bound by the benchmark when selecting instruments. In particular, the Portfolio Manager may, at its discretion, invest in bonds of issuers not included in the benchmark and/or structure the proportion of investments in sectors differently from their weighting in the benchmark in order to take advantage of investment opportunities. In times of high market volatility, the sub-fund's performance may therefore deviate significantly from the benchmark.

The fund's return depends primarily on the development of interest rates, the creditworthiness of issuers and interest income. Returns may also be affected by exchange rate fluctuations where there are active or unhedged positions.

This share class is a distributing share class. The share class may pay dividends. The exchange rate risk of the share class currency is to a large extent hedged against the currency of the fund.

Intended retail investor

This fund applies to retail investors with a basic financial understanding, who can accept a possible loss on the investment amount. The fund is aimed at generating a substantial part of its yield through recurring income, while granting daily access to the capital under normal market conditions. With their investment in this fund, investors can satisfy medium term investment needs. The fund is suited to be acquired by the target client segments without any restriction of the distribution channel or platform.

Depository

UBS Europe SE, Luxembourg Branch

Further Information

Information on Global Short Term (USD) and the available unit classes as well as the full prospectus and the current annual or semi-annual reports and other information can be obtained free of charge from the fund management company, the central administration agent, the depository, the custodian bank, the fund distributors or online at www.ubs.com/funds. The current price is available at www.ubs.com/funds

About PDFReactor

RealObjects PDFReactor is a powerful formatting processor for converting HTML and XML documents into PDF. It uses Cascading Style Sheets (CSS) to define page layout and styles. The server-side tool enables a great variety of applications in the fields of ERP, eCommerce and Electronic Publishing.

PDFReactor supports HTML5, CSS3 and JavaScript.

It allows you to dynamically generate PDF documents such as invoices, delivery notes and shipping documents on-the-fly. PDFReactor allows you to easily add server-based PDF generation functionality to your application or service. Since PDFReactor runs on a server, the end-user in general does not need any software other than a PDF viewer.

What are the risks and what could I get in return?

Risk indicator

This risk indicator is based on the assumption that you hold the product for 4 year(s).

The Summary Risk Indicator (SRI) is a guide to the level of risk of this product compared to other products. It is derived from past returns and may indicate how likely it is that the product will lose money as a result of future (unknown) market conditions.

The Summary Risk indicator (SRI) for this product is 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level. The past may be a poor predictor of the future and, hence, the actual risk of losing money may vary significantly.

Be aware of currency risk when your reference currency differs from the currency of the product. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This type of risk is not considered in the indicator shown above.

The product may be exposed to further risk factors such as operational, political and legal risks which are not included in the summary indicator. Please refer to the prospectus for more detail.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

However, you may benefit from a consumer protection scheme (see the section 'what happens if we are unable to pay you'). The indicator shown above does not consider this protection.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are merely examples that show the product's worst, average and best performance in the last 10 years. The markets may develop quite differently in the future.

Recommended holding period:		4 years	
Example Investment:		CHF 10000	
		If you exit after 1 year	If you exit after 4 years
Scenarios			
Minimum	There is no minimum guaranteed return if you exit before 4 year(s). You could lose some or all of your investment.		
Stress	What you might get back after costs	CHF 4150	CHF 4640
	Average return each year	-58.5%	-17.5%
Unfavourable	What you might get back after costs	CHF 8090	CHF 7710
	Average return each year	-19.1%	-6.3%
Moderate	What you might get back after costs	CHF 9360	CHF 8780
	Average return each year	-6.4%	-3.2%
Favourable	What you might get back after costs	CHF 10630	CHF 10030
	Average return each year	6.3%	0.1%

The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all costs of the product itself. The figures shown do not take account of your personal tax situation, which can also have an impact on how much you receive back.

This type of scenarios occurred for an investment between 2012-11-01 and 2022-10-01.

What happens if UBS Fund Management (Luxembourg) S.A. is unable to pay out?

Losses are not covered by any investor compensation or guarantee scheme. In addition, UBS Europe SE, Luxembourg Branch, the depositary of the Fund responsible for safekeeping its assets (the "Depositary"), is subject to a potential default risk in the event that the assets of the Fund held with the Depositary are lost. However, this risk of default is limited as the Custodian is required by law and regulation to segregate its own assets from the Fund's assets. The Custodian shall be liable to the Fund or the Fund's investors for any loss of a financial instrument held in custody by the Custodian or its delegate, unless the Custodian can demonstrate that the loss resulted from an external event beyond its control.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10 000,00 CHF is invested.

	If you exit after 1 year	If you exit after 4 years
Total costs	CHF 454	CHF 863
Annual cost impact (*)	4.5%	2.3% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -0,9% before costs and -3,2% after costs.

We may share some of the charges with the person who sells you the product to cover the services they provide to you. This person will inform you about the amount.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	3,00% of the amount you pay in when entering this investment. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	Up to CHF 300
Exit costs	We do not charge a redemption fee for this product, but the party who sells the product to you may do so.	CHF 0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1,4% of the value of your investment per year. This is an estimate based on actual costs over the last year.	CHF 136
Transaction costs	0,2% of the value of the investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	CHF 22
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	CHF 0

The figures shown here do not include any additional charges that may be levied by your distributor, adviser or any "insurance wrapper" into which the fund may be placed. Additional information on costs can be found in the sales prospectus at www.ubs.com/funds

How long should I hold it and can I take money out early?

Recommended holding period: 4 year(s)

The recommended holding period for this product is 4 year(s). This is our recommended holding period based on the risk and expected return with the product. Please note that the expected return is not guaranteed. The more the actual holding period deviates from the recommended holding period for the product, the more your actual return will also deviate from the product assumptions. Depending on your needs and limitations, a different holding period may be suitable for you. Consequently, we recommend that you discuss this issue with your customer service representative.

In principle, investors may ask the Management Company to redeem their units on any business day in Luxembourg.

How can I complain?

If you have a complaint about the product, the producer of the product or the person who recommended or sold you the product, please contact your customer service representative or contact us at www.ubs.com/fml-policies.
