Historic Yield	4.70%

ROYAL LONDON UK INCOME WITH GROWTH TRUST

31.12.23

Overview

The Fund's investment objective is to achieve an above-average income with some capital growth over the medium-to-long term (5-7 years) by primarily investing in the shares and sterling-denominated bonds of UK companies listed on the London Stock Exchange. The Fund's income target is to produce an annual income that exceeds the income of the FTSE All-Share Index (the "Index") by at least 20% over a rolling 7-year period. The Index is considered an appropriate benchmark for the Scheme's performance, as the Scheme's potential investments will predominantly be included in the Index.

Year-on-year performance

	31.12.22 to 31.12.23	31.12.21 to 31.12.22	31.12.20 to 31.12.21	31.12.19 to 31.12.20	31.12.18 to 31.12.19
Share Class A (Income)	5.0%	0.3%	12.6%	-6.2%	18.1%

Cumulative Performance (as at 31.12.23)

About PDFReactor

RealObjects PDFReactor is a powerful formatting processor for converting HTML and XML documents into PDF. It uses Cascading Style Sheets (CSS) to define page layout and styles. The server-side tool enables a great variety of applications in the fields of ERP, eCommerce and Electronic Publishing.

PDFReactor supports HTML5, CSS3 and JavaScript.

It allows you to dynamically generate PDF documents such as invoices, delivery notes and shipping documents on-the-fly. PDFReactor allows you to easily add server-based PDF generation functionality to your application or service. Since PDFReactor runs on a server, the end-user in general does not need any software other than a PDF viewer.

CITYWIRE / A

Yield Definitions

The historic yield reflects distributions declared over the past twelve months as a percentage of the mid-market price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. Reported yields reflect RLAM's current perception of market conventions around timing of bond cash flows.

Important Information

This is a financial promotion and is not investment advice.

The Trust is an authorised unit trust scheme. The Manager is RLUM Limited, authorised and regulated by the Financial Conduct Authority, with firm reference number 144032. For more information on the Trust or the risks of investing, please refer to the Prospectus or Key Investor Information Document (KIID), available via the relevant Fund Information page on www.rlam.com.

Issued by Royal London Asset Management Limited, 80 Fenchurch Street, London EC3M 4BY. Authorised and regulated by the Financial Conduct Authority, firm reference number 141665. A subsidiary of The Royal London Mutual Insurance Society Limited.

Breakdowns exclude cash and futures.

Fund Commentary

The fund returned +4.13% in December, a month that saw both UK equities and corporate bonds rise. For 2023 as a whole the fund returned +4.97%.

Equity markets enjoyed a strong run into the year end. Inflation data across Europe and the US continued to suggest that inflationary pressures are receding, and investors now see interest rate cuts in 2024 as being very likely. The oil price has remained subdued, but issues in the Middle East will need to be watched closely, as shipping is being diverted away from the Red Sea after attacks on vessels from militants in Yemen. These issues could undermine the improved inflation narrative if they lead to oil price spikes or supply chain disruptions and increased freight costs for companies.

The equity portion of the fund performed better than the benchmark index, with holdings in the fund manager Ashmore, electricity generator Drax and financial company IG Group the biggest contributors. Portfolio activity was light in the month, with the main trade being trimming the holding in Spirax Sarco after a strong bounce in the shares.

The primary aim of the fund remains to deliver a yield for investors higher than that of the equity market. In order to achieve this we seek to invest in a portfolio of shares which offer an attractive dividend yield plus some capital growth, alongside a fixed interest portfolio which can generate steady income.

The views and opinions expressed herein are those of the manager at the time and are subject to change without notice.

Key Concepts to Understand

Income and Capital Growth: Income is defined as the payment an investment generates, such as dividends, bond coupons or rental income, and capital growth as the rise in an investment's value over time.

7-Year Rolling Period: Any period of seven years, no matter which day you start on.

Bonds: Bonds are defined as fixed-income investments issued as debt by companies and public bodies to raise finance. Investors in bonds receive a previously agreed, non-variable interest payment until the investment matures. Corporate bonds are those issued by companies to raise finance.

Efficient Portfolio Management: A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

Fund Risks

Investment Risk: The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Concentration risk: The price of Funds that invest in a reduced number of holdings, sectors, or geographical areas may be more heavily affected by events that influence the stockmarket and therefore more volatile.

Credit Risk: Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.

EPM Techniques: The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Interest Rate Risk: Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Liquidity Risk: In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges from Capital Risk: Charges are taken from the capital of the Fund. Whilst this increases the yield, it also has the effect of reducing the potential for capital growth.
