Overview

The Fund's investment objective is to achieve capital growth (1) over the medium term, which should be considered as a period of 3-5 years, by investing in a diverse range of equity and fixed income assets. Investments in the Fund will adhere to the Investment Manager's ethical and sustainable investment policy. The Fund is actively managed, meaning that the Investment Manager will use their expertise to select investments to meet the objective.

Yield Definitions

The historic yield reflects distributions declared over the past twelve months as a percentage of the mid-market price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. Reported yields reflect RLAM's current perception of market conventions around timing of bond cash flows.

Important Information

This is a financial promotion and is not investment advice.

The Fund is a sub-fund of Royal London Equity Funds ICVC, an open-ended investment company with variable capital with segregated liability between sub-funds, incorporated in England and Wales under registered number IC000807. The Authorised Corporate Director (ACD) is Royal London Unit Trust Managers Limited, authorised and regulated by the Financial Conduct Authority, with firm reference number 144037. For more information on the fund or the risks of investing, please refer to the Prospectus or Key Investor Information Document (KIID), available via the relevant Fund Information page on www.rlam.com.

Issued by Royal London Asset Management Limited, 80 Fenchurch Street, London EC3M 4BY. Authorised and regulated by the Financial Conduct Authority, firm reference number 141665. A subsidiary of The Royal London Mutual Insurance Society Limited.

Breakdowns exclude cash and futures.

Fund Commentary

During January the pace of equity markets slowed following the significant gains that had been generated during the fourth quarter of 2023, with the FTSE All-Share Index declining by 1.8%, although the MSCI World rose by 1.3%. Equities had run hard in recent months, anticipating that interest rates will be reduced in 2024 as the inflation backdrop continues to improve. Whilst the direction of rates is likely correct, it is expected that any cuts will be more second half weighted as inflationary pressures remain sticky. Globally the S&P 500 in the US reached an all-time high in January heavily reflecting the positive movements in technology companies and this was despite the growing geopolitical concerns in the Middle East. Overall, we anticipate another steady year for corporate earnings and an easing of inflationary pressures which should provide support for equity markets.

The sterling credit market fell 0.99% in January, giving back some of its strong gains at the end of 2023. This decline was driven by underlying government bonds, with the yield on ten-year gilts rising from 3.6% to 3.8% over the month. Credit spreads tightened marginally over the month, ending at 1.1%, and taking the overall yield on the index to 5.1%.

The fund outperformed during January, ranking in the first quartile relative to its peer group. The fund's top contributors to performance in January were semiconductor stocks ASML, a manufacturer of advanced lithography tools, along with TSMC, a foundry business with a key role in semiconductor supply chains. Both reported strong results highlighting the tailwinds from artificial intelligence. Novo Nordisk also benefitted from good numbers during the month. Financial holdings underperformed during the month with both Indian bank HDFC and Asian bank Standard Chartered were key detractors from performance.

The fund began a new position in semiconductor and enterprise software company Broadcom during January, where we believe the company's networking products should continue to benefit from a multi-year cycle in artificial intelligence and data centre investments, supported by robust cash generation from its software division. We also continued to build our stake in Core & Main, a distributor of water products, along with bicycle components manufacturer Shimano and Indonesian financial group Bank Rakyat. These were funded through reductions to positions in semiconductor manufacturers TSMC and Texas Instruments, along with electrical components producer TE Connectivity.

The fund began a new position in Comfort Systems, the leading installer of heating, ventilation and air conditioning systems in the United States. The business is well placed to focus on the decarbonisation of buildings, along with data centre growth and reshoring of manufacturing capacity. We also added to positions in Mercadolibre and internet search firm Alphabet.

ESG Terms and Definitions

ESG Integration: The systematic and explicit inclusion of environmental, social and governance (ESG) factors into investment analysis and investment decisions.

Promotes Environmental or Social Factors: An ESG Fund promotes, among other characteristics, environmental or social characteristics, or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices.

Sustainable Fund Objective: A product that has sustainable investment or a reduction in carbon emissions as its objective.

Exclusions: Explicitly prohibits investing in a particular company, sector, business activity, country or region.

ESG Metrics Explanation

Carbon Footprint: Exposure to high emitters in the portfolio, expressed in tCO₂e/\$M invested. Financed emissions (explained above) are divided by the portfolio value, the same approach for listed companies and private issuers is applied in this metric.

