Portfolio Manager commentary

The Canaccord Genuity Bond Fund was down -0.91% in April (-0.55% year-to-date). As a comparative, the Markit iBoxx GBP Gilts 3-5 year index was down -1.34% over the same period (-2.17% year-to-date).

April was a tough month for fixed income markets. A combination of hot US inflation data and a first quarter US GDP print, showing resilient private demand, fuelled market fears that central banks would not ease monetary policy as quickly as previously hoped.

In April alone, markets priced out one and a half interest rate cuts in the US this year and the timing of the first cut was pushed further out. 2-year Treasury yields rose 40 basis points (bps) to 5.0%, while 10-year Treasury yields rose 47bps to 4.7%. April highlighted that persistent inflation remains a key risk in 2024.

The allocation to Sterling AAA rated / quasi-government bonds which gives some ballast to the fund has an average yield-to-maturity of 4.97% which compares very favourably with 5-year UK Gilts at 4.25%. Sterling investment grade bonds account for approximately 39% of the Fund. The sterling investment grade bucket is targeted around single A rated debt and offers an overall yield to maturity for the Fund of 5.78%. There is also a 5% allocation to US Treasuries with an average yield to maturity of 4.50%. The specialist fund allocation is approximately 25%.

The key to achieving optimum risk-reward is diversification, encompassing a blend of traditional plain-vanilla bond assets, complemented by specialist / thematic bond fund strategies. The Fund's headline yield to maturity (YTM) is currently at 5.45% and we are currently targeting an income delivery of around 3.41% per annum. The Fund's duration is 3.19 years. The Fund's credit quality is strong with a weighting to the highest quality assets of 36% (AAA/AA/cash).

The Fund has GBP, USD and EUR hedged share classes and both distributing and accumulation share classes available for investment.
