

Zurich Climate Focus World Equity Fund

CHIA2 CHF Unhedged Accumulating

Please refer to the Prospectus, Supplement and KIID before making any final investment decisions.

The Zurich Carbon Neutral World Equity Fund (the 'Fund') aims to track the return performance of the MSCI World Climate Paris Aligned Ex Select Business Involvement Screens Index (the 'Index') before fees and expenses. The Fund is passively managed.

The Index provides exposure to companies that are working towards a climate neutral economy by seeking to align with the climate goals of the Paris Agreement on carbon reduction and the recommendations of the Task Force on Climate-Related Financial Disclosures.

Additionally, the Fund seeks to offset the estimated carbon footprint of the Fund's portfolio of investments ("Carbon Offsetting") in order to further contribute to the attainment of the climate goals of the Paris Agreement on carbon reduction.¹

This way the Fund seeks to:

- offset the carbon footprint of its investments
- increase the share of sustainable investments
- establish a strong overweight in clean technology companies
- largely disinvest from fossil fuel-linked companies

For a more detailed description of the Fund including the sustainability aspects of the Fund please refer to the Prospectus, Supplement and latest key investor document ("KIID") and the disclosures required pursuant to Regulation (EU) 2019/2088 (SFDR) available at www.carnegroup.com/zurich.

Risk and reward profile

The risk indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. The lowest category does not mean a risk-free investment.

This requires corresponding risk tolerance and capacity. All investments are subject to market fluctuations and specific risks, which can significantly increase under unusual market conditions. Long-term equity investments are generally subject to greater fluctuations in value than bond and money market investments. The Fund may be suitable for investors that are prepared to invest for at least 5 years. The Fund can use derivatives, which may result in additional risks (particularly counterparty risk). For more information on risks, please see the section entitled "Risk Factors" in the Prospectus of the ICAV and Supplement of the Fund.

¹ The Carbon Offsetting relates to compensating for the estimated CO₂ equivalent emissions of the companies included in the Fund and is currently achieved by contributing to the Rimba Raya Biodiversity Reserve Project.

² Sources: MSCI, DWS International. Data as of 31.05.2025

³ The MSCI World Index serves as a reference for a traditional investment in global developed market equities.

⁴ Fund performance is presented net of (after) fees. These figures refer to the past. Past performance is not a guarantee of future performance. The performance shown does not take account of any commissions and costs charged when subscribing to and redeeming units. On 9 September 2021, the Benchmark has changed from "MSCI World Net Total Return Index" to "MSCI World Climate Paris Aligned Ex Select Business Involvement Screens Index"

⁵ YTD: yeartodate (since beginning of the year).

⁶ Benchmark in currency of share class. On 9 September 2021, the Benchmark has changed from "MSCI World Net Total Return Index" to "MSCI World Climate Paris Aligned Ex Select Business Involvement Screens Index"

Key benefits

- ✓ Can be used as a module for flexibly implementing the investment strategy of a unitlinked life insurance product or a pension plan.
- ✓ Independent investment management process, which meets the highest compliance requirements.
- ✓ Broadly diversified and transparently managed investments.
- ✓ Much “greener” portfolio compared to a traditional investment in global developed market equities (MSCI World Index) thanks to the Fund’s low carbon investment strategy and Carbon Offsetting.

Key risks

Derivatives Risk: The Fund may invest in FDIs to hedge against risk and/or to increase return. There is no guarantee that the Fund’s use of derivatives for either purpose will be successful. Derivatives are subject to various risks including but not limited to counterparty risk (including potential loss of instruments), liquidity risk, correlation risk and legal risk and are highly sensitive to underlying price movements, interest rates and market volatility and therefore come with a greater risk than directly investing in the underlying securities themselves.

Risks associated with the ability to track an index: Transaction costs and other fees and expenses to be borne by the Fund and exchange rate factors where the underlying equities are denominated in a different currency to the Base Currency or currency of any Class of Shares are likely to affect the ability of a Fund to track the performance of the Index.

Risks associated with Depositary Receipts: ADRs and GDRs do not always perform in line with the underlying security and there is no guarantee that a similar outcome will be achieved to that if it were possible to hold the securities directly. In the event of the suspension or closure of a market(s) on which the underlying securities are traded, there is a risk that the value of the ADR/GDR will not closely reflect the value of the relevant underlying securities. Additionally, there may be some circumstances where the Investment Manager cannot, or it is not appropriate to, invest in an ADR or GDR, or the characteristics of the ADR or GDR do not exactly reflect the underlying security.

Currency Risk: Changes in the exchange rate between the base currency and such denominated currency of an unhedged currency share class may lead to a depreciation of the value of such shares as expressed in the denominated currency. Fluctuations in the exchange rate between the currencies of the Fund’s underlying assets and the currency of a share class may lead to currency risk for the holders of shares in the relevant class. Shareholders of hedged share classes should be aware that they may be substantially limited from benefiting if the denominated currency rises against the base currency.

Carbon Offsetting Risk: There is no guarantee that techniques used by the Fund to offset the estimated carbon footprint will be achieved. The actual carbon footprint of the portfolio of investments of the Fund may therefore be higher or lower than the estimated carbon footprint due to circumstances beyond control of the ICAV or its delegates. Attention is drawn to the risk that the value of the principal invested in the Fund may fluctuate.

