

BlackRock GF Japan Small & MidCap Opportunities

Fund Objective

The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets. The Fund invests at least 70% of its total assets in the equity securities (e.g. shares) of small and mid capitalisation companies domiciled in, or the main business of which is in, Japan. Small and mid capitalisation companies are considered companies which, at the time of purchase, form the bottom 30% by market capitalisation of Japanese stock markets. Market capitalisation is the share price of the company multiplied by the number of shares issued. The investment adviser (IA) may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes in order to achieve the investment objective of the Fund, and/or to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets). The Fund is actively managed, and the IA has discretion to select the Fund's investments. In doing so, the IA will refer to the S&P Japan Mid Small Cap Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The IA is not bound by the components or weighting of the Index when selecting investments. The IA may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. The price of equity securities fluctuates daily and may be influenced by factors affecting the performance of the individual companies issuing the equities, as well as by daily stock market movements, and broader economic and political developments which in turn may affect the value of your investment. The return on your investment in the Fund is directly related to the value of the underlying assets of the Fund, less costs (see "What are the costs?" below). The relationship between the return on your investment, how it is impacted and the period for which you hold your investment is considered below (see "How long should I hold it and can I take my money out early?"). The depositary of the Fund is The Bank of New York Mellon SA/NV, Luxembourg Branch. Further information about the Fund can be obtained from the latest annual report and half-yearly reports of the BlackRock Global Funds. These documents are available free of charge in English and certain other languages. These can be found, along with other (practical) information, including prices of units, on the BlackRock website at: www.blackrock.com or by calling the International Investor Servicing team on +44 (0) 20 7743 3300

Fund Information

This factsheet is for informational purposes only and is not an investment offer. Potential investors should seek professional advice before making decisions. Information may change without notice and is sourced from reliable sources, but accuracy is not guaranteed. Zurich International Life Limited and its affiliates are not responsible for errors or omissions. Please consult a financial professional to determine suitability for your investments.

All funds carry certain risks, and it is important to consider these risks before making an investment decision. The value of investments and any income derived from them is not guaranteed; they can both fall and rise and may be eroded in real terms by the effects of inflation.

Key factors that may increase these risks include, but are not limited to:

- The proportion of assets held overseas,
- Any concentration in specific geographic areas or industry sectors,
- The amount invested in property or property-related shares,
- The use of derivatives and other financial instruments intended to generate outperformance,
- Additional charges that may reduce the number of units you hold.

Glossary for some of terms used in this factsheet is available in our [Fund Centre guide](#).
