Performance (%) at month end	1 mth	3 mth	6 mth	1 yr	SI (p.a.)*
Fund	0.56	5.32	4.70	17.10	16.86
Index	1.24	7.67	7.85	23.81	19.25
Outperformance	-0.68	-2.35	-3.15	-6.71	-2.39

Past performance is not a reliable indicator of future performance. The total return performance figures quoted are historical, calculated using end-of-month prices and do not allow for the effects of income tax or inflation. Total returns assume the reinvestment of all distributions. The performance is quoted net of all fees and expenses. The indices do not incur these costs.

* SI (p.a.) annualised total return since inception (SI) hedged for performance calculation purposes to 31 January 2025.

Performance comparison of \$10,000 since inception¹

Fund Commentary

The market environment was dominated by uncertainty around emerging tariff policies. President Trump's abrupt "Liberation Day" tariff announcement on April 2 triggered a sharp market selloff. Although a subsequent 90-day pause helped markets rebound, the initial shock fueled heightened volatility. The unclear timeline and scope of tariff actions kept businesses and markets on edge, reinforcing a risk-off sentiment across global assets.

Among the top contributors were Babcock International and Ascendis. Babcock, the second-largest supplier to the UK Ministry of Defense, is the leading provider and servicer for critical programs like nuclear submarines, ships and shipyards. Following major asset sales, Babcock is now predominantly a defense company, which the investment team believe is well positioned to benefit from rising defense budgets. Its ownership of key infrastructure and the largest nuclear-capable workforce in the UK gives it a strong competitive edge, opening opportunities beyond the UK. The company reported strong results, with 11% revenue growth, 17% operating profit growth and a backlog expansion to £10.1 billion.

Shares of Ascendis continued the Q1 momentum due to excitement around the launch of its latest drug, Yorvipath®. The drug treats hypoparathyroidism—a rare endocrine disorder with limited effective treatments. The investment team's view is that this will be a significant profit cycle driver, given the sizable addressable market and the unmet needs in current care. Yorvipath® was approved and launched in December, and early results showed the launch has been running well ahead of expectations. While it's still early, initial prescription data supports the bullish view of sales that could exceed market expectations by a wide margin. Meanwhile, Ascendis has a third promising drug, Transcon CNP (to treat achondroplasia), that was submitted for FDA approval in Q1 and could be launched in 2026.

Why Artisan Global Discovery?

- ✓ Portfolio of global companies considered to be on the cusp of a compelling profit growth cycle
- ✓ A focus on small and mid-sized companies that may complement 'large company' global equity funds
- ✓ Exposure to innovative industry sectors not highly represented in the ASX, such as Healthcare and IT
- ✓ Growth team has an investment track record that dates back to 1997
- ✓ Artisan Partners has an open architecture business model to help attract top investment talent

Past performance is not a reliable indicator of future performance. The total return performance figures quoted are historical, calculated using end-of-month mid prices and do not allow for the effects of income tax or inflation. Total returns assume the reinvestment of all distributions. The performance is quoted net of all fees and expenses. The indices do not incur these costs. This information is provided for general comparative purposes. Positive returns, which the Chester High Conviction Fund (the Fund) is designed to provide, are different regarding risk and investment profile to index returns. A performance fee of 15.0% is payable quarterly on any excess performance (after deducting the management fee) above the benchmark, S&P/ASX Small Ordinaries Accumulation Index. A performance fee is only payable where the unit price is higher than when the last performance fee was paid.
