This document is for professional advisers only and is not for onward distribution to private clients. The value of investments and any income from them can go down as well as up and you may not get back the amount originally invested.

Past performance is not a guide to future performance. Levels and bases for taxation may change.

Investors should note that actual portfolio returns may be different to the returns of the model portfolio. Figures represent performance of a model portfolio, individual account performance may differ

## Select Portfolio Service Cautious (GBP)

### Investment objective

The Select Portfolio Service invests across the Canaccord Genuity Fund Range. The weightings between the funds are managed within closely defined parameters so as to maximise the level of return for a defined level of risk. Using Canaccord's sophisticated modelling systems, the underlying funds have been blended to ensure that the best outcome is achieved for investors along the efficient frontier, and an on-going portfolio optimisation process ensures that the fund managers are able to take advantage of prevailing market conditions in order to maximise returns while maintaining the level of target volatility. The risk based approach to portfolio construction combined with Canaccord's rigorous investment management processes deliver a range of actively managed solutions that are tightly aligned to clients' expectations.

## About PDFReactor

RealObjects PDFReactor is a powerful formatting processor for converting HTML and XML documents into PDF. It uses Cascading Style Sheets (CSS) to define page layout and styles. The server-side tool enables a great variety of applications in the fields of ERP, eCommerce and Electronic Publishing.

PDFReactor supports HTML5, CSS3 and JavaScript.

It allows you to dynamically generate PDF documents such as invoices, delivery notes and shipping documents on-the-fly. PDFReactor allows you to easily add server-based PDF generation functionality to your application or service. Since PDFReactor runs on a server, the end-user in general does not need any software other than a PDF viewer.
