Annualised Income Yield	0.12%

ROYAL LONDON GLOBAL EQUITY SELECT (IRL)

31.08.23

Overview

The Fund's investment objective is to achieve capital growth over the long term, which should be considered as a period of 7-plus years. The Fund's performance target is to outperform, after the deduction of charges, the MSCI All Countries World Net Total Return Index USD (the "Benchmark") by 2.5% per annum over rolling three year periods. The Benchmark is being used by the Fund for performance comparison purposes only and the Fund does not intend to track it. While the Fund may invest in investments which are constituents of the Benchmark, the Fund will be actively managed and its portfolio will not be constrained by reference to any index.

Year-on-year performance

Yield Definitions

The Annualised Income Yield reflects the amounts that may be expected to be distributed over the next twelve months as a percentage of the mid-market share price of the fund as at the date shown. It is based on a snapshot of the portfolio on that day. It does not include any preliminary charge and investors may be subject to tax on distributions.

Important Information

This is a financial promotion and is not investment advice.

The Fund is a sub-fund of Royal London Asset Management Funds plc, an open-ended investment company with variable capital (ICVC), with segregated liability between sub-funds. Incorporated with limited liability under the laws of Ireland and authorised by the Central Bank of Ireland as a UCITS Fund. It is a recognised scheme under the Financial Services and Markets Act 2000. The Management Company is FundRock Management Company SA, Registered office: 33 rue de Gasperich, L – 5826 Hesperange, Luxembourg and is authorised and regulated by the Commission de Surveillance du Secteur Financier (CSSF). The Investment Manager is Royal London Asset Management Limited. For more information on the Fund or the risks of investing, please refer to the Prospectus or Key Investor Information Document (KIID), available via the relevant Fund Information page on www.rlam.com. Most of the protections provided by the UK regulatory system, and the compensation under the Financial Services Compensation Scheme, will not be available.

Issued by Royal London Asset Management Limited, 80 Fenchurch Street, London EC3M 4BY. Authorised and regulated by the Financial Conduct Authority, firm reference number 141665. A subsidiary of The Royal London Mutual Insurance Society Limited.

ESG Terms and Definitions

ESG Integration: The systematic and explicit inclusion of environmental, social and governance (ESG) factors into investment analysis and investment decisions.

Promotes Environmental or Social Factors: : An ESG Fund promotes, among other characteristics, environmental or social characteristics, or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices.

Sustainable Fund Objective: A product that has sustainable investment or a reduction in carbon emissions as its objective.

Exclusions: Explicitly prohibits investing in a particular company, sector, business activity, country or region.

ESG Metrics Explanation

Carbon Footprint: Exposure to high emitters in the portfolio, expressed in tCO2e/\$M invested. Financed emissions (explained above) are divided by the portfolio value, the same approach for listed companies and private issuers is applied in this metric.

Financed Emissions: The emissions from activities in the real economy that are financed through lending and investment portfolios, expressed in tCO2e. Emissions are attributed to a portfolio based on the portion of the company’s value the portfolio holds, and using different accounting values for public and private corporates. We provide financed emissions for scope 1 and 2 emissions.

Weighted Average Carbon Intensity: Portfolio’s exposure to carbon-intensive companies, expressed in tCO2e / \$M revenue. Scope 1 and scope 2 GHG emissions are divided by companies revenues, then multiplied based on portfolio weights (the current value of the investment relative to the current portfolio value). The WACI is calculated as a weighted average sum of the holdings with carbon intensity coverage.

ESG Characteristics Rationale

The Fund considers environmental, social, governance (“ESG”) standards of the companies it invests in alongside financial analysis, and Responsible Investment criteria are applied to provide better and sustainable outcomes for investors. Underweight and overweight stock positions relative to the Index will be taken to achieve carbon intensity and ESG profile improvements. The Fund will seek to achieve an improved ESG profile than the Index by focusing on superior corporate governance, lower social risk and higher social value and superior environmental risk-reward.

Key Concepts to Understand

Capital Growth: The rise in an investment's value over time.

Derivatives: A financial instrument whose price is dependent upon or derived from one or more underlying asset. Derivatives are typically used to hedge the relevant share classes.

Equities: Securities that represent an ownership interest in a company.

Efficient Portfolio Management (EPM) Techniques The Fund may engage in EPM techniques including holdings of derivative instruments. The use of these instruments may expose the Fund to volatile investment returns and increase the volatility of the net asset value of the Fund. EPM techniques may involve the Fund entering into transactions with counterparties where there may be a risk of counterparty default. The Fund's ability to use EPM strategies may be limited by market conditions, regulatory limits and tax considerations.

Fund Risks

Investment Risk: The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Concentration risk: The price of Funds that invest in a reduced number of holdings, sectors, or geographical areas may be more heavily affected by events that influence the stockmarket and therefore more volatile.

Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Emerging Markets Risk: Investing in Emerging Markets may provide the potential for greater rewards but carries greater risk due to the possibility of high volatility, low liquidity, currency fluctuations, the adverse effect of social, political and economic instability, weak supervisory structures and accounting standards.

Exchange Rate Risk Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.

Liquidity Risk In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

Responsible Investment Style Risk The Fund can only invest in holdings that demonstrate compliance with certain sustainable indicators or ESG characteristics. This reduces the number of securities in which the Fund can invest and there may as a result be occasions where it forgoes more strongly performing investment opportunities, potentially underperforming non-sustainable funds.
