

PERSPECTIVE Socially Responsible Investment Fund

Fund Objective

The Responsible Investment Fund seeks to add value through utilising a selection of funds that have a Sustainability focus and or, robust Environmental Social Governance (ESG) integration within the funds own investment policy. In constructing the Perspective Responsible Investment Fund, Rossborough Financial take particular account of the asset allocation decisions – the process of applying specific weightings to certain asset classes within the fund. The Fund is constructed from actively managed funds, providing exposure across a wide range of asset classes. The objective of the Responsible Investment Fund is to achieve capital growth over the medium to long term. The Fund is able to invest 40 - 85% in equities and will also hold varying amounts of bonds (fixed interest) and other asset classes. For liquidity management purposes sub funds may also invest in other transferable securities, deposits and units or shares in collective investment schemes. Investments can be made in overseas assets and the mix will vary over time. For additional information please contact Rossborough Financial Services email pensions@rfsi.co.uk

Fund Information

Additional Information

The fund invests in a range of global shares, with an emphasis on European markets. The regional bias was somewhat unhelpful over the quarter as European shares underperformed those in other regions, most notably the US. Political uncertainties in France and Germany and the release of subdued economic indicators eroded sentiment. We used the weakness as an opportunity to top up the fund's exposure to European shares and to benefit from any improved performance in 2025. These purchases were funded by selling some of the fund's shareholdings in Asia, Japan, and the US. The latter performed particularly well, following Donald Trump's victory in November's election and amid suggestions that his 'America first' policies could help support profitability among US-listed firms.

Commentary

Market Commentary as at 31 December 2024: Both Equities and Bonds detracted from performance over the quarter, as most of the major asset classes posted negative returns. Within Bonds, performance was broadly negative across the fixed income spectrum, with US Treasuries and Emerging Market bonds being the key detractors to performance. US Treasuries came under pressure as markets mulled over the potential implications of a second Trump presidency. For Emerging Market assets, dollar strength proved to be a significant headwind, particularly for local currency denominated bonds. Within Equities, allocations to the broad US market, Financials and US Small-Cap stocks contributed positively to performance, given that these were amongst the few parts of the market that managed to end in positive territory over the quarter. The broad US market benefitted from the continued participation of Large-Cap Growth stocks in the AI rally, whilst Financials and Small-Cap stocks firmed on the back of expectations that they would be key beneficiaries of a second Trump presidency. On the other hand, Emerging Market equities came under pressure, particularly Korean and Chinese equities.

Important information

Zurich Integrated Benefits is a business name of Zurich International Life Limited. Zurich International Life Limited is authorised under the Isle of Man Insurance Act 2008 and is regulated by the Isle of Man Financial Services Authority which ensures that the company has sound and professional management and provision has been made to protect planholders.
