

CT UK

Fund Objective

The Fund aims to achieve investment growth over the long term (5 years, or more). It also looks to outperform the FTSE All-Share Index (the "Index") over rolling 3-year periods, after the deduction of charges. The Fund is actively managed, and invests at least 90% of its assets in shares of companies listed on the London Stock Exchange; predominantly companies domiciled in the UK, or which have significant UK business operations. There is no restriction on size, but investment tends to focus on the larger companies. The Index is regarded as an appropriate performance measure of the UK stock market, with over 600 companies currently included, and provides a suitable target benchmark against which Fund performance will be evaluated over time. The Investment Manager selects companies considered to have good prospects for share price growth across different sectors, and typically invests in fewer than 80 companies, including some companies not within the Index. The Investment Manager also seeks to create a portfolio that compares favourably against the Index over rolling 12-month periods, when assessed using the Columbia Threadneedle ESG Materiality Rating model. This model (developed and owned by Columbia Threadneedle Investments) analyses company data to assess how effectively material environmental, social and governance (ESG) risks and opportunities are being managed. If sufficient data is available, the combined results are expressed as a numerical rating to indicate how much exposure a company has to material ESG risks and opportunities in a particular industry. Whilst the Fund may still invest in companies that have poor ESG Materiality ratings, at least 50% of the portfolio is invested in companies with strong ratings. The Investment Manager engages with companies with a view to influencing management teams to address material ESG risks and improve their ESG practices. Columbia Threadneedle Investments is a signatory to the Net Zero Asset Managers Initiative and has committed to an ambition to reach net zero emissions by 2050 or sooner for a range of assets, including the Fund. As such, the Investment Manager will proactively engage with companies to assist with progressing this and may disinvest from those not meeting the minimum standards. The Fund only invests in companies that follow good governance practices. It does not invest in companies which derive revenue from industries or activities above the thresholds shown: tobacco production (5%); nuclear weapons – indirect involvement (5%), conventional weapons – military, or civilian firearms (10%), and thermal coal – extraction or power generation (30%), providing a company is not engaged in new coal projects. The Fund excludes companies that have direct involvement in nuclear or controversial weapons, and companies determined to have breached international standards and principles. The Fund may invest in other securities, collective investment schemes (including funds managed by Columbia Threadneedle companies), money market instruments, deposits, and cash. Derivatives may only be held with the aim of reducing risk or managing the Fund more efficiently.

Fund Information

Fund Management Company	Zurich International
Zurich Fund Code	EPGBP
Underlying ISIN	GB0001439610
Zurich Fund Size	£0.38m
Launch Date	01/02/2012
Unit Price	£2.15

This factsheet is for informational purposes only and is not an investment offer. Potential investors should seek professional advice before making decisions. Information may change without notice and is sourced from reliable sources, but accuracy is not guaranteed. Zurich International Life Limited and its affiliates are not responsible for errors or omissions. Please consult a financial professional to determine suitability for your investments.

All funds carry certain risks, and it is important to consider these risks before making an investment decision. The value of investments and any income derived from them is not guaranteed; they can both fall and rise and may be eroded in real terms by the effects of inflation.

- Key factors that may increase these risks include, but are not limited to:
- The proportion of assets held overseas,
 - Any concentration in specific geographic areas or industry sectors,
 - The amount invested in property or property-related shares,
 - The use of derivatives and other financial instruments intended to generate outperformance,
 - Additional charges that may reduce the number of units you hold.