SFDR Fund Disclosure Risk: The SFDR (meaning Regulation 2019/2088 of the European Parliament and of the Council of 27 November 2019) has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. The SFDR related disclosures in each Supplement, marketing materials in respect of the Funds and in website disclosure have been made in good faith based on the relevant information available at the date thereof. As additional information becomes available, and as further guidance is issued by the Central Bank and the European Supervisory Authorities in this regard, such SFDR related disclosures in the relevant Supplement, marketing materials and on the website are subject to change and will be updated accordingly.

For more information on risks, please see the section entitled “Risks Factors” in the Prospectus of the ICAV and Supplement of the Fund and the Key Investor Information Document.

Glossary

Anti-dilution adjustment	The process of adjusting the subscription or redemption price for shares in the Fund from the Fund's net asset value per share where there are net subscriptions/redemptions in order to pass on dealing costs arising from such net subscriptions/redemptions to investors give rise to such dealing costs and preserve the value of the underlying assets of the Fund. Please see "Anti-Dilution Adjustment" in the Prospectus and Supplement for further details.
Benchmark (BM)	An index that can be used by an investment fund as the basis of comparison for assessing the performance achieved.
Brown revenues	The weighted average % revenue derived from any of the fossil fuel-related activities including thermal coal mining, oil and gas extraction, thermal coal-based power generation, and oil and gas-based power generation.
Carbon footprint	Total CO ₂ -equivalent emissions in metric tons per year per million dollars invested.
Carbon offsetting	Funding a reduction or removal of CO ₂ -equivalent emissions to compensate for the carbon emissions associated with a particular activity (e. g., operating a business).
Green revenues (clean technology-based)	The weighted average % revenue derived from alternative energy, energy efficiency, green building, pollution prevention, or sustainable water (MSCI clean technology themes).
MSCI ESG Fund Rating	The MSCI ESG Rating (AAA-CCC) is calculated as a direct mapping of MSCI ESG Quality Scores to letter rating categories (e. g. AAA = 8.6–10). The ESG Ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).
MSCI ESG Quality Score	The MSCI ESG Quality Score (0–10) for funds is calculated using the weighted average of the ESG scores of fund holdings. The Score also considers ESG Rating trend of holdings and the fund exposure to holdings in the laggard category. MSCI rates underlying holdings according to their exposure to industry specific ESG risks and their ability to manage those risks relative to peers.
Ongoing Charges Figure (OCF)	The OCF is a measure of the total annual expenses incurred by a fund and is expressed as a percentage. It allows an accurate comparison of the costs of funds from different companies to be made.
Scope 1 emissions	The direct greenhouse gas emissions that are from sources owned or controlled by the issuers of the Fund's investments.
Scope 2 emissions	The indirect greenhouse gas emissions associated with the production of electricity, heat, or steam purchased by the issuers of the Fund's investments.
Scope 3 emissions	All other indirect emissions, i. e. emissions associated with the extraction and production of purchased materials, fuels, and services, including transport in vehicles not owned or controlled by the issuers of the Fund's investments, their outsourced activities, waste disposal, etc.
(Share of) sustainable investments	Percentage allocation to investments defined as sustainable under Article 2, point (17) SFDR (meaning Regulation 2019/2088 of the European Parliament and of the Council of 27 November 2019).

Important legal information

This document is destined exclusively for internal use by intermediaries appointed by Carne Global Fund Managers (Ireland) Limited and/or institutional or qualified investors and shall not be passed on to third parties. Particularly, this document shall only be used as advertising material for Zurich Group subsidiaries as investors and shall not be used as advertising material for public distribution or any other kind of public offering of the funds, their sub-funds or share categories. The responsibility for the further use of fund descriptions contained in this document lies solely with the intermediary. The information in this document is given for information purposes only and does not qualify as investment advice. No liability is assumed for the accuracy and completeness of the information. Opinions and assessments contained in this document may change and reflect the point of view of the Investment Manager and/or the Global Services Co-ordinator in the current economic environment. This document qualifies as marketing material. Investments should only be made after a thorough reading of the current prospectus and/or the fund regulations, the Supplement, the Key Information Document, the instrument of incorporation, and the current annual and semi-annual reports (the Fund Documentation), as well as after consulting an independent finance and tax specialist. The value of the units and the return they generate can go down as well as up. They both are affected by market volatility and by fluctuations in exchange rates. While this fact sheet has been prepared to be consistent with the Fund Documentation, the Fund Documentation shall prevail if there is a conflict. Investors should invest in the fund on the basis of having read the fund documentation. Neither the Fund, the Investment Manager nor Carne Global Fund Managers (Ireland) Limited will assume any liability for possible losses. The performance of past values and returns is no indicator of their current or future development. The performance of values and returns does not include the fees and costs which may be charged when buying, selling and/or switching units. Management Company is Carne Global Fund Managers (Ireland) Limited, 2nd Floor, Block E, Iveagh Court, Harcourt Road, Dublin 2, Ireland. Depositary is State Street Custodial Services (Ireland) Limited, 78 Sir John Rogerson's Quay, Dublin 2, Ireland. Global Services Co-ordinator is Zurich Invest Ltd, Hagenholzstrasse 60, 8050 Zurich, Switzerland. The funds are admitted for offering and distribution in several countries, however, the funds are not registered and, therefore, may not be offered for sale or be sold in the United States of America and its dependencies.