Financed Emissions: The emissions from activities in the real economy that are financed through lending and investment portfolios, expressed in tCO₂e. Emissions are attributed to a portfolio based on the portion of the company's value the portfolio holds, and using different accounting values for public and private corporates. We provide financed emissions for scope 1 and 2 emissions.

Weighted Average Carbon Intensity: Portfolio's exposure to carbon-intensive companies, expressed in tCO₂e / \$M revenue. Scope 1 and scope 2 GHG emissions are divided by companies revenues, then multiplied based on portfolio weights (the current value of the investment relative to the current portfolio value). The WACI is calculated as a weighted average sum of the holdings with carbon intensity coverage.

ESG Characteristics Rationale

The Fund focuses on the sustainability of the products and services of the companies it invests in, as well as their standards of environmental, social, governance (“ESG”) management, alongside financial analysis. The investment approach is fundamentally based on positive screening; identifying companies that are making a positive contribution towards a cleaner, healthier, safer and more inclusive society, through assessing both what a company does and how it does it, and through active engagement to encourage continual improvement. The fund will not invest in companies that undertake business activities deemed to be detrimental to society and that breach our Do No Significant Harm principle. Further details of the Funds Sustainable Investment process can be found in the ethical and sustainable investment policy at www.rlam.com

Key Concepts to Understand

Bonds: are defined as fixed-income investments issued as debt by companies and public bodies to raise finance. Investors in bonds receive a previously agreed, non-variable interest payment until the investment matures. Corporate bonds are those issued by companies to raise finance.

Capital Growth: The rise in an investment's value over time.

Derivative: A financial instrument whose price is dependent upon or derived from one or more underlying asset.

Equities: Securities that represent an ownership interest in a company.

Environmental, social and governance: A list of predefined criteria that determines how a company operates in terms of sustainability and overall corporate governance.

Efficient Portfolio Management (EPM) Techniques The Fund may engage in EPM techniques including holdings of derivative instruments. The use of these instruments may expose the Fund to volatile investment returns and increase the volatility of the net asset value of the Fund. EPM techniques may involve the Fund entering into transactions with counterparties where there may be a risk of counterparty default. The Fund's ability to use EPM strategies may be limited by market conditions, regulatory limits and tax considerations.

Fund Risks

Investment Risk: The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Emerging Markets Risk: Investing in Emerging Markets may provide the potential for greater rewards but carries greater risk due to the possibility of high volatility, low liquidity, currency fluctuations, the adverse effect of social, political and economic instability, weak supervisory structures and accounting standards.

EPM Techniques: The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

Exchange Rate Risk: Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.

Liquidity Risk: In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Responsible Investment Style Risk The Fund can only invest in holdings that demonstrate compliance with certain sustainable indicators or ESG characteristics. This reduces the number of securities in which the Fund can invest and there may as a result be occasions where it forgoes more strongly performing investment opportunities, potentially underperforming non-sustainable funds.

Fund Restrictions Definitions

Adult Entertainment: Companies which own or produce adult entertainment services, or engage in the distribution or sale of adult entertainment services.

Alcohol: Companies which have involvement in brewing, distillation or sale of alcoholic drinks.

Animal Welfare: Companies that conduct animal testing (other than for purposes of human or animal health and/or where it is required by law or regulation).

Armaments: Companies who manufacture armaments or nuclear weapons or associated products.

Controversial Weapons: Weapons which have an indiscriminate and disproportional impact on civilians or weapons that are illegal and prohibited by international conventions and treaties.

Fossil Fuels: Companies involved in the exploration, extraction or refining of oil, or gas, or coal, plus any activity relating to thermal coal.

Gambling: Companies who promote irresponsible gambling which includes betting shops, casinos or amusement arcades.

High Environmental Impact: Companies which have a high environmental impact, and which have 'no evidence' of appropriate environmental management systems.

Human Rights Risks: Companies with a strategic presence operating in countries of concern and which have 'no evidence' of policies or systems to manage human rights risks.

Nuclear Power: Companies who generate energy from Nuclear Power.

Nuclear Weapons: Companies that manufacture, nuclear; or are involved in the production of intended-use parts, whole weapons systems, or exclusive delivery platforms.

Tobacco: Companies which are growing, processing or selling tobacco products.
